Contents

Preface	xvii
<i>Elmann-Larsen, B.</i>	xvii

Invited papers

Current Concepts in Gravitational Physiology

Osteoporosis and genes in space.	3
<i>Elmann-Larsen, B.</i>	3
Low gravity on Earth by magnetic levitation of biological material	7
<i>Valles, J.M. and Guervorkian, K.</i>	7
The health of the human skeletal system for weight bearing against gravity	11
<i>Richardson, C.A.</i>	11

Gravity and the Cardiopulmonary System

Research in differential adaptations of vessels to microgravity	15
<i>Li-Fan Zhang, Le Ning Zhang et al.</i>	15
The gravity of LBNP exercise: Lessons learned from identical twins in bed for 30 days	19
<i>Hargens, A, Groppo, E.R. et al.</i>	19

Gravity Sensing and the Cell

Lipoxygenase and apoptosis in microgravity	23
<i>Maccarrone, M., Battista, N. et al.</i>	23
Gravity dependence of microtubule preparations	27
<i>Tabony, J., Glade, N. et al.</i>	27
Ciliates as model systems for cellular graviperception	31
<i>Bräucker, R. and Hemmersbach, R.</i>	31
Mitochondrial adaptations in skeletal muscle cells in mammals exposed to gravitational unloading	35
<i>Shenkman, B., Nemirovskaya, T.L. et al.</i>	35
Effects of simulated microgravity on thyroid carcinoma cells	39
<i>Grimm, D., Kossmehl, P. et al.</i>	39
The role of signaling pathways in osteoblast gravity perception	43
<i>Hughes-Fulford, M.</i>	43

Physiological Basis for Countermeasures and Applications

Countermeasures for long-term spaceflights. Lessons learned from the Russian space program <i>Kozlovskaya, I.B.</i>	47
Electrical stimulation as a countermeasure to muscle alterations in space <i>Freilinger, G.</i>	53
Smooth pursuit deficits in space flights of variable length <i>Reschke, M.F.</i>	57
Effects of spaceflight, simulated spaceflight and countermeasures on single muscle fiber physiology <i>Trappe, S.</i>	61
Muscle transverse stiffness and venous compliance under conditions of simulated supportlessness <i>Vinogradova, O., Popov, D.V. et al.</i>	65
Muscle and tendon adaptations to ageing and spaceflight <i>Narici, M, Maganaris, C.N. et al.</i>	69

Sessions

Muscle & Bone Physiology

Mechanisms of gravity-dependent changes in the bone tissue <i>Rodionova, N., Oganov, V.S et al.</i>	73
Visual analysis of trabecular bone structure <i>Prohaska, S., Hege, H.-C. et al.</i>	75
Magnetic resonance microscopy for the quantitative analysis of trabecular bone architecture <i>Toffanin, R., Accardo, A. et al.</i>	77
Bone modeling and structural measures of complexity <i>Zaikin, A., Saporin, P. et al.</i>	79
Comparison of bone loss with changes of bone architecture at six different skeletal sites using measures of complexity <i>Saporin, P., Gowin, W. et al.</i>	81
Characteristics of the parallel-plate flow chamber for mechanical stimulation of bone cells under microgravity <i>Bacabac, R.; Smit, T. et al.</i>	83
Ca ²⁺ homeostasis and cytoskeletal rearrangement operated by Sphingosine 1-phosphate in C2C12 myoblastic cells <i>Francini, F., Formigli, L. et al.</i>	85
EUROMIR 95 T4 experiment 'Human posture in microgravity': Global results and future perspectives <i>Pedrocchi, A., Baroni, G. et al.</i>	87
Role of afferent control in maintaining structural and metabolic characteristics of stretched soleus in rats exposed to hindlimb suspension <i>Nemiovsckaya, T.L., Shenkman, B.S. et al.</i>	91
Effects of long duration exposure to +2g hypergravity on MHC distribution and maximal tension of rat m.soleus fibers. <i>Nemirovskaya, T. and Shenkman, B.</i>	93
Structural and metabolic characteristics of human soleus fibers after long-duration spaceflight <i>Belozerova, I.N., Nemirovskaya, T.L. et al.</i>	95
The influence of 5 weeks of ULLS and resistance exercise on vastus lateralis and soleus myosin heavy chain distribution <i>Trappe, T.A., Carrithers, J.A. et al.</i>	97
Responses of Hoffman-reflex in human soleus to gravity and/pr fluid shift <i>Ohira, Y., Nomura, T. et al.</i>	99

Posters Bone and Muscle Physiology

- Human *tibia* bone marrow blood perfusion by non-invasive near infrared spectroscopy: A new tool for studies on microgravity
Binzoni, T., Bianchi, S. et al.103
- Mice Drawer System: Phase C/D development & perspectives
Cancedda, R., Pgnataro, S. et al.105
- Effects of Ca²⁺-binding agent on unloaded rat soleus: Muscle morphology and sarcomeric titin content
Shenkman, B.; Nemirovskaya, T. et al.107
- Effects of hindlimb suspension on soleus muscle fibers and their spinal motoneurons in Wistar Hannover rats
Ishihara, A., Nishikawa, W. et al.109
- Somatosensory graviception inhibits the soleus H-reflex in standing man - an underwater experiment
Nakazawa, K., Miyoshi, T. et al.111
- Heat stress facilitates stretch-induced hypertrophy of cultured rat skeletal muscle cells
Yamashita-Goto, K., Ohira, Y. et al.113
- Determination of equivalent amounts of kinetic energy, work and heat energy in the human body
Cinar, Y.115
- Effect of the moderate exercise on performance in upper/lower limb during long-term bed rest
Miyazaki, M.; Yoritaka, H. et al.117

Neuro- and Sensory Physiology

- Influence of imaginary target on "dumping" of vestibulo-ocular reflexes and postural control
Black, F.O., Gianna-Poulin, C. et al.121
- Gravitational biology using fish as model systems for understanding motion sickness susceptibility
Rahmann, H. and Anken, R.123
- The influence of 2.5 G exposure on the morphology of rat vestibular epithelia
Wubbels, R.125
- The expression of heat shock protein 70 in rat brain after +Gz exposure
Sun, X., Li, J. et al.127

Hypergravity effects on pregnancy and parturition <i>Ronca, A., Baer, L. et al.</i>	129
Effects of hypergravity exposure on plasma oxytocin (OT) concentrations in pregnant and lactating rat dams <i>Baer, L., Wade, C. et al.</i>	131

Posters Neuro and Sensory Physiology

Artificial gravity and functional plasticity of nerve system L-[¹⁴ C]- glutamate uptake by nerve terminals from rat cerebellum and cerebral hemispheres under hypergravity stress <i>Borisova, T., Krisanova, N. et al.</i>	135
The influence of microgravity on the morphology of identified cerebral neurons in a cricket (<i>Acheta domesticus</i>) <i>Kirschnik, U., Horn, E. et al.</i>	137
Susceptibility to motion sickness in fish: A parabolic aircraft flight study <i>Hilbig, R., Anken, R. H. et al.</i>	139
Visual function after prolonged bed rest <i>Jaki Mekjavic, P., Eiken, O. et al.</i>	141
Cerebral lateralization for motor tasks in simulated microgravity – A transcranial Doppler technique for astronauts <i>Njemanze, P.C.</i>	143
Histological study of brain in the rats exposed to 93-days'tail suspension <i>Krasnov, I., Gulevskaja, T. et al.</i>	145
Neuronal regulation of otolith growth and kinetotic behaviour <i>Anken, R., Beier, M. et al.</i>	147
Neurobehavioural responses to hypergravity environment in the CD-1 mouse <i>Santucci, D., Francia, N. et al.</i>	149
Adapting to artificial gravity (AG) at high rotational speeds <i>Hecht, H., Brown, E.L. et al.</i>	151
Comparison of the reactions of male and female Wistar rats to 5-day exposure to 2g hypergravity <i>Serova, L.V. and Chelnaya, N.</i>	157
Gravity induced postponed potentiation as a result of repeated 2G influence on rats <i>Krasnov, I.B.</i>	159
Core temperature circadian rhythm during 35 days horizontal bed rest <i>Golja, P., Eiken, O. et al.</i>	161

Cardiovascular & Respiratory Physiology

- Relationship between stroke volume and sympathetic nerve activity: new insights about autonomic mechanisms of syncope
Convertino, V. A. and Cooke, W. H.165
- Head down tilt combined with breathing assistance by the "Iron Lung": A new simulation model for cardiovascular deconditioning, skin, and kidney function in weightlessness?
Baisch, F.169
- The influence of otoliths and neck muscle receptors on peripheral hemodynamic regulation
Tobal, N., Normand, H. et al.171
- Impact of the lay-off length on +Gz-tolerance
Mikuliszyn, R., Kowalski, W. et al.173
- Comparing cardiovascular responses during exercise between head-down tilt pedaling with lower body negative pressure and upright cycling in man
Suzuki, Y. and Gunji, A.175
- Optimizing an LBNP protocol to test cardiopulmonary and arterial baroreflex control of vascular resistance
Hughson, R.L., Shoemaker, J.K. et al.177
- Venous stagnation induced by 7 days in HDT, in the cerebral, ophthalmic, renal and splanchnic territories
Besnard, S., Roumy, J. et al.179
- Dynamics of blood pressure, pulse wave transit time and systolic time intervals during acute gravity changes induced by parabolic flight
Migeotte, P.-F., Dominique, T. et al.181
- Responses of sympathoadrenal and rennin angiotensin systems to stress stimuli in humans during real and simulated microgravity
Kvetnansky, R., Koska, J. et al.183
- Effects of simulated weightlessness on pressure-volume relationships of femoral veins in vivo of New-Zealand rabbits
Yao, Y.-J., Yue, J. et al.185
- Gender affects sympathetic neurovascular control during postural stress
Shoemaker, J.K., Hughson, R.L. et al187

Posters Cardiovascular & Respiratory Physiology

- Dynamic cerebral autoregulation under sinusoidal gravitational loading
Gisolf, J., Stok, W. et al.191

Changes of angiotensinogen expression in arteries of tail-uspended rats <i>Meng, Q.-J., Zhang, L.-F. et al.</i>	193
Effects of head-down tilt on cerebral blood flow in humans and rabbits <i>Asai, Y., Inoue, S. et al.</i>	195
Influence of active recovery following prolonged bed rest on static exercise pressor response <i>Kacin, A., Mekjavic, I.B. et al.</i>	197
Neutral point titration: cardiovascular regulation during combined (LBNP/HDT vs.LBPP/HUT) stimulation <i>Hinghofer-Szalkay, H., Loder, I. et al.</i>	199
Head out of water immersion as simulation study: A heart rate variability study <i>Seps, B., Beckers, F. et al.</i>	201
Noninvasive beat-to-beat stroke volume computation during acute hydrostatic pressure changes in parabolic flight <i>Dominique, T., Migeotte, P. et al.</i>	203
Fluid volume changes and LBNP response after simulated weightlessness with varied oral sodium supply <i>Hinghofer-Szalkay, H., Rössler, A. et al.</i>	205
Urinary albumin in head-down bed rest <i>Cirillo, M.; De Santo, N.G. et al.</i>	207
Changes in potassium channels of vascular smooth muscle cells from hindquarter arteries of 4-Wk simulated weightless rats <i>Fu, Z.-J., Cheng, H.-W. et al.</i>	209
Changes of intracranial pressure during head-down tilt in anesthetized and conscious rabbits <i>Tatebayashi, K., Doi, M. et al.</i>	211
Long-term dynamics of blood pressure in intact and sympathectomized post-suspension rats <i>Borovik, A.; Tarasova, O. et al.</i>	213
Mutual information detects a decreased interdependence between RR and SAP in orthostatic intolerance after microgravity condition <i>Raimondi, G.; Chillemi, S. et al.</i>	215
Influence of 2G-hypergravity on the right atrium secretory cardiomyocytes of rats <i>Pogodina, L; Shornikova, M.V. et al.</i>	217
Responses of rat left ventricle cardiomyocytes to constant 2G- hypergravity <i>Lipina, T.V.; Shornikova, M.V. et al.</i>	219

Remote controlled equipment for multiple blood withdrawal in gravitational physiology experiments <i>Frollo, I.; Banic, B. et al.</i>	221
--	-----

Miscellaneous

A small rodent research facility for flight with Columbus laboratory <i>Adami, G. and Falchetti, G.</i>	225
Stress, suspension and resistance to infection <i>Sonnenfeld, G.; Aviles, H. et al.</i>	227
The long-term adaptation of multicellular model organisms to non-terrestrial and space environments <i>Marco, R.; Husson, D. et al.</i>	229
The Russian programme of biomedical research in the ISS RS and prospects for cooperation <i>Baranov, V.M.; Samarin, G.I. et al.</i>	231
On the analysis of hand synergies during grasping in weightlessness <i>Micera, S.; Dario, P. et al.</i>	233
Influence of helio-geophysical factors (HGF) on environment, on health state and reliability of man's professional functioning, on processes of society development <i>Mikhailov, Alfa; Shilova, et al.</i>	235
Gravity: It's the law <i>Phillips, R.W.</i>	237

Posters Miscellaneous

ECOTOX – Biomonitoring based on real time movement analysis of unicellular organisms <i>Streb, C.; Richter, P. et al.</i>	241
Development of one experimental module to study the modulation of the propagation velocity of chemical excitation waves in gel by weak external force (gravity) <i>Fernandes De Lima, V.M.; Castilho Piqueira, J.R. et al.</i>	243
EPM – the European facility for human physiology research on ISS <i>Rieschel, M.; Nasca, R. et al.</i>	245
Automated culture system experiment hardware: developing test results and design solutions <i>Freddi, M., Covini, M., et al.</i>	247

Bridging the gap between scientists and facilities – from proposal to performance of experiments in space
Schuber, M. and Seibt, D.249

The effect of vibration noise in space relevant experiments
Fossum, K.R.; Johnsson, A. et al.251

Cellular & Plant Physiology

The osteoblast mechano-receptor, microgravity perception and thermodynamics
Klopp, E.; Graff, D. et al.255

Gravitational unloading induces osteoclast-like differentiation of FLG 29.1 cells
Monici, M.; Agati, G. et al.257

Does microgravity induce apoptotic signal in osteoblasts via c-Jun N-terminal kinase ?
Kumei, Y; Morita, S. et al.259

Gravity sensing in the central nervous system
Wiedemann, M. and Hanke, W.261

Influence of hypergravity on hypothalamic vasopressin and oxytocinergic neurons in rats
Ugrumov, M.; Pronina, T. et al.263

Calcium/calmodulin-mediated gravitropic response in plants
Poovaiah, B.W.; Yang, T. et al.265

Effects of gravity and hydrostatic pressure on angular acceleration coding sensory neurones in the crab and dogfish
Fraser, P. J.; Shelmerdine, R.L. et al.269

Gravity and cyclic GMP levels in melanocytic cells
Ivanova, K.; Zadeh, N.H. et al.271

Actomyosin-mediated statolith positioning and sedimentation in gravisensing plant cells studied in microgravity
Braun, M.273

Understanding the gravitropic response of plants through the study of new arabidopsis mutants and the random positioning machine
Migliaccio, F.; Piconese, S. et al.275

Inertial shear forces and the impact on facilities for the International Space Station
Van Loon, J.J.W.A.; Folgering, E.H.T.E et al.277

Lanthanum-induced changes in gravicurvature, calcium balance, and statocyte ultrastructure of pea roots <i>Belyavskaya, N.</i>	279
Modulation of human endothelial cell behaviour in simulated microgravity <i>Carlsson, S.I.M.; Bertilaccio, M.T.S. et al.</i>	281
Plant growth using EMCS hardware on the ISS <i>Iversen, T.-H.; Fossum, K. et al.</i>	283
Scanning Probe Microscopy for Bio & Nanotechnology onboard the ISS <i>Von Richter, A., Heckl, W.M. et al.</i>	285
Preparation of biological samples in space: The Experiment Preparation Unit <i>Deceuninck, H.; Pastor, M. et al.</i>	289
A glovebox with three levels of containment and clean room facilities for growing and handling biological material at physiologically correct gas compositions and with optimal quality assessment for tissue-engineering, ex vivo expansion, manipulation and gene therapy <i>Villardsen, J.A.; Voeten, R.G.H.M. et al.</i>	291
Cell density affects cell motility in <i>P. carterae</i> cultures <i>Montufar-Solis, D.; Marsh, M.E. et al.</i>	293

Posters Cellular and Plant Physiology

Microgravity-induced programmed cell death in astrocytes <i>Uva, B.M.; Masini, M.A. et al.</i>	297
Signal transduction and gene expression during graviresponse in sunflower hypocotyls (<i>Helianthus annuus</i> L.) <i>Theisen, R.; Kriegs, B. et al.</i>	299
High light exposure leads to a sign change in gravitaxis of the flagellate <i>Euglena gracilis</i> <i>Ntefidou, M.; Richter, P. et al.</i>	301
Physiological characterization of gravitaxis in <i>Euglena gracilis</i> <i>Richter, P.; Ntefidou, M. et al.</i>	303
Gravisensitivity of plant cells: Experimental data and hypotheses <i>Kordyum, E.L.</i>	305
Influence of simulated microgravity on physiological reactions in healthy and virus infected wheat plants of different varieties <i>Mishchenko, L.T.</i>	307

Effect of simulated microgravity on potato minituber formation and structure <i>Nedukha, O.M.; Kordyum, E.L. et al.</i>	309
State of <i>Brassica rapa</i> photosynthetic membranes in microgravity <i>Adamchuk, N.I., Guikema, J.A. et al.</i>	311
Cell structure and mobilization of lipids and proteins from cotyledon under microgravity influence <i>Nedukha, O.; Kordyum, E.L. et al.</i>	313
Effects of microgravity and hypergravity on early developmental stages of <i>Xenopus laevis</i> <i>Rizzo, A.M.; Rossi, F. et al.</i>	315
The effect of simulated microgravity on seed germination and seedling anatomy of <i>Phaseolus vulgaris</i> L. <i>Aronne, G., De Micco, V. et al.</i>	317
Enhanced stress resistance of dormant Bdelloids (<i>Rotifera</i>) <i>Caprioli, M.; Ricci, C. et al.</i>	319
Development of a plant growth support system for experiments on the ISS <i>Iversen, T.-H.; Svare, H. et al.</i>	321
Reserve nutrient substance accumulation in <i>Brassica rapa</i> L. seeds in microgravity condition (STS-87) <i>Popova, A.; Kuang, A. et al.</i>	323
Hypergravity affects cell cycle progression and caveolin-1 expression of <i>in vitro</i> cultured human primary endothelial cells <i>Santi, S.; Bianco, M.C. et al.</i>	325
Hypergravity impairs angiogenic response of <i>in vitro</i> cultured human primary endothelial cells <i>Spisni, E.; Bianco, M.C. et al.</i>	327
Three-dimensional (3-D) structures formed by immortalized human fibroblast cells in simulated microgravity <i>Larina, O.N.; Sidorenko, L.A. et al.</i>	329
Signal trasduction in T lymphocytes under simulated microgravity conditions: Involvement of PKC isoforms <i>Galleri, G.; Meloni, M.A. et al.</i>	331
Preliminary study of gene expression levels in human T-cells exposed to cosmic radiations <i>Meloni, M.A.; Galleri, G. et al.</i>	333
Effect of simulated microgravity on the production of IL-12 by PBMCs <i>Bakos, Á.; Várkonyi, A. et al.</i>	335

Simulated microgravity induces programmed cell death in human thyroid carcinoma cells <i>Kossmehl, P.; Shakibaei, M. et al.</i>	337
The effect of hypergravity on carcinogenesis in mice <i>Volegov, V.I. and Ilyin, E.A.</i>	339
Effects of simulated microgravity conditions on carrageenin-induced oedema in rat <i>Peana, A.T.; Chessa, M.L. et al.</i>	341
Variable acceleration influences cyclic AMP levels in <i>Paramecium biaurelia</i> <i>Hemmersbach, R.; Wilczek, M. et al.</i>	343
Hypergravity exposure affects ventral root activity in tadpoles (<i>Xenopus laevis</i>) <i>Böser, S. and Horn, E.</i>	345
A European pupil project linked to the scientific aims of the experiment AQUARIUS-XENOPUS on the Soyuz flight Andromède to ISS <i>Dournon, C.; Membre, H. et al.</i>	347

Kidney & Hepatic Physiology

Urinary Albumin in space missions <i>Cirillo, M.; De Santo, N. et al.</i>	351
Sensitivity of whole body protein synthesis to amino acid administration during short-term bed rest <i>Biolo, G.; Ciocchi, B. et al.</i>	353
Pancreatic cell responses to primary and repeated 2 G influence <i>Alexeev, E.I. and Krasnov, I.</i>	355
Rate controlling steps in fatty acid oxidation by unloaded rodent soleus muscle <i>Stein, T.P.; Schluter M.D. et al.</i>	357

Psychology Workshop and Topical Team Sessions

Psychosocial and psychiatric issues in space <i>Kanas, N.</i>	361
Psychological countermeasures during space missions: Russian experience <i>Gushin, V.</i>	365
Individual and group adaptation in space; evidence from analogue environments <i>Sandal, G.M.</i>	367

- Current topics on sample preservation. A report on the progress of the ESA Topical Team "Preservation of fixed and non-fixed samples during space experimentation"
Medina, F.J.; Cogoli, A. et al.369

Young Researchers

- Influence of simulated microgravity on human skeletal muscle architecture and function
Reeves, N.D.; Maganaris, C.N. et al.373
- The effects of a change of gravity on the dynamics of prehension
Augurelle, A.; Penta, M. et al.375
- Skeletal muscle protein composition following 5 weeks of ULLS and resistance exercise countermeasures
Carrithers, J.A.; Tesch, P.A. et al.379
- Weight per se influences body mass regulation differently in male and female mice
Wiedmer, P.; Boschmann, M. et al.381
- Reliability of real-time ultrasound for the assessment of transverses abdominis function
Kidd, A.; Magee, S. et al.383
- Head position during long various locomotor executions after prolonged microgravity exposure
Courtine, G. and Pozzo, T.385
- Somatosensory graviception inhibits the soleus H-reflex in standing man – a parabolic flight experiment
Miyoshi, T.; Nozaki, D. et al.387
- Time-variant spectral analysis of heart rate variability during parabolic flight with and without LBNP
Caiani, E.G.; Mainardi, L.T. et al.389
- Dietary treatment enhances bone formation in malnourished patients
Mika, C.; Grzella, I. et al.391
- Effects of L-arginine supplementation on bone metabolism
Kamps, N.; Gerzer, R. et al.393
- Evaluating object distance: implication for space research
Maciel, F. and Clément, G.395
- Endocytosis in tobacco pollen tubes: visualisation and measurement of plasma membrane retrieval during different gravity conditions indicates gravity-dependence of endocytosis
Lisboa, Y.S.; Scherer, G.E.F. et al.397
