|--|-----------|
| Summary/Crynodeb | 3 |
| Acknowledgements..... | 4 |
| List of figures..... | 9 |
| List of tables and boxes | 11 |
| Introduction | 13 |
| Glossary and abbreviations..... | 16 |
| List of organisations..... | 20 |
| PART I WHY MANAGED REALIGNMENT? | 21 |
| 1 What is managed realignment? | 23 |
| 1.1 Aim and purpose of managed realignment..... | 25 |
| 1.2 Drivers leading to managed realignment..... | 26 |
| 1.3 Potential constraints limiting managed realignment opportunities | 32 |
| 1.4 Mechanisms that support managed realignment..... | 35 |
| 1.5 Stakeholder participation | 39 |
| 1.6 Success and failure criteria..... | 41 |
| PART II HOW AND WHERE MANAGED REALIGNMENT CAN BE ACHIEVED | 47 |
| 2 Identifying options for managed realignment | 49 |
| 2.1 Introduction to the planning and design process | 49 |
| 2.2 Site selection criteria..... | 51 |
| 2.3 Baseline geomorphology and hydrodynamics | 52 |
| 2.4 Baseline engineering characteristics | 54 |
| 2.5 Environmental characteristics and assessment..... | 57 |
| 2.6 Economic viability..... | 67 |
| 2.7 Consents, permissions and licences..... | 67 |
| 2.8 Methods of managed realignment..... | 71 |
| 2.9 Timing and timing constraints..... | 74 |
| 3 Information to support evaluation | 77 |
| 3.1 Proportionality..... | 77 |
| 3.2 National R&D and other supporting studies | 77 |
| 4 Communication | 85 |

| | |
|---|------------|
| PART III DESIGNING AND IMPLEMENTING MANAGED REALIGNMENT | 87 |
| 5 Designing and implementing managed realignment..... | 89 |
| 5.1 Physical processes and morphology..... | 89 |
| 5.2 General approaches to assessing physical processes | 92 |
| 5.3 Specific assessment techniques..... | 94 |
| 5.4 Assessment procedure | 119 |
| 5.5 Engineering requirements | 126 |
| 6 Monitoring | 143 |
| 6.1 Reasons for monitoring | 143 |
| 6.2 Principal monitoring techniques..... | 145 |
| 6.3 Maximising the use of monitoring data and information..... | 148 |
| APPENDICES | 151 |
| A1 Monitoring techniques | 153 |
| A1.1 Topographical survey | 153 |
| A1.2 Monitoring hydrodynamics..... | 154 |
| A1.3 Monitoring intertidal accretion and erosion | 158 |
| A1.4 Ground and flood defence investigations..... | 160 |
| A1.5 Ecological monitoring..... | 161 |
| A1.6 Summary of environmental monitoring techniques | 163 |
| A2 Understanding specific landform processes and habitat (re-)creation..... | 165 |
| A2.1 Saltmarshes | 165 |
| A2.2 Intertidal flats | 173 |
| A2.3 Sand dunes | 174 |
| A2.4 Shingle ridges | 178 |
| A2.5 Saline lagoons | 182 |
| A2.6 Intertidal reedbeds | 182 |
| A3 Physical processes and their influence on design..... | 185 |
| A4 Review of scheme implementation, including assessment of physical processes | 189 |
| A4.1 Review of schemes implemented/not implemented | 189 |
| A4.2 Case study experience in assessing physical processes..... | 194 |
| References | 201 |
