INTRODUCTION	1
PART 1 PLANNING AND GOVERNMENT	5
1 The nature of planning	6
The character of planning	6
Planning theory and rationality	8
The practice of planning	8
Sectoral and comprehensive planning	9
Interest groups	10
Local interest groups	12
Advocacy planning	12
Planning vs implementation	14
Incrementalism	16
Local vs central control	17
Underlying attitudes to land and property	18
Private and public planning processes	19
The elements of the planning process	20
Citizen participation	21
Geographic information systems	23
2 Urbanization	27
A culture of mobility	27
Three centuries of urban growth	27
Town development	30
Transportation for commuters	31
Public policies and suburbanization	32

Decentralization	36
Current trends	39
<i>The role of government in urbanization</i>	41
3 Governing and planning urban areas	44
Basic needs for government	44
Privatism	45
The growth of public powers	46
Machine politics	46
<i>The reform movement</i>	46
Parks	47
<i>The City Beautiful</i>	48
Municipal reform	50
Reform and the planning function	51
<i>The gridiron plan</i>	54
City planning as an exact science	55
Regional planning	56
PART 2 LAND USE REGULATION	63
4 The evolution of zoning	64
The need for property protection	64
Early land use controls	65
Immigration and urbanization	67
The movement for planning	67
The New York zoning ordinance of 1916	67
The Standard State Zoning Enabling Act	70
The <i>Euclid</i> case	71
<i>The narrowness of zoning</i>	73
5 The institutional and legal framework	75
Planning and zoning	75
Zoning as a local matter	78
The local managers of zoning	79
The constitutional framework	82
The role of the courts	84
Subdivision controls	86
6 The techniques of zoning	89
The traditional techniques of zoning	89
The single family zone: what is a family?	90
Group homes	91
The single family house: should there be a minimum size?	92
Large lot zoning: maintaining community character	93
Floor area ratio	93

Apartments and mobile homes	93
Conditional uses	94
Variances	95
Spot zoning	99
Floating zone	99
Downzoning	100
Contract zoning and site plan review	100
Cluster zoning and planned unit development	101
Non-conforming uses	102
Zoning amendments	103
Special district zoning	104
Overlay zones	105
Exclusionary zoning	106
Conclusion	107
7 Development charges	109
Paying for the costs of development	109
Impact fees	111
The rational nexus	112
The incidence of charges	113
Existing vs new home owners	113
Linkages	114
Incentive zoning in New York	115
The negotiation syndrome	117
The dangers of bonusing	118
Purposes of bonusing	119
Development agreements	121
In conclusion	122
PART 3 QUALITY OF THE ENVIRONMENT	125
8 Aesthetics	126
Regulating aesthetics	126
Billboards	127
Rural signs	130
Urban signs	132
Architectural design review	133
New urbanism	138
9 Historic preservation	140
Preservation and profit	140
The early days of heritage preservation	141
<i>With Heritage So Rich</i> and subsequent legislation	142
The National Register of Historic Places	142
Statewide comprehensive historic preservation planning	142

Highways and historic preservation	146
The National Environmental Policy Act	146
Economics of historic preservation	147
State and local programs	148
Historic preservation and tourism	150
The widening scope of historic preservation	151
PART 4 GROWTH MANAGEMENT	153
10 Growth management and local government	154
Attitudes to growth	154
The Ramapo growth control program	155
The Petaluma quota plan	156
Other growth control programs	158
Growth management and infrastructure	158
Initiatives in Boulder	159
Safeguarding agricultural land	160
Smart growth	163
Direct democracy devices and growth management	165
Conclusion	165
11 Urban growth management and the states	168
Urban growth problems	168
Hawaii	169
Oregon	170
Vermont	173
Florida	175
California	178
New Jersey	182
Conclusion	184
PART 5 DEVELOPMENT ISSUES	189
12 Transportation	190
The centrality of transportation	190
The arithmetic of transportation	190
Telecommuting	191
Suburbanization and transportation	192
Traffic restraint through land use planning	193
Transit-oriented development	194
Traffic calming	198
Increasing the supply of road space	199
Downs' principle of 'triple convergence'	200
Transport demand management	200
Parking policies	200

TDM programs	201
Congestion charges	202
Congestion charging and equity	204
The Intermodal Surface Transportation Efficiency Act 1991	205
Transportation Equity Act for the Twenty-First Century	208
Conclusions and uncertainties	209
13 Housing	212
The complex of housing	212
Housing market theories	213
Low-income housing	215
Housing trust funds	216
Public housing and urban renewal	216
Alternatives to public housing	219
Housing subsidies	220
Accessory dwelling units	223
Affordable housing and growth management	224
Regional housing needs: the case of <i>Mount Laurel</i>	225
The New Jersey Fair Housing Act	226
Housing measures in other states	227
The Federal Fair Housing Act	228
Inclusionary zoning	228
Conclusion	230
14 Community and economic development	233
Changing perspectives	233
The War on Poverty	234
The model cities program	234
The new federalism	235
Community Development Block Grants	236
Carter's new partnership	237
National agenda for the 1980s: urban America	238
The Reagan years	239
Economic development policies	240
Enterprise zones	241
Community development	244
Faith-based organizations	248
Support for social change	249
Additional opportunities	249
PART 6 ENVIRONMENTAL PLANNING	253
15 Environmental policies	254
ENVIRONMENTAL CONCERNS	254
Environmental awareness	254

The first Earth Day	255
The Reagan years	257
Beyond Reagan	257
THE NATIONAL ENVIRONMENTAL PROTECTION ACT	258
Environmental control of federal programs	258
Federal organization for NEPA	259
The environmental review process	260
CLEAN AIR	263
Technics and politics	263
Early clean air policies	264
Pollution and economic development	264
The structure of clean air controls	265
Acid rain	265
Ozone	267
State implementation plans	267
Areas of severe pollution	268
Vehicle emissions	268
The 1990 Act and its future	269
CLEAN WATER	270
The succession of professional approaches	270
Federal water policy	271
Water quality standards	272
Municipal treatment plants	272
Nonpoint pollution	273
Groundwater pollution	273
Safe drinking water	274
The limits of the regulatory approach	274
WASTE	275
The nature of waste	275
Hazardous waste	277
Love Canal	277
Superfund legislation	278
Liability and compensation	280
Toxic substances and pesticides	281
Nuclear waste	282
OTHER ENVIRONMENTAL CONCERNS	283
Coastal zone management	283
Endangered species	283
16 The limits of environmental policy	287
Introduction	287
Technocratic policy	288

Values and risks	290
Perceptions of risk	290
Risk and equity	291
The Pollution Prevention Act 1990	295
Balancing costs and benefits	295
Economic analysis	296
Economic incentives in environmental regulation	297
The range of economic instruments	297
Emissions trading	298
The right to know	300
Public participation	301
The progress of environmental policies	302
CONCLUSION	307
17 Some final questions	308
Determining the questions	308
Property rights – ‘wise use’	310
Beyond localism	311
Local acceptance of unwanted land uses	312
Unwanted neighbors	313
The role for the states	317
Public participation and public confidence	319
In conclusion	320
<i>List of main cases</i>	323
<i>References</i>	324
<i>Index</i>	345
