Ancient Floods, Modern Hazards
Principles and Applications of Paleoflood Hydrology

P. Kyle House
Robert H. Webb
Victor R. Baker
Daniel R. Levish
Editors

With accompanying CD-ROM compiled and designed by P. Kyle House and Larry Mayer

CONTENTS

Preface
P. Kyle House, Robert H. Webb, Victor R. Baker, and Daniel R. Levish .............................................................. v

Background

The Scientific and Societal Value of Paleoflood Hydrology
Victor R. Baker, Robert H. Webb, and P. Kyle House ................................................................. 1

Climate Variability and Flood Frequency at Decadal to Millennial Time Scales
Kelly T. Redmond, Yehouda Enzel, P. Kyle House, and Franco Biondi ...................................................... 21

Principles and Methods

Paleoflood Reconstruction on Floodplains Using Geophysical Survey Data and Hydraulic Modeling
Geoff Pickup, Alan Marks, and Mary Bourke ................................................................. 47

Mapping Flood Inundation in Southwestern Arizona Using Landsat TM Data:
A Method for Rapid Regional Flood Assessment Following Large Storms
Larry Mayer and Philip A. Pearthree ................................................................. 61

Dendrochronologic Evidence for the Frequency and Magnitude of Paleofloods
Thomas M. Yanosky and Robert D. Jarrett ................................................................. 77

Reliability of Paleostage Indicators for Paleoflood Studies
Robert D. Jarrett and John F. England, Jr. ................................................................. 91

One-Dimensional Estimation Techniques for Discharges of Paleofloods and Historical Floods
Robert H. Webb and Robert D. Jarrett ................................................................. 111

Robust Determination of Stage and Discharge: An Example From an Extreme Flood
on the Verde River, Arizona
Roger P. Denlinger, D. R. H. O'Connell, and P. Kyle House ...................................................... 127

Initial Motion of Boulders in Bedrock Channels
Paul A. Carling, Mark Hoffmann, and Andrea S. Blatter ................................................................. 147

Bias and Information Content of Paleoflood Data in Flood-Frequency Analysis
J. B. Blainey, R. H. Webb, M. E. Moss, and V. R. Baker ...................................................... 161

Paleohydrologic Bounds—Non-Exceedance Information for Flood Hazard Assessment
Daniel R. Levish ................................................................. 175

Applications

Cosmogenic 3He Ages and Geochemical Discrimination of Lava-Dam Outburst-Flood Deposits
in Western Grand Canyon, Arizona
Cassandra R. Fenton, Robert H. Webb, Thure E. Cerling, Robert J. Poreda, and Barbara P. Nash ...................................................... 191
CONTENTS

Evaluation of Glacial Outburst Flood Hypothesis for the Big Lost River, Idaho
Keith L. Knudsen, Janet M. Sowers, Dean A. Ostenaa, and Daniel R. Levish ................. 217

Watershed Scale and the Stratigraphic Record of Large Floods
J. C. Knox and J. M. Daniels ........................................... 237

Slackwater Deposits as Paleostage Indicators in Canyon Reaches of the Central Appalachians: Reevaluation After the 1996 Cheat River Flood
J. Steven Kite, Terry W. Gebhardt, and Gregory S. Springer .................................. 257

Historical Flood and Paleoflood Chronology of the Lower Verde River, Arizona: Stratigraphic Evidence and Related Uncertainties
P. Kyle House, Philip A. Pearthree, and Jeanne E. Klawon ................................. 267

Paleoflood Hydrology of the Paria River, Southern Utah and Northern Arizona, USA
R. H. Webb, J. B. Blainey, and D. W. Hyndman .................................................... 295

Paleofloods and the Estimation of Long Term Transmission Losses and Recharge to the Lower Nahal Zin Alluvial Aquifer, Negev Desert, Israel
Noam Greenbaum, Uri Schwartz, Asher P. Schick, and Yehouda Enzel .................... 311

Caves and Their Potential Use in Paleoflood Studies
Gregory S. Springer .......................................................... 329

Modeled Paleoflood Hydraulics as a Tool for Interpreting Bedrock Channel Morphology
Ellen Wohl ................................................................. 345

Perspective

The Geology and Geography of Floods
Jim E. O'Connor, Gordon E. Grant, and John E. Costa ........................................ 359
