Wei-Bin Zhang

A Theory of International Trade

Capital, Knowledge, and Economic Structures

Springer

Contents

1 Introduction 1
1.1 The Ricardian Trade Theory 1
1.2 The Neoclassical Theory 4
1.3 The Heckscher-Ohlin Theory 7
1.4 Trade Theory with Capital Accumulation 9
1.5 Trade with Non-Constant Returns to Scale 11
1.6 Trade Theory with Endogenous Technology 14
1.7 The Structure of the Book 17

2 Global Growth and Trade Patterns 23
2.1 The Trade Model with Capital Accumulation 24
2.2 The Two-Country Economy 30
2.3 Some Special Cases of the Two-Country Economy 34
2.4 Discussing the Multi-Country Case 36
Appendix 38
A. 2:1 Equilibra and Stability in the Two-Country Economy 38

3 Growth, Trade, and Wealth Distribution among Groups 41
3.1 The Dynamic Trade Theory 43
3.2 Equilibrium of the World Economy 45
3.3 The Impact of the Propensity to Hold Wealth 49
3.4 The Impact of Human Capital 51

4 Trade, Time Distribution, and Sexual Division of Labor 53
4.1 International Trade with Sexual Division of Labor 54
4.2 Equilibrium of the Global Economy 58
4.3 Time Allocation and Trade Patterns 61
4.4 The Impact of the Wife's Human Capital 64
4.5 Concluding Remarks 65

5 Growth and Trade Patterns with National Public Goods 67
5.1 The Trade Model with Public Goods 67

5.2 Equilibria of the Global Economy 71
5.3 The Impact of Changes in the Tax Rate 75
5.4 The Impact of Changes in the Population 77

6 Growth, Trade, and International Migration 80
6.1 The Growth Model with Trade and Migration 81
6.2 Equilibrium of the Global Economy 85
6.3 The Impact of Amenity on Trade and Migration 90
6.4 The Impact of Human Capital on Trade and Migration 93
6.5 Concluding Remarks 96

7 Trade with Endogenous Capital and Knowledge 97
7.1 The Model with Capital and Knowledge 98
7.2 The Dynamics of the Trade System 100
7.3 The Global Economy in the Autarky System 104
7.4 A Comparison of the Autarky and Trade Systems 106
7.5 Concluding Remarks 108

8 Global Economic Growth with Trade and Research 109
8.1 The Model with Trade and Research 110
8.2 The Dynamics of the Free Trade System 113
8.3 Equilibria and Stability Conditions 115
8.4 Does Free Trade Benefit the World Economy? 118
8.5 The Impact of Knowledge Accumulation Efficiency 121
8.6 Research, Knowledge, and Trade 122
Appendix 122
A. 8.1 Equilibra and Stability of the Autarky System 122

9 Trade Patterns in a Multi-Group and Multi-Sector Global Economy 124
9.1 The Multi-Group and Multi-Sector Model 125
9.2 The Existence of Equilibrium 128
9.3 The Impact of Labor Force and Land 133
9.4 The Impact of Landlords' Propensity to Consume Foreign Goods 137
9.5 Concluding Remarks 138
Appendix 138
A. 9.1 Checking Lemma 9.3.2 138

10 Global Growth, Trade, and Economic Structures 140
10.1 The Growth Model with Trade and Structures 141
10.2 The Dynamic Properties of the System 144
10.3 The Savings Rates and the World Economy 148
Appendix 153
A. 10.1 Proving Proposition 10.2.1 153
A. 10.2 Proving Proposition 10.2.2 156

11 A Multi-Sector Trade Model with Endogenous Knowledge 160
11.1 The Multi-Sector Model with Endogenous Knowledge 160
11.2 Equilibria and Stability 164
11.3 The Impact of Knowledge Accumulation Efficiency 166
11.4 The Impact of the Preference for Foreign Goods 168
Appendix 171
A. 11.1 Proving Proposition 11.2.1 171
A. 11.2 Proving Proposition 11.2.2 173

12 Further Issues on International Trade 175

Bibliography 180
