Contents

Introduction	xiii
I Brief Characteristics and Classification of Barriers and Barriers Zones in the Ocean	1
I.1 Mechanical (Hydrodynamic) Barriers	7
I.2 Physicochemical Barriers	15
I.3 Salinity Barriers	25
I.4 Temperature, Density and Dynamic Barriers	29
I.5 Geochemical Barriers That Exist Independently of Their Position in Space (Autonomic Barriers)	35
I.6 Geochemical Barrier Zones	37
I.7 Geochemical Landscapes	67
II Barriers as transformational areas of sedimentary material	69
II.1 River-sea	71
II.2 Coast-sea	137
II.3 Hydrofronts	163
II.4 Front of coastal upwelling	183
II.5 Ice-Water Boundary	201
II.6 Hydrothermal Fluid-Seawater Barrier Zone	221
II.7 Ocean – atmosphere	249
II.8 Photic layer	263
II.9 The Thermocline and Pycnocline as GBZs	287
II.10 Oxygen Minimum Layer	303
II.11 Redox (Eh) Barrier in Seawater	313
II.12 Salinity Barrier	335
II.13 Calcium Carbonate Compensation Depth (CCD)	345
II.14 The Water-Bottom Interface	363
II.15 Redox (Eh) barrier in sediments	413
II.16 The Upper Active Sediment Layer	425
II.17 Lithogeochemical Areas, Regions and Provinces	437
III Lithogeochemical Barriers as Leading Factors in Ore Formation	441
III.1 General	443
III.2 Mechanical Barriers and Placer Formation	447

III.3	River–Sea GBZs and Formation of Oil Hydrocarbons	455
III.4	River–Sea GBZs and Formation of Pseudo-oolitic and Oolitic Hydrogoethite-Chamosite Ferruginous Ores and Glauconite	457
III.5	Front of Coastal Upwelling and Accumulation of Phosphorites	475
III.6	Hydrofronts and Ore Formation in Pelagic Areas of the Ocean	485
III.7	The Halocline (Pycnocline) and Accumulation of Shallow-water Ferromanganese Crusts and Nodules	489
III.8	The Oxygen Minimum Layer and Development of Cobalt–Manganese Crusts	495
III.9	Geochemical Barrier Zones and Processes of Accumulation of Carbonate–Oxic Manganese Ores	507
III.10	Ore Formation at the Redox (Eh) Barrier in Sediments	525
III.11	Geochemical Barrier Zones and Formation of Siderite	543
III.12	Hydrothermal Process and Ore Formation	547
III.13	Calcium Carbonate Compensation Depth and Formation of FMNs	557
III.14	Geochemical Barrier Zones and Formation of Sapropel	559
III.15	Predicting and Prospecting for Ores of Marine Genesis	565
IV	Some Geological Aspects of Variations in Marine Ecological Systems	569
IV.1	Second-Order Boundaries	571
IV.2	First-Order Boundaries	573
IV.3	Internal boundaries	591
V	Conclusion	595
	References	597
	Index	633
