

# **Tall Buildings: 2000 and Beyond**

**Council on Tall Buildings  
and Urban Habitat**

**Lynn S. Beedle, Editor-in-Chief  
Dolores B. Rice, Associate Editor**

# Contents

<b>Foreword</b>	xxi
<b>Preface</b>	xxv
<b>Contributors</b>	xxix

## **Planning and Environmental Criteria**

Introductory Review	1
<b>Bill Lim</b>	
Architecture	
<b>Integration of Structural Form and Esthetics     in Tall Building Design: The Future Challenge</b>	3
Mir M. Ali	
<b>Symbols of Dream in the Realm of Systems and     Reality</b>	13
Richard Keating	
<b>The Tall Building</b>	17
Eugene Kohn	
Urban Planning and Design	
<b>The Expressive Role of the Tall Building in     Hong Kong</b>	37
Peter Cookson Smith	
<b>The Concept of A Vertical Composite Urban     Community, Sky City 1000</b>	57
Takashi Hara, Yoshiteru Iwasa, and Masato Ujigawa	
<b>Influence of Growth Control on High-Rise Design</b>	67
Jeffrey Heller	

## Parking

- Humanization of Parking Structures** 83  
Richard C. Rich

## Social Effects of The Environment

- A Living Environment for 2.5 Million People** 93  
D. R. Messling

## Interior Design

- New Spaces for a New Century** 101  
Moira M. Moser

## Development and Management

- Introductory Review** 113  
C. Nicholas Brooke  
William R. Code

## Economics

- The Economic Foundations of the Skyscraper** 117  
William R. Code

## Ownership and Maintenance

- Designing User Friendly Tall Buildings** 127  
Elia M. Sterling

## Project Management

- Project Management of Tall Buildings: The  
British Experience** 135  
John R. Lerche

## Tall Buildings in Developing Countries

- Tall Buildings in Developing Countries** 155  
Anil Chotmarada

## Decision-Making Parameters

- Old Culture - New Problems** 161  
Sabah Al-Rayes
- A Reflectively Complex Ultra-Tall Skyscraper** 167  
Pao-Chi Chang and Alfred Swenson
- The Humanization of Tall Buildings** 185  
Gregory J. Crone

**Systems and Concepts**

- Introductory Review** 199  
Irwin Cantor

## Structural Systems

- Premature Deterioration of Building Enclosures  
in High-Rise Structures** 201  
M. S. Cheung and Jabbar Khan
- Link Design in Eccentrically Braced Frames** 215  
A. Ghobarah and T. Ramadan
- Interconnected Groups of Tall Buildings with  
Diversified Spatial Forms** 231  
Marek W. Kwiecinski and Adam Z. Pawlowski
- Advances in Structural Concepts for Tall Buildings  
in Australia** 241  
Owen Martin and John Peyton
- Wind Resisting Structural Systems for Tall Buildings** 257  
Alex Wargon and Andrew Davids

## Construction Systems

- Exportation of the Construction Process** 273  
Harold Schiff

## Foundation Design

- High-Rise Office and Condominium Built on Soft Ground** 279  
Shigetaka Abe

## Cladding

- Innovative Tall-Building Design: An Integration of Materials and Systems from Other Design Disciplines** 293  
Bruce Bassler

- Design Aspects for Curtain Walls of High-Rise Buildings** 307  
Fritz Gartner

- Effect of Precast Concrete Cladding on the Behaviour of Tall Buildings** 317  
Bryan Stafford Smith and Regina Gaiotti

## Application of Systems Methodology

- Intelligent Systems for Tall Buildings** 333  
John F. Brotchie, Jurgen Ehmke, and Ron Sharpe

- Role of Modular Expert Systems in Planning, Analysis and Design of Large Structural Systems** 345  
H. Y. Fang, G. K. Mikroudis, R. C. Chaney, and E. Nothelfer

## Prefabricated Tall Buildings

- Open Mixed Concrete Construction System: PREMO** 357  
Pavel Cizek

- Polish Experience in Prefabricated Multistory Buildings** 365  
Ryszard Kowalczyk and Wieslaw Rokicki

## Robots and Tall Buildings

- Automation and Robotics in Building  
Construction in Japan** 377  
Seishi Suzuki, Tetsuji Yoshida, and  
Takatoshi Ueno

## Tall Buildings Using Local Technology

- High-Rise Buildings with Local Technology** 391  
Yona Friedman

## Affordable Housing

- The Construction Simulation of High-Rise Buildings** 397  
Michael Coffey

## Building Service Systems

- Introductory Review** 409  
Donald E. Ross

## Vertical and Horizontal Transportation

- Recent High-Speed Elevators** 411  
Hiroshi Kamaike

## Heating, Ventilating and Air Conditioning/Energy Conservation

- The Architectural Design of Air-Conditioned  
Buildings** 427  
Baizhan Li, Shengyuan Tian, Runming Yao,  
and Chuanhao Shu

- Tall Buildings...Low (Energy) Budgets** 439  
Charl E. Janeke

- Evolving Design Considerations for Tall Buildings  
in the 1990s** 465  
Donald E. Ross

<b>Hi-Rise HVAC for the 21st Century</b> Robert T. Tamblyn	481
Plumbing and Fire Protection	
<b>Bank of China: Fire Safety</b> William A. Webb	489
Environmental Design	
<b>Tall Building Trends in New Zealand's City of Sails</b> Richard M. Aynsley	497
High-Tech Buildings	
<b>Personal Office Environments - Advanced Office Design</b> Ronald J. Caffrey	505
<b>Criteria and Loading</b>	
<b>Introductory Review</b> Ben Kato	529
Earthquake Loading and Response	
<b>Automatic Energy-Conserved Control and Benefit of Super-Flexible Tall Structures</b> Jie Min Huang, Zhi Hui Cheng, and Yi Huang	533
<b>Ultimate Strength and Ductility of Low-Yield-Ratio High-Strength Steel Beams</b> Tetsuro Inoue and Hitoshi Kuwamura	547
<b>Experimental Study on Active Variable Stiffness System: Active Seismic Response Controlled Structure</b> Takuji Kobori, Motoichi Takahashi, Tadashi Nasu, Narito Kurata, Junichi Hirai, and Katsura Ogasawara	561

<b>Study on Joint Damper System: Passive Seismic Response Controlled Structure</b>	573
Takuji Kobori, Mitsuo Sakamoto, Toshikazu Yamada, Yasuo Takenaka, Isao Nishimura, Kohji Ishii, Jun Tagami, and Yoshikazu Maeda	
<b>Study on Active Mass Driver System (Part 1) - Active Seismic Response Controlled Structure</b>	587
Takuji Kobori, Mitsui Sakamoto, Toshikazu Yamada, Katsuyasu Sasaki, Yoshiki Ikeda, Koji Ishii, and Jun Tagami	
<b>Study on Active Mass Driver System (Part 2) - Active Seismic Response Controlled Structure</b>	603
Takuji Kobori, Norihide Koshika, Kazuhiko Yamada, Katsuyasu Sasaki, Yoshiki Ikeda, Satoshi Orui, Masayoki Nagano, Katsuya Igarashi, and Satoshi Kan	
<b>Random Response and Dynamic Reliability of Asymmetric Buildings Due to Multi-Dimensional Earthquake Excitations</b>	617
Hongnan Li	
<b>Seismic Concerns for New Buildings</b>	
<b>Inelastic Response of Frame Tube Structures Subjected to Bidirectional Ground Excitation</b>	629
Bassam A. Halabieh and W. K. Tso	
<b>Supplemental Damping for Improved Seismic Performance of Tall Buildings</b>	645
Robert D. Hanson	
<b>HISTAR: A New Generation of Rolled Sections for Economical Steel Construction</b>	665
Emile Reuter	
<b>Seismic Concerns for Existing Buildings</b>	
<b>Study of Earthquake Records From Select Tall Buildings</b>	671
M. Celebi and E. Safak	

## Wind Loading and Wind Effects

- The Impact of Modulated Feedback on Design Criteria in a Non-Linear Environment** 693  
Alan P. Jeary
- Experimental Studies on Behavior of Wind Forces and Wind Induced Vibration of the Landmark Tower** 713  
Osamu Nakamura, Takeshi Ohkuma, and Shinji Yamazaki
- The Effect of Facade Features on the Wind Pressure Distribution on Buildings** 735  
A. W. Rofail and K. C. S. Kwok
- The Effect of Passive Damping Devices on Wind-Induced Response of Tall Buildings** 751  
Y. L. Xu, B. Samali, and K. C. S. Kwok
- Wind Resistant Design of Landmark Tower** 767  
Shinji Yamazaki, Shoji Sawada, Hidenori Tsukatani and Shuhei Yamada

## Structural Safety and Quality Assurance

- Future Impact of ASCE Quality Manual on Construction** 783  
Jerome S. B. Iffland

## Natural Disasters

- Proposals for the IDNDR by Japanese Scientists** 795  
Kenzo Toki

## Motion Perception and Tolerance

- Statistical Analysis of Tall Building Motion Induced by Winds** 805  
Takeshi Goto

- An Experimental Study on the Relationship Between Motion and Habitability in a Tall Residential Building** 817  
 Takeshi Goto, Yoshiteru Iwasa, and Hitoshi Tsurumaki

## **Tall Steel Buildings**

- Introductory Review** 831  
 Jerome S. B. Iffland  
 Leo Finzi
- Methods of Analysis and Design**
- Structural Design and Analysis of New Tokyo City Hall Tower** 833  
 Morihiro Adachi and Masayuki Nagata
- Optimum Design and Control of Tall Buildings** 845  
 F. Y. Cheng
- Stability**
- Sizing Techniques for Lateral Systems in Multi-Story Steel Buildings** 857  
 William F. Baker
- The "Torre Nord" High-Rise Building in Genoa** 869  
 Leo Finzi and Edoardo Nova
- Stability of Outrigger Braced Tall Buildings** 881  
 A. Rutenberg and M. Eisenberger
- Design Methods Based on Stiffness**
- Sources of Elastic Deformation in Laterally Loaded Steel Frame and Tube Structures** 893  
 Finley A. Charney
- Earthquake and Wind Induced Vibration Control Technology Towards the Super High-Rise Building** 917  
 Takuji Kobori

Fatigue Assessment and Ductility Assurance	
<b>European Approach to Seismic Design of Steel Structures</b>	935
Giulio Ballio	
Load and Resistance Factor Design	
<b>Serviceability Criteria for Composite Beams</b>	947
Roberto T. Leon	
Cold-Formed Steel	
<b>Applications of Cold-Formed Steel in Tall Buildings</b>	963
Wei-Wen Yu	
Mixed Construction	
<b>Concrete Core-Braced Systems</b>	979
Hal Iyengar	
<b>Connections Behavior and Application of Semi-Rigid Connections</b>	991
Le-Wu Lu	
 <b>Tall Concrete and Masonry Buildings</b>	
 Introductory Review	
W. Gene Corley	1005
Sven Sahlin	
Commentary on Structural Standards	
<b>Structural Standards for Tall Concrete and Masonry Buildings in the Next Century</b>	1007
William Gene Corley	
Optimization	
<b>Practical Optimisation of Framed Structures Using Virtual Work Principles</b>	1019
Graeme Forrest-Brown and Bijan Samali	

## Elastic Analysis

- Analysis for Structural Design** 1031  
Alex Coull

- The Curtailed Wall-Frame Structure: An Approximate Solution** 1049  
Bryan Stafford Smith and Marie-Jose Nollet

## Cast-in-Place Concrete

- Experimental Study on a 33-Story Reinforced Concrete Building** 1065  
Masaki Kojima

- High Performance Concrete for Tall Buildings in Chicago: Past, Present and Future** 1077  
Jaime Moreno

## Precast Panel Structures

- Torsional Effects on the Behavior of Multi-Storey Precast Structures with Superimposed RC Blocks** 1087  
Sandro Santorelli and Claudio DeNatale

## Non-Linear Analysis and Limit Design

- Non-linear Behavior of Coupled Shear Walls in Tall Buildings** 1105  
Aldo Cauvin

- Seismic Design of a 41-Story Reinforced Concrete Tube Structure** 1123  
Sadaki Yagi, Kenzoh Yoshioka, Hiroaki Eto and Katsuhisa Nishimura

## Stability

- Stability of Reinforced Concrete Building Frames** 1139  
J. G. MacGregor

Masonry Structures	
<b>Masonry Tall Buildings of the Future</b> Sven Sahlin	1149
