Y. Sadahiro (Ed.)

Spatial Data Infrastructure for Urban Regeneration

Springer

Contents

1. Urban and Regional Information Infrastructure Yasushi Asami	1
 1.1 Introduction. 1.2 Development of Urban and Regional Information Infrastructure. 1.3 Contents of Urban and Regional Information. 1.3.1 Range of Urban and Regional Information. 1.3.2 Integrated GIS. 	2 4 4 5
1.4 Application of Infomiation Infrastructure to Assist Planning Urb Regeneration: Hedonic Approach	
1.5 Application of Information Infrastructure to Assist Planning Url Regeneration: Simulation Approach.1.6 Conclusion.	10
References	
2. New Urban Information Infrastructure: 3-D and Dynamic Information.	15
Ryosuke Shibasaki	
2.1 Introduction 2.2 STARIMAGER / TLS (Three-Line Sensor): A New High-	15
Resolution Sensor for Urban Mapping	
2.3 Methodology for Automated Generation of 3-D Building Data .2.4 Generation of Approximated 3-D Building Data	17
2.5 Modification of Horizontal Building Shapes	17

2.6 Modification of a Building in the Height Direction	
2.7 Versatile Roof Modeling,	
2.8 Experiment with 3-D Spatial Data Development	
2.8.1 Results	
2.8.2 Discussion	
2.8.3 Summary of 3-D Spatial Data Development	
2.9 Monitoring Dynamic Changes of Urban Areas	
2.10 Model-Based Change Detection	
2.10.1 Model-Based Change Detection with Shadow Area	
Removal	-
2.11 Change Detection Experiment	
2.11.1 Study Area	
2.11.2 Data	
2.11.3 Results	
2.11.4 Discussion	
2.12 Summary: 3-D Spatial Urban Data and Their Dynamic	
Revision	
References	
3. Monitoring of Urban Infrastructure and Environment by Use Remote Sensing Yoshifumi Yasuoka	
	41
3.1 Introduction	
3.2 Principles of Remote Sensing.	
3.2.1 Spectral Characteristics	
3.2.2 Remote Sensor	
3.3 New Technical Developments in Remote Sensing	
3.3.1 High-Spatial Resolution Observation	
3.3.2 Hyper-Spectral Observation	
3.3.3 Microwave Range Observation	
3.3.4 Three-Dimensional Observation	
3.4 Applications of Remote Sensing to Urban Assessment	
3.4.1 Assessment of Urban 3-D Landscape	
3.4.2 Monitoring of Urban Expansion with Satellite Images	
3.4.3 Monitoring of Heat Island	
3.5 Conclusions	
References	
4. Visualization of Historical Data in Tokyo Yukio Sadahiro, Eihan Shimizu and Takashi Fuse	53
4.1 Introduction	52

4.2 Data Creation	
4.2.1 Topographic Data	
4.2.2 Land use Data	
4.2.3 Building Data (Micro Scale)	
4.2.4 Demographic Data	
4.3 System development 1: DragonFly	
4.4 System development 2: Hongo History	
4.5 Conclusion	
References	
5. Urban Transport Data Fusion and Advanced Traffic Mana	gement
for Sustainable Mobility	75
Masao Kuwahara and Shinji Tanaka	
5.1 Overview	75
5.2 Data Variety and Its Characteristics	
5.2.1 Vehicle Detectors	
5.2.2 Probe Vehicles	
5.2.3 Automatic Vehicle Identification (AVI)	
5.2.4 Electronic Toll Collection (ETC)	
5.2.5 Image Sensors 5.2.6 Measurement Vehicle	
5.3 Framework to Combine Various Data Sources for Urban T	
Management	
5.3.1 Introduction	
5.3.2 Data Storage Layer.	
5.3.3 Data Processing and Handling Layer	
5.3.4 Application Layer	
5.3.5 Usage for Urban Transport Management	
5.4 Case Studies	
5.4.1 Bus Travel Time Analysis Using Probe Data	
5.4.2 Data Fusion.	
5.5 Advanced Urban Transport Management for Sustainable	
Mobility	
5.5.1 Travel Time Prediction	
5.5.2 Simulation	
5.5.3 Demand Spread Over Time

6. New Technologies in Urban Regeneration - Community-Ba	
Urban Planning Support System Enhanced by Urban Vulr	
Assessment Technologies	103
Takaaki Kato	

6.1 Introduction	
6.2 Urban Earthquake Disaster Simulations and Urban Vulnera	ability
Assessment Technologies (UVAT)	
6.2.1 History of Simulations and UVAT	.' 105
6.2.2 The Present Situation Around Simulations and UVAT.	
6.3 Planning Support System for Urban Earthquake Disaster	
Mitigation: BOUSAI-PSS	HI
6.3.1 Overview	
6.3.2 Postulated Development of BOUSAI-PSS	
6.3.3 Structure of BOUSAI-PSS	
6.3.4 Expected Situations for Use and for Users	
6.3.5 Significance of Introducing an Urban Improvement Pl	
Support System for Earthquake Disaster Mitigation	
6.3.6 Subsystem of BOUSAI-PSS	
6.4 Community-Based Urban Planning with the PSS in Japan.	
6.4.1 Topics and Issues on Community-Based Design with	
BOUSAI-PSS	
6.4.2 Perspective on the Application of BOUSAI-PSS to a	
0.4.2 I dispective on the Application of DOUSAFI SS to a
