<i>About the Authors</i>	279

LIST OF TABLES AND FIGURES

Table 1.1. Basic Demographic and Economic Indicators for Poland, 1946–2000	21
Table 1.2. Research Topics and Types of Data Used in This Book	31
Table 3.1. Distribution of the Population According to Social Class, 1988	53
Table 3.2. Distribution of the Population According to Social Class, 1998	53
Table 3.3. Mean Values of Formal Education, Occupational Rank, and Job Earnings Among Entrepreneurs and All Working People, 1978–1998	56
Table 3.4. Correlation Between Formal Education, Occupational Rank, and Job Earnings, 1978–1998	59
Table 3.5. Principal Components Analysis of Formal Education, Occupational Rank, and Job Income, 1978–1998	60
Table 3.6. Mean Values of Status (Stratification Position) and Its Components for the Entrepreneurial Class and Other Social Classes in Poland, 1978 and 1988	62
Table 3.7. Mean Values of Status (Stratification Position) and Its Components for the Entrepreneurial Class and Other Social Classes in Poland, 1993 and 1998	64
Table 3.8. Mean Values Status Inconsistency (Nonvertical Dimension of Stratification) for the Entrepreneurial Class and Other Social Classes in Poland, 1988 and 1998	65
Table 3.9. Class Origin of Entrepreneurs and Labor Force Controllers, 1998	67
Table 3.10. Social Profile of Entrepreneurs as Compared to Labor Force Controllers, 1998	69

Table 3.11. Mean Values of Status (Stratification Position) and Status Inconsistency (Nonvertical Dimension of Stratification) for the Entrepreneurial Class and Other Social Classes in Poland, Hungary, and the Czech Republic, 1993	70
Table 4.1. Relationship Between Access to Mobility Channels and Entrepreneurial Legitimacy	75
Table 4.2. Schema for Pooling Data for Five Historical Periods, 1949–1958, 1959–1968, 1969–1978, 1979–1988, and 1989–1993	78
Table 4.3. Compositional and Relative Characteristics of Entrepreneurs Starting Their Business for Five Historical Periods, 1949–1993	80
Table 4.4. Logistic Regression of Being an Entrepreneur on Social Origin, Education, and Communist Party Membership, Controlling for Gender and Age, for Five Historical Periods, 1949–1993	82
Table 6.1. Logistic Regression of Being an Employer and Self-Employed on Gender and Age, 1993	106
Table 6.2. The Effects of Motivational Traits, Measured in 1988, on Becoming an Entrepreneur in 1989–1993	108
Table 6.3. Indicators of Family Background, Human and Cultural Capital, Political and Organizational Activity, and Economic Assets: Mean Values and Associations with Being an Actual Entrepreneur, 1993	111
Table 6.4. Logistic Regression of Being an Actual Entrepreneur on Family Business History, Anti-Trade Unionism, Financial and Material Resources, and Control Variables, Poland, 1993	112
Table 6.5. The Impact of Regional Density of Banks and Transport/Communication Facilities on the Probability of Being an Entrepreneur, 1993	114
Table 6.6. Logistic Regression of Entrance into Entrepreneurship on Anticipated Income from a Private Business Activity and a Set of Other Variables, 1988–1998	119
Table 6.7. Logistic Regression of Entrance into Entrepreneurship on Managerial Position and Communist Party Membership, Controlling for Other Variables, 1993	122
Table 7.1. Measurement Model of Intellectual (Ideational) Flexibility (MIF), for Entrepreneurs and the Total Population, 1992 and 1978	129
Table 7.2. Intellectual (Ideational) Flexibility (MIF), Among Entrepreneurs as Compared to Other Social Classes, 1992 and 1978	130
Table 7.3. The Effect of Intellectual (Ideational) Flexibility (ADM), Measured in 1993, on the Chances of Becoming an Entrepreneur in 1993–1998	132
Table 7.4. Psychological Profile of Entrepreneurs as Compared to Manual Workers, 1992	134
Table 7.5. Measurement of Self-direction and Self-reliance for Entrepreneurs and the Total Population, 1992	136

Table 7.6. The Level of Self-direction and Self-reliance for the Entrepreneurial Class and Selected Other Social Classes, 1992	137
Table 8.1. Support for Privatization Among Basic Groups According to Gender, Age, Formal Education, Occupational Rank, and Household Income	148
Table 8.2. Regression of Support for Privatization on Gender, Age, Formal Education, Occupational Rank, and Household Income	150
Table 8.3. Support for Privatization Among Political Families	151
Table 8.4. Regression of Support for Privatization on Gender, Age, Formal Education, Occupational Rank, Household Income, and Political Orientation	153
Table 8.5. Family Background, Human and Cultural Capital, Political Activity, and Economic Assets Among Actual and Potential Entrepreneurs	156
Table 8.6. Entrepreneurial Inclination Among Political Families	157
Table 8.7. Logistic Regression of Entrepreneurial Inclination on Gender, Age, Formal Education, Occupational Rank, Household Income, and Political Orientation	158
Table 8.8. Multinomial Logistic Regression of Being a Potential Entrepreneur and an Actual Entrepreneur on Social Stratification, Psychological, and Control Variables, Poland, 1992	159
Table 8.9. Logistic Regression of Establishing a New Business in 1993–1998 on Gender, Age, Support for Privatization, and Entrepreneurial Inclination	161
Table 9.1. Measurement Model of Democratic Values for Entrepreneurs and the Total Population, 1998	169
Table 9.2. Support for Democratic Values Among Entrepreneurs as Compared to Other Social Classes and Nonclass Categories, 1998	171
Table 9.3. Regression of the Scale of Democratic Values on Gender, Age, Education, and Income Among Entrepreneurs and Total Population, 1998	172
Table 9.4. Measurement Model of Capitalist Values for Entrepreneurs and the Total Population, 1998	176
Table 9.5. Support for Capitalist Values Among Entrepreneurs as Compared to Other Social Classes and Nonclass Categories, 1998	177
Table 9.6. Regression of the Scale of Capitalist Values on Gender, Age, Education, and Income Among Entrepreneurs and the Total Population, 1998	178
Table 9.7. Regression of Voting Behavior on Entrepreneurial Class and Other Selected Social Classes, Controlling for Gender and Age, 1988–1993 and 1993–1998	181
Table 9.8. Party Voting Among Entrepreneurs and Other Social Classes, 1997	182

Table 9.9. Regression of Membership in Political Organizations on Entrepreneurial Class and Other Social Classes, Controlling for Gender and Age, 1993–1998	183
Table 9.10. Support for Poland's Joining the European Union Among Entrepreneurs and Other Selected Social Classes, 1998	185
Table 9.11. Logistic Regression of Support for Poland's Joining the European Union on Entrepreneurs and Other Selected Social Classes, Controlling for Gender, Age, and Party Preferences, 1998	187
Table 10.1. Logistic Regression of Business Failure on an Experience of Pre-Entrepreneurial Unemployment and a Motivation Condition, 1988–1998	193
Table 10.2. Confidence in Banks Among Entrepreneurs and All Working People, 1992–1998	200
Table 11.1. Ranking of Entrepreneurial Organizations According to Prestige, Responsiveness to Practical Problems, and Visibility	215
Table 11.2. Characteristics Attributed to Entrepreneurs in Press Articles, Advisory Web Pages, and Public Opinion Responses	219
Table A.1. Data Sets from National Surveys Used in This Book	235
Table D.1. Logistic Regression of Being an Actual Entrepreneur on Family Background, Human and Cultural Capital, Political and Organizational Activity, Economic Assets, and Control Variables, Poland, 1993	247
Figure 6.1. A Simplified Model of the Determinants of Entry into Entrepreneurship	114
