Contents

Introduction	7
Chapter 1. Preliminaries	15
1.1. List of symbols	15
1.2. Elementary inequalities	16
1.3. Domains with a conical point	18
1.4. The quasi-distance function r_ϵ and its properties	21
1.5. Function spaces	22
1.5.1. Lebesgue spaces	22
1.5.2. Regularization and Approximation by Smooth Functions	23
1.6. Hölder and Sobolev spaces	26
1.6.1. Notations and definitions	26
1.6.2. Sobolev imbedding theorems	28
1.7. Weighted Sobolev spaces	29
1.8. Spaces of Dini continuous functions	32
1.9. Some functional analysis	36
1.10. The Cauchy problem for a differential inequality	37
1.11. Additional auxiliary results	40
1.11.1. Mean Value Theorem	40
1.11.2. Stampacchia's Lemma	40
1.11.3. Other assertions	41
1.11.4. The distance function	43
1.11.5. Extension Lemma	43
1.11.6. Difference quotients	46
1.12. Notes	48
Chapter 2. Integral inequalities	49
2.1. The classical Hardy inequalities	49
2.2. The Poincaré inequality	52
2.3. The Wirtinger inequality: Dirichlet boundary condition	54
2.4. The Wirtinger inequality: Robin boundary condition	55
2.4.1. The eigenvalue problem	55
2.4.2. The Friedrichs-Wirtinger inequality	59

2.5.	Hardy-Friedrichs-Wirtinger type inequalities.....	60
2.5.1.	The Dirichlet boundary condition	60
2.5.2.	The Robin boundary condition	68
2.6.	Other auxiliary integral inequalities for $N = 2$	72
2.7.	Notes	79
Chapter 3.	The Laplace operator	81
3.1.	Dini estimates of the generalized Newtonian potential	81
3.2.	The equation with constant coefficients. Green's function.	92
3.3.	The Laplace operator in weighted Sobolev spaces.....	95
3.4.	Notes	96
Chapter 4.	Strong solutions of the Dirichlet problem for linear equations	97
4.1.	The Dirichlet problem in general domains	97
4.2.	The Dirichlet problem in a conical domain.....	100
4.2.1.	Estimates in weighted Sobolev spaces.....	101
4.2.2.	The power modulus of continuity	124
4.2.3.	L^p -estimates	128
4.2.4.	C^λ -estimates	131
4.2.5.	Examples	138
4.2.6.	Higher regularity results.....	140
4.3.	Smoothness in a Dini-Liapunov region.....	143
4.4.	Unique solvability results.....	155
4.5.	Notes	163
Chapter 5.	The Dirichlet problem for elliptic linear divergent equations in a nonsmooth domain	165
5.1.	The best possible Hölder exponents for weak solutions	165
5.1.1.	Introduction.....	165
5.1.2.	The estimate of the weighted Dirichlet integral	170
5.1.3.	Local bound of a weak solution.....	183
5.1.4.	Example	187
5.1.5.	Hölder continuity of weak solutions.....	188
5.1.6.	Weak solutions of an elliptic inequality	190
5.2.	Dini continuity of the first derivatives of weak solutions... ..	194
5.2.1.	Local Dini continuity near a boundary smooth portion....	194
5.2.2.	Dini-continuity near a conical point.....	198
5.2.3.	Global regularity and solvability.....	209
5.3.	Notes	211

Chapter 6.	The Dirichlet problem for semilinear equations in a conical domain	215
6.1.	The behavior of strong solutions for nondivergent equations near a conical point.....	215
6.1.1.	The weighted integral estimates ($0 < q \leq 1$)	216
6.1.2.	The estimate of the solution modulus ($0 < q \leq 1$).....	220
6.1.3.	The estimate of the solution modulus ($q > 1$).....	225
6.2.	The behavior of weak solutions for divergence equations near a conical point	232
6.3.	Notes	240
Chapter 7.	Strong solutions of the Dirichlet problem for nondivergence quasilinear equations	241
7.1.	The Dirichlet problem in smooth domains	241
7.2.	The estimate of the Nirenberg type	243
7.2.1.	Introduction.....	243
7.2.2.	Formulation of the problem and the main result	244
7.2.3.	The Nirenberg estimate	245
7.2.4.	The behavior of the solution near a corner point (weak smoothness).....	253
7.2.5.	The weighted integral estimate	254
7.2.6.	Proof of Theorem 7.7.....	258
7.3.	Estimates near a conical point.....	263
7.3.1.	Introduction.....	263
7.3.2.	The barrier function	264
7.3.3.	The weak smoothness of solutions	265
7.3.4.	Estimates in weighted spaces	271
7.3.5.	L^p and pointwise estimates of the solution and its gradient	281
7.3.6.	Higher regularity results.....	286
7.4.	Solvability results	292
7.5.	Notes	297
Chapter 8.	Weak solutions of the Dirichlet problem for elliptic quasilinear equations of divergence form	299
8.1.	The Dirichlet problem in general domains	299
8.2.	The m -Laplace operator with an absorption term.....	303
8.2.1.	Introduction.....	303
8.2.2.	Singular functions for the m -Laplace operator and the corresponding eigenvalue problem	304
8.2.3.	Eigenvalue problem for m -Laplacian in a bounded domain on the unit sphere.....	307

8.2.4.	Integral estimates of solutions	314
8.2.5.	Estimates of solutions for singular right hand sides	323
8.3.	Estimates of weak solutions near a conical point	332
8.4.	Integral estimates of second weak derivatives of solutions	337
8.4.1.	Local interior estimates	338
8.4.2.	Local estimates near a boundary smooth portion	349
8.4.3.	The local estimate near a conical point	354
8.5.	Notes	356
Chapter 9.	The boundary value problems for elliptic quasilinear equations with triple degeneration in a domain with boundary edge	359
9.1.	Introduction. Assumptions	359
9.2.	A weak comparison principle. The E. Hopf strong maximum principle	366
9.3.	The boundedness of weak solutions	372
9.4.	The construction of the barrier function	381
9.4.1.	Properties of the function $\Phi(\omega)$	383
9.4.2.	About solutions of (9.1.3) and (9.1.4)	384
9.4.3.	About the solvability of (9.1.3) and (9.1.4) with $a_0 > 0$..	388
9.5.	The estimate of weak solutions in a neighborhood of a boundary edge	394
9.6.	Proof of the main theorem	402
9.7.	Notes	406
Chapter 10.	Sharp estimates of solutions to the Robin boundary value problem for elliptic non divergence second order equations in a neighborhood of the conical point	407
10.1.	The linear problem	408
10.1.1.	Formulation of the main result	408
10.1.2.	The Lieberman global and local maximum principle. The comparison principle	411
10.1.3.	The barrier function. The preliminary estimate of the solution modulus	415
10.1.4.	Global integral weighted estimate	420
10.1.5.	Local integral weighted estimates	443
10.1.6.	The power modulus of continuity at the conical point for strong solutions	452
10.1.7.	Examples	454
10.2.	The quasilinear problem	458
10.2.1.	Introduction	458
10.2.2.	Weak smoothness of the strong solution	461

10.2.3.	Integral weighted estimates	469
10.2.4.	The power modulus of continuity at the conical point for strong solutions	488
10.3.	Notes	494
