

*Proceedings of*

**The 4<sup>th</sup> International Conference on  
Solar Power from Space  
SPS '04**

*Together with*

**The 5<sup>th</sup> International Conference on  
Wireless Power Transmission  
WPT 5**

SUB Göttingen  
216 821 363

7

30 June - 2 July 2004

Granada, Spain

2005 B 12 03

*Organised by  
ESA*

*Co-Sponsored by  
Ministerio de Ciencia y Tecnologia  
Ciemat  
USEF  
CDTI*

*EADS Space Transportation  
DLR*

# CONTENTS

## Keynote Lecture

Terrestrial Solar Power Plants – Current Perspectives and Long Term Visions <i>D. Faiman</i>	ix
---	----

### Session O: SPS – Status Assessment

*Chairpersons: W. Seboldt & F. Ongaro*

Current Status of Study on Hydrogen Production with Space Solar Power Systems (SSPS) <i>M. Mori, H. Kagawa, H. Nagayama &amp; Y. Saito</i>	3
---	---

Space Solar Power System for Terrestrial Power Utilities <i>Y. Kobayashi, T. Saito, K. Ijichi &amp; H. Kanai</i>	11
---	----

Solar Power from Space – Validation of Options for Europe <i>L. Summerer &amp; F. Ongaro</i>	17
---	----

### Session 1: Space and Terrestrial/Planetary Solar Power Plants

*Chairpersons (1a): V. Quintana & M. Mori*

*Chairpersons (1b): A. Dupas & S. Sasaki*

Earth & Space-Based Power Generation Systems – A Comparison Study <i>M. Zerta, V. Blandow, P. Collins, J. Guillet, et al.</i>	29
--	----

Solar Power Satellite System Configured by Formation Flying <i>N. Takeichi, H. Ueno &amp; M. Oda</i>	37
---	----

Solar Power Advanced Research Knowledge (SPARK) - A Computerised Model for Solar Power Satellite Concepts <i>D. Panzieri, M. Leccardi &amp; G.C. Cassisa</i>	45
---	----

### Session 2: Integration of SPS into a Hydrogen Economy and SPS Economics

*Chairpersons: I. Gökalp & P. Collins*

Energy Production from Solar Power Satellites – The Hydrogen Option <i>P. Schmidt, W. Weindorf &amp; M. Zerta</i>	51
--	----

Synergies between Solar Power Supply from Space and Passenger Space Travel <i>P. Collins</i>	59
---	----

Economic Evaluation of Space Solar Power System <i>L. Matsuoka</i>	65
Feasibility of Commercialization of SSPS <i>N. Sakamoto, K. Namura, K. Kawasaki, K. Kito &amp; H. Yoshida</i>	69
Economic Prerequisites for Space Solar Power <i>A. Smith</i>	75
 <b>Session 3: Large Scale Terrestrial Power Supply Scenarios (at PSA-Ciemat)</b> <i>Chairpersons: D. Martinez &amp; K. Kato</i>  	
Terrestrial Solar Thermal Power Plants: On the Verge of Commercialization <i>M. Romero, D. Martinez &amp; E. Zarza</i>	81
Solar Thermal Power Plants with Parabolic-Trough Collectors <i>E. Zarza, L. Valenzuela &amp; J. León</i>	91
Concentrating on Solar Power in a Trans-Mediterranean Renewable Energy Co-Operation <i>F. Trieb, S. Kronshage &amp; G. Knies</i>	99
 <b>Session 4: Wireless Power Transmission</b> <i>Chairpersons: H. Matsumoto &amp; A. Celeste</i>  	
Monolithic and Hybrid Integrated ZB Converter Design <i>J. Zbitou, M. Latrach &amp; S. Toutain</i>	111
Phased Array Technology with Phase and Amplitude Controlled Magnetron for Microwave Power Transmission <i>N. Shinohara &amp; H. Matsumoto</i>	117
Development of Highly Efficient Active Integrated Antenna <i>T. Kimura, K. Yamamoto, T. Nakada &amp; USEF SSPS Study Team</i>	125
Experimental Equipments for Microwave Power Transmission in Kyoto University <i>H. Matsumoto, K. Hashimoto, N. Shinohara &amp; T. Mitani</i>	131
Phase Synchronous System of Separated Units <i>M. Tominaga, K. Morishita, T. Nakada, &amp; USEF SSPS Study Team</i>	139

**Session 5: Power for Space Applications**  
*Chairpersons (a): P. George & H. Brandhorst*  
*Chairpersons (b): R. Dittmann T. Takano*

<p>Proposal of a Viable Commercial Space Infrastructure Scenario          Introducing Robotic Vehicles in an Earth Orbit Environment and          its Interfaces to the SPS-Programme  <i>R. Dittmann &amp; B. Sommer</i></p>	147
<p>Solar Power Satellites for Space Exploration and Applications  <i>C. Cougnet, E. Sein, A. Celeste &amp; L. Summerer</i></p>	151
<p>Consideration of Practical and Logical Steps Towards the GEO SSPS Construction          – Starting from Application of WPT for Unmanned Space Experiment          Vehicle, and Beyond -  <i>K. Ijichi, Y. Kobayashi &amp; K. Hiroshi</i></p>	159
<p>An Approach for Lunar Power – 24/29  <i>F. Little &amp; H. Brandhorst</i></p>	165
<p>Solar Cell Development on the Moon from In-Situ Resources  <i>A. Ignatiev, A. Freundlich &amp; C. Horton</i></p>	173

**Session 6: Near-term demonstrators and experiments**  
*Chairpersons (a): K. Ijichi & H. Brandhorst*  
*Chairpersons (b): L. Summerer & N. Kaya*

<p>High Voltage Solar Concentrator Experiment with Implications          for Future Space Missions - S6a-35  <i>I.S. Mehdi P.J. George, M. O'Neill, R. Matson &amp; A. Borckschmidt,</i></p>	179
<p>Advanced Receiver/Converter Experiments for Laser Wireless Power Transmission  <i>J.T. Howell, M.J. O'Neill &amp; R.L. Fork</i></p>	187
<p>Power Beaming for Space-Based Electricity on Earth: Near-Term Experiments          with Radars, Lasers and Satellites  <i>E. Hoffert, P. Soukup &amp; M. Hoffert</i></p>	195
<p>Wireless Power Transmission Technology Development and Demonstrations  <i>F. Steinsiek, K-H. Weber, W-P. Foth, H.J. Foth &amp; C. Schäfer</i></p>	202
<p>Benefits of International Cooperation in a Low Equatorial Orbit SPS          Pilot Plant Demonstrator Project - S6b-10  <i>H. Matsuoka &amp; P. Collins</i></p>	213

Tethered Solar Power Satellite for the Near-term Demonstration Experiment <i>S. Sasaki</i>	219
A 100 kW-Class Technology Demonstrator for Space Solar Power <i>J. Howell, C. Carrington &amp; G. Day</i>	225
Rocket Experiment on Construction of Huge Transmitting Antenna for the SPS Using Furoshiki Satellite System with Robots <i>N. Kaya, M. Iwashita, S. Nakasuka, L. Summerer &amp; J. Mankins</i>	231
<b>Poster Session</b>	
Experimental Research and Development on Noise Reduction of 2.45GHz CW Magnetron <i>T. Mitani, N. Shinohara, H. Matsumoto, M. Aiga &amp; N. Kuwahara</i>	239
Solar Power Satellite Thermal Control Approach <i>E. Sacchi, G. Cassisa &amp; M. Gottero</i>	245
Wide Band Power Rectenna with High Sensitivity Detection <i>J. Zbitou, M. Latrach &amp; S. Toutain</i>	251
A Study on the Feasibility of Heat Transfer and Transport from Generator/Transmitter Combined Units of Assumed 10MW Space Solar Power System <i>H. Ohta, H. Kawasaki, S. Toyama, M. Mori et al.</i>	257
Simplification of a Microwave Transmission Antenna on Board by Reducing the Fed Elements <i>T. Takano, N. Kamo &amp; A. Sugawara</i>	263
SPS Degradation and Environmental Impact: Effects of Extreme Background Conditions <i>R.S. Dhillon, T.R. Robinson &amp; T.K. Yeoman</i>	269
Geoengineering Vision-Application for Space Solar Power <i>B.J. Eastlund &amp; L.M. Jenkins</i>	275
Influences of Microwave Irradiation on Environment <i>H. Murakami, Y. Abe, T. Iwata, I. Kudo, K. Saito &amp; T. Okuda</i>	281
A Preliminary Case Study for Rectenna Sites in Indonesia <i>Y. Purwanto &amp; P. Collins</i>	287
<b>List of participants</b>	297
