9th European Space Mechanisms and Tribology Symposium

*19-21 September 2001
Liège, Belgium*

Organised by
*The European Space Agency
and
University of Liège*

With support from
*OSTC, Belgium; CNES, France
DLR, Germany; Techspace Aero, Belgium*

**European Space Agency
Agence spatiale européenne**

Contents

H.M. Briscoe - A Man for All Seasons	xi
--	----

Opening Session

Chairman: J.L.Bozet, ULg, Belgium

Beagle 2 Mars - Mission and Status	3
<i>J. Thatcher, Astrium Ltd, United Kingdom</i>	

The 2007 French Mars mission	5
<i>O. Marsal & Ch. Cazaux, CNES, France</i>	

Session 1: Mechanisms Miniaturisation

Chairman: M.Roe, Astrium, United Kingdom

Miniaturized atomic force microscope for planetary exploration	11
<i>S. Gautsch, U. Staufer, T. Akiyama, N.F. de Rooij,</i>	
<i>University of Neuchâtel, Switzerland</i>	
<i>H.R. Hidber, A. Tonin, University of Basel, Switzerland</i>	
<i>D. Müller & L. Howald, Nanosurf AG, Switzerland,</i>	
<i>P. Niedermann, CSEM, Switzerland</i>	

The challenges of miniaturisation for a magnetic bearing wheel	17
<i>M. Scharfe, T. Roschke, E. Bindl, D. Blonski,</i>	
<i>Dresden University of Technology, Germany</i>	
<i>R. Seiler, ESA/ESTEC, The Netherlands,</i>	

Mechanisms for the Beagle2 lander	25
<i>N. Phillips, Astrium UK Ltd., United Kingdom</i>	

Session 2: Tribology I

Chairman: E. Roberts, ESTL, United Kingdom

Tribology in liquid oxygen of SiC/SiC ceramic matrix composites	35
in connection with the design of hydrostatic bearing	
<i>J.L. Bozet, M. Nélis, University of Liège, Belgium</i>	
<i>M. Leuchs, M. Bickel, MAN Technologie AG, Germany</i>	

Ball bearing tests to evaluate Duroid replacements	43
<i>M.J. Anderson, ESTL, AEA Technology Space, United Kingdom</i>	
Characterisation of lubrication effect on performances and lifetime	49
of ceramic and hybrid ball bearings	
<i>F. Di Gesu, Astrium SAS, France and J. Sicre, CNES, France</i>	
The tribological properties of several silahydrocarbons for use in	57
space mechanisms	
<i>W.R. Jones, NASA Glenn Research Center, U.S.A.</i>	
<i>M.J. Jansen, AYT Corp., U.S.A.</i>	
<i>L.J. Gschwender, C.E. Snyder Jr, S.K. Sharma,</i>	
<i>Air Force Research Laboratory, U.S.A.</i>	
<i>R.E. Predmore, NASA Goddard Space Flight Center, U.S.A.</i>	
<i>M.J. Dube, Nye Lubricants Inc., U.S.A.</i>	

Session 3: Science Instrument Mechanisms I

Chairman: E. Suetta, Officine Galileo, Italy

The MIDAS experiment for the Rosetta mission	67
<i>H. Arends, J. Gavira, J. Romstedt, B. Butler,</i>	
<i>ESA/ESTEC, The Netherlands</i>	
<i>K. Torkar, G. Fremuth, H. Jeszenszky,</i>	
<i>Space Research Institute of the Austrian Academy of Science, Austria</i>	
<i>G. Coe, M. Yorck, Atos Origin BV, The Netherlands</i>	
The scanning mechanism for ROSETTA/MIDAS:	75
from an engineering model to the flight model	
<i>R. Le Letty, F. Barillot, N. Lhermet, F. Claeysen,</i>	
<i>Cedrat Recherche, France</i>	
<i>M. Yorck, Atos Origin BV, The Netherlands</i>	
<i>J. Gavira Izquierdo, H. Arends, ESA/ESTEC, The Netherlands</i>	
Mechanisms of the Rosetta high gain antenna	83
<i>C. Pereira, HTS AG, Switzerland</i>	
Comet sample acquisition for ROSETTA lander mission	91
<i>M. Marchesi, R. Campaci, A. Nista, Tecnomare, Italy</i>	
<i>P. Magnani, E. Re, Tecnospaio, Italy</i>	
<i>R. Mugnuolo, A. Olivieri, Italian Space Agency, Italy</i>	

Session 4: In-Flight Experiences and Lessons Learned

Chairman: S. Loewenthal

Lockheed Martin Space Systems Company, U.S.A.

- Life test of the SCARAB instrument slip-ring units 99
J.B. Mondier, CNES, France
F. Sirou, Ecole Polytechnique, Palaiseau, France
P. Mäusli, Mecanex, Nyon, Switzerland
- A review of the mechanisms on SOHO/CDS after five years in orbit 107
E. Sawyer and J. Long, Rutherford Appleton Laboratory, United Kingdom
- Useful experiences in a series of deployable booms for Cluster satellites 113
J.A. Andiön and C. Pascual, SENER Ingeniería y Sistemas, Spain
- Space mechanism development lessons to be learned - an independent view 121
S.D. Lewis, ESTL, AEA Technology Space, United Kingdom
M. Humphries, Sula Systems, United Kingdom

Session 5: Deployment Mechanisms, Actuators and Drives

Chairman: M. Schmid, Astrium, Germany

- Non explosive low shock reusable 20 kN hold-down release actuator 131
J. Vázquez and J. Bueno, SENER Ingeniería y Sistemas, Spain
- High accuracy evaluation method of deployment characteristics 137
 for large deployable structures
H. Ishikawa and A. Meguro, NTT Network Innovation Laboratories, Japan
- A low cost hinge for appendices deployment: design, test and applications 145
D. Givois, T. Mazoyer, Metravib, France, J. Sicre, CNES, France
- Regulated deployment mechanism for a panel like appendage 153
J.I. Bueno, J. Vázquez, SENER Ingeniería y Sistemas, Spain
J. Gavira, G. Migliorero, ESA/ESTEC, The Netherlands

Session 6: Science Instrument Mechanisms II

Chairman: P. Kerhousse, Alcatel, France

- Scan Mechanism for IIR ESSP3-CENA 163
C. Laborde, EADS-SODERN, France and Ph. Guay, CNES, France
- Demonstration of a 10 K stirling cycle cooler for space applications 165
G.R. Baker, D. Féger, A.S. Gibson, A. Little, Astrium, United Kingdom
T.W. Bradshaw, M. Crook, A.Orlowska,
Rutherford Appleton Laboratory, United Kingdom
B.J. Tomlinson, U.S. Air Force Research Laboratories, U.S.A.
A. Sargeant, Cubic Applications Inc., U.S.A.
- Wire boom mechanism for BepiColombo mission to Mercury 171
J.F. González Lodoso, J.J. Echevarria, SENER Ingeniería y Sistemas, Spain
J.M. Gavira, ESA/ESTEC, The Netherlands

Session 7: Launch Vehicle Mechanisms

Chairman: M. Gruslin, Techspace Aero, Belgium

- Porting aircraft technology to launchers: the EHA case 181
F. De Coster, Société Anonyme Belge de Constructions Aéronautiques, Belgium
- Electrically actuated regulation valves for rocket engines 183
Chr.F. Promper, Techspace Aero, Belgium
- Development of a reusable, low-shock clamp band separation system 191
 for small spacecraft release applications
D. Downen, S. Christiansen, Starsys Research Corp., U.S.A.
O. Arjulf, Saab Ericsson Space, Sweden
- Dynamics simulation of pyro actuated "ball lock" separation system 199
 for micro-satellites to evaluate release shock
S. Somanath, V. Krishnan Kutty, E.J. Francis,
Vikram Sarabhai Space Centre, India

Session 8: Special Functions

Chairman: M. Falkner, AAe, Austria

- SMART-1 Electrical propulsion mechanism (EPMEC) 209
B. Wood, W. Buff, Ph. Delouard, Contraves Space AG, Switzerland
- A cold focal plane chopper for Herschel-PACS - 221
 critical components and reliability
*R. Hofferbert, D. Lemke, O. Krause, U. Grözinger, A. Böhm,
 Max-Planck-Institut für Astronomie, Germany
 W. Bollinger, J. Katzer, Carl Zeiss, Germany*
- A new and innovative use of the thermal knife and Kevlar 231
 cord components in a restraint and release system
A. Stewart, NASA Goddard Space Flight Center, U.S.A.
- Integrated structure and controller systems: a design procedure 239
 for controlled multi-body flexible high performance mechanisms
E. Rugi, Contraves Space AG, Switzerland
- Solar paddle actuator for small satellites using shape memory alloy 249
*T. Iwata,, H. Murakami, Y. Toda,
 National Institute of Advanced Industrial Science and Technology, Japan
 Y. Fujiwara, A. Ogawa, Actment Co. Ltd, Japan*

Session 9: Tribology II

Chairman: J. Marcos, Inasmet, Spain

- Improved tribological behaviour of MoS₂ thin solid films alloyed with WC 257
*J.I. Oñate, M. Brizuela, A. Garcia-Luis, I. Braceras, J.L. Viviente,
 Fundación Inasmet, Spain
 J. Gomez-Elvira, Instituto Nacional de Técnica Aeroespacial, Spain*
- Hibernation storage testing of a reaction wheel for the ROSETTA programme ... 263
P. McMahon, Astrium UK Ltd, United Kingdom
- Observations on the influence of launch vibration on bearing torque 271
 and lubricant performance
*S.D. Lewis, S. Söchting, E.W. Roberts,
 ESTL, AEA Technology Space, United Kingdom
 I. Sherrington, University of Central Lancashire, United Kingdom*

Posters

Tribology

- TriboLAB – A space tribometer 281
J. Serrano, J. Gómez-Elvira, R. Santiago, J. Pazos,
Instituto Nacional de Técnica Aeroespacial, Spain
J. Oñate, I. Garmendia, A. Rodriguez, Fundación Inasmet, Spain
- Advances in solid lubricant coating technology 285
E.W. Roberts and M.J. Anderson,
ESTL, AEA Technology Space, United Kingdom
- Evaluation tests of industrial vacuum bearings for space use 289
S. Obara, A. Sasaki, M. Haraguchi, K. Imagawa,
National Space Development Agency of Japan
M. Nishimura, N. Kawashima, Toshiba Corporation, Japan
- Tribological characteristics of solid lubricated bearings 297
 used in ADEOS-II TCM
Y. Tanaka, M. Haraguchi, S. Obara, A. Sasaki, S. Kawata, H. Suzuki,
National Space Development Agency of Japan
- Advanced tribology design tools for space mechanisms 305
E.W. Roberts and S.D. Lewis,
ESTL, AEA Technology Space, United Kingdom
- Study of RF PACVD Diamond Like Carbon coatings deposited 309
 at low bias for vacuum applications
K. Vercammen, J. Meneve, E. Dekempeneer
Flemish Institute for Technological Research, Belgium
E. W. Roberts, ESTL, AEA Technology Space, United Kingdom
M. Eiden, ESA/ESTEC, The Netherlands
- The Herschel-PACS grating drive mechanism: 313
 Design status and prototype results
E. Renotte, J.-M. Gillis, C. Jamar, B. Marquet, J.-Y. Plesseria,
Centre Spatial de Liège, Belgium
B. Collin, C. Delrez, AMOS S.A., Belgium
- Low temperature tribology at the Federal Institute for Materials Research 317
 and Testing (BAM)
Th. Gradt, H. Börner, W. Hübner,
Federal Institute for Materials Research and Testing, Germany

Mechanisms Components

- Eddy current damper simulation and modeling 321
S. Starin, J. Neumeister, CDA Intercorp, U.S.A.
- Celtic Pivots 327
M. Coppée, B.E. System, France
- Piezoelectric Stewart platform for general purpose 331
 active damping interface and precision control
A. Abu Hanieh, A. Preumont, Université Libre de Bruxelles, Belgium
N. Loix, Micromega Dynamics, Belgium
- Magneto-resistive position sensors for cryogenic space applications 335
O. Krause, U. Grözinger, D. Lemke, A. Böhm, R. Hofferbert,
Max-Planck-Institut für Astronomie, Germany
- New wheel developments for small spacecraft 339
W. Kupferschmitt, G. Dallafina, TELDIX GmbH, Germany
R. Seiler, ESA/ESTEC, The Netherlands
- High Resolution Standard Proximity Sensor (HRSPS) 343
H.-P. Aeby, R. Blaser, N. Mancini, M. Mivelaz, J. Perriard,
Vibro-Meter S.A., Switzerland

International Space Station

- Heavy duty complete extension slides 351
J.I. Bueno, J. Vázquez, SENER Ingeniería y Sistemas (Spain)

Mechanisms Testing

- Building and testing of MIDAS instrument sub-assemblies 355
S.D. Lewis, ESTL, AEA Technology Space, United Kingdom
