

Anisotropy 2000: Fractures, Converted Waves, and Case Studies

**Proceedings of the Ninth International Workshop
on Seismic Anisotropy (9IWSA)**

Maurycy Pius Rudzki
1862-1916

Edited by L. Ikelle and A. Gangi

Table of Contents

Preface	i
HISTORY OF SEISMIC ANISOTROPY	
The historical roots of seismic anisotropy <i>Helbig, K. and Szaraniec, E.</i>	1
On application of Fermat's principle to anisotropic media <i>Slawinski, M. A.</i>	13
APE MODEL	
Shear-wave splitting in a critical crust: II – compliant, calculable, controllable, fluid-rock interactions <i>Crampin, S. and Chastin, S.</i>	21
CASE STUDIES	
Preliminary evaluation of azimuthal anisotropy over the Valhall field using C-wave data <i>Granger, P., Rollet, A., and Bonnot, J.</i>	49
Anisotropic migration: An offshore Africa case study <i>Berthet, P., Williamson, P., Sexton, P., and Mispel, J.</i>	69
AVO-A, FRACTURES	
AVO-A response of an anisotropic half-space for P-P, P-SV, and P-SH data <i>Ikelle, L. T. and Amundsen, L.</i>	77
Constraining the interpretation of AVOA for fracture characterization <i>Hall, S. A. and Kendall, J.</i>	107
From transverse isotropy to arbitrary anisotropy for qP-waves in weakly anisotropic media <i>Rasolofosaon, P. N. J.</i>	145
Analytical inversion of a stack of weakly anisotropic layers <i>de Bazelaire, C., de Bazelaire, E., and Perroud, H.</i>	163
Discrimination of pore fluids from P and converted shear-wave AVO analysis <i>Liu, E., Li, X., and Queen, J. H.</i>	203
Using P-wave data to distinguish gas from water in fractures <i>MacBeth, C.</i>	223
AVO analysis in finely layered azimuthally anisotropic media <i>Grechka, V.</i>	239

Analysis of anisotropic velocities in a core sample and AVOA from a fractured vuggy carbonate reservoir	257
<i>Hall, S. A., Kendall, R. R., Kendall, J., and Sondergeld, C.</i>	
CONVERTED WAVES	
Multicomponent true amplitude anisotropic imaging	271
<i>Gerea, C., Nicoletis, L., and Granger, P.</i>	
Velocity analysis of converted waves based on the hyperbolic moveout equation: The RTM method	291
<i>Grechka, V. and Tsvankin, I.</i>	
PROCESSING FOR TIV MEDIA	
A synthetic example of anisotropic <i>P</i>-wave processing for a model from the Gulf of Mexico	311
<i>Han, B., Galikeev, T., Grechka, V., Rousseau, J. L., and Tsvankin, I.</i>	
Practical approach to anelliptic time processing	327
<i>Siliqi, R. and Bousquié, N.</i>	
3-D VTI Eikonal solver for efficient acoustic travel time computation	333
<i>Bousquié, N. and Siliqi, R.</i>	
Estimation of local anisotropy using polarisations and travel times from the Oseberg 3-D VSP	339
<i>Williamson, P. and Maocec, E.</i>	
Comparison of $v(\theta)$ equations in TI medium	349
<i>Stopin, A.</i>	
THEORY	
Analytic description of <i>P</i>-wave ray direction and polarization in orthorhombic media	363
<i>Rommel, B. E. and Tsvankin, I.</i>	
A theoretical paradigm for describing hysteresis and nonlinear elasticity in arbitrary anisotropic rocks	383
<i>Helbig, K. and Rasolofosaon, N. J.</i>	
Fourth-order elastic-moduli tensors by inspection	399
<i>Gangi, A. F.</i>	
Caustics in <i>qSV</i> rayfields of transversely isotropic and vertically inhomogeneous media	409
<i>Hanyga, A. and Slawinsky, M. A.</i>	
Phase shifts at caustics in anisotropic media	419
<i>Garmany, J.</i>
