

QUANTITATIVE PLANNING AND CONTROL

**Essays in Honor of William Wager Cooper
on the Occasion of His 65th Birthday**

Edited by

YUJI IJIRI

Graduate School of Industrial Administration
Carnegie-Mellon University
Pittsburgh, Pennsylvania

ANDREW B. WHINSTON

Graduate School of Industrial Administration
Purdue University
West Lafayette, Indiana

ACADEMIC PRESS New York San Francisco London 1979
A Subsidiary of Harcourt Brace Jovanovich, Publishers

Contents

<i>List of Contributors</i>	xi
<i>Preface</i>	xiii
<i>A Yankee from Chicago</i> Herbert A. Simon	xvii
<i>Adventures in Invention</i> A. Charnes	xxv
<i>The Great Teacher</i> Andrew C. Stedry	xxix

Part I MATHEMATICAL PROGRAMMING AND DECISION MODELS

1. Gradient States for Some Dualities with the C^2 Extremal Principle

A. Charnes and L. Seiford

Introduction	3
1. The C^2 Extremal Principle	4
2. Gradient Characterization of Some Convex Function Infima	5
3. Conclusions	8
References	8

2. Branch and Round: An Enumerative Algorithm for Integer Programs

R. D. Young

1. Introduction and Summary	9
2. The Rudimentary Branch and Round Algorithm	10
3. The Linear Programming Problem	13
4. Multiple Optimal Solutions for the Linear Programming Problem	16
5. A Variation of the Rudimentary Algorithm: Cuts, Sequential Branching, and Partitioning	18
6. Comments	21
References	22

3. A Minimax Procedure for a Class of Stochastic Programs

R. Jagannathan

1. Some Preliminary Results	24
2. Two-Stage Stochastic Programming	29
3. Simple Recourse Model with Nonlinear Penalty Functions	30
4. An Illustrative Example	34
References	34

4. A Linguistic Model for 3-D Constructions

Chris I. Yessios

1. Introduction	37
2. Overview and Initial Definitions	39
3. Primitives	40
4. Reference Points and P-Functions	44
5. Transforming Functions	46
6. Sculpting Functions	47
7. Composition Operators	49
8. Iterations	53
9. Concluding Remarks	57
References	57

5. Decision-Making with Multiple Objectives—Some Analytic Approaches

Jyrki Wallenius and Stanley Zionts

Introduction	59
1. A Myth of Management Decision-Making	60
2. The Decision Framework	61
3. Explicitly Defined Constraints	63
4. Choosing the Best of a Set of Alternatives	66
5. Conclusion	68
References	68

Part II ECONOMIC AND FIRM GROWTH

6. Economic Development on a Distant Planet 71

Myron J. Gordon

References	76
------------	----

7. A Linear Programming Approach to Agricultural Land Use Policy in India

M. R. Rao and N. V. Ratnam

1. Introduction	77
2. Formulation of the Problem	78
3. Extensions	82
4. Computational Results	87
References	102

8. Time Preference, Firm Growth, and Programming Models

Ferdinand K. Levy and Jerome D. Wiest

Introduction	103
1. A Simple One Period Model	105
2. Growth of the Firm	106
3. Summary	109
References	109

9. Inflation and the Capital Budgeting Decision

Bertil Näslund

1. Introduction	111
2. Some Basic Relations	111
3. The Effects of Inflation on Demand	113
4. The Rate of Interest	115
5. The Effects of Inflation on Costs	117
6. Some Other Effects of Inflation on the Capital Budgeting Decision	118
7. Conclusions	120
Appendix	121
References	121

Part III MANPOWER PLANNING AND DESIGN

10. A Network Transshipment Model for Manpower Planning and Design

Gerald L. Thompson

1. Introduction	125
2. The Model	126
3. An Example	130
4. Dual Variable Analysis	132
5. Effectiveness versus Cost Tradeoff Analysis	136

6. Career Analysis	137
7. Conclusions	139
References	140
11. A Study of Alternative Relaxation Approaches for a Manpower Planning Problem	
<i>F. Glover, D. Karney, and D. Klingman</i>	
1. Introduction	141
2. Problem Relaxation	146
3. Relaxations and Primal Strategies	149
4. Alternative Strategies Tested	150
5. Conclusions	162
References	163
12. A Demographic Turnpike for Long-Range Manpower Planning in Developing Economies	
<i>Arie P. Schinnar</i>	
1. Introduction	165
2. Definition of Labor Demand and Supply	167
3. Model Development	169
4. A Closed Demographic Turnpike	172
5. An Open Demographic Turnpike	175
6. Planning Policy Implementations	178
References	181
13. Aspects of Control for the Organization Design and Manpower Planning Functions	
<i>Kathy A. Lewis</i>	
1. Introduction	185
2. Monitoring Organizational Change in Terms of the Manpower Planning Function	189
3. Indices of Change in Manpower Systems	194
4. Numerical Example	197
5. Conclusion	205
References	205
14. Manpower Goals Planning and Accountability	
<i>R. J. Niehaus and D. Nitterhouse</i>	
1. Introduction	207
2. Manpower Analyses and Planning	208
3. Accountability and Control	211
4. Integrated Systems	219

5. Conclusion	224
References	226

Part IV ACCOUNTING AND CONTROL

15. Dynamic Break-Even and Trade-Off Analysis under Transient Cost Behavior

Takehiko Matsuda

1. Introduction	231
2. Transient Cost Behavior through Aggregate Learning	231
3. Technical and Institutional Considerations	235
4. Specification and Estimation of Technological Structure of Production	236
5. Empirical Construction of Cost Surface	241
6. Transient Behavior of the Model	244
7. Dynamic Break-Even Analysis	248
8. Dynamic Trade-Off Analysis	252
9. Conclusions: Finding and Further Policy Implications	255
References	256

16. Convergence of Cash Recovery Rate

Yuji Ijiri

1. Introduction	259
2. The Economic Significance of Convergence	260
3. Convergence of Recovery Rate	262
4. The General Case	265
References	267

17. A Theoretical Basis for Inflation Accounting

Vicente Salas and Andrew B. Whinston

1. Introduction	269
2. Theoretical Model	271
3. Extensions to the Computation of Replacement Cost Indices	277
4. Summary and Conclusions	286
Appendix. The Constant Elasticity of Transformation and Substitution (CET-CES) Production Function	288
References	290

18. Accounting Disclosures for User Decision Processes

Ray G. Stephens

1. Introduction	291
2. Research Design	293

3. Empirical Study Problems	294
4. Research Participants and Collection of Protocols	297
5. Loan Officer B and Preparation of Supplements	298
6. Results	298
7. Conclusions	305
References	308
19. An Examination of Alternative Forms of Regulatory Mechanisms: The Case of the Health Care Industry	
<i>V. Govindarajan and Anil K. Gupta</i>	
1. Introduction	311
2. Background	312
3. An Examination of the Need for Regulation of the Health Care Industry	313
4. Alternative Forms of Regulatory Mechanisms	316
5. A Framework for Evaluating Alternative Regulatory Mechanisms	318
6. A Case for Self-Regulation	320
7. Conclusions	326
Appendix A	327
Appendix B	327
References	328
Appendix Bibliography of the Works of William Wager Cooper	
Books and Monographs	329
Articles and Reviews	330
