F. Jerry Lucia

Carbonate Reservoir Characterization

With 171 Figures and 5 Tables

Springer

Contents

Chapter 1
Petrophysical Rock Properties

1.1 Introduction 1
1.2 Porosity 1
1.3 Permeability 4
1.4 Capillary Properties and Fluid Distribution 8
1.5 Relative Permeability 16
1.6 Summary 21
References 21

Chapter 2
Rock-Fabric, Petrophysical Parameters, and Classification

2.1 Introduction 23
2.2 Pore Space Terminology and Classification 24
2.3 Rock-Fabric/Petrophysical Classification 27
2.3.1 Classification of Interparticle Pore Space 27
2.3.2 Classification of Vuggy Pore Space 30
2.3.2.1 Separate-Vug Pore Space 30
2.3.2.2 Touching-Vug Pore Space 30
2.4 Rock-Fabric/Petrophysical Relationships 32
2.4.1 Interparticle Porosity/Permeability Relationships 32
2.4.1.1 Limestone Rock Fabrics 32
2.4.1.2 Dolomite Rock Fabrics 35
2.4.1.3 Limestone and Dolomite Comparison 38
2.4.1.4 Unusual Types of Interparticle Porosity 42
2.4.2 Interparticle Porosity/Water Saturation Relationships 42
2.4.3 Rock-Fabric/Petrophysical Classes 48
2.4.4 Petrophysics of Separate-Vug Pore Space 49
2.4.5 Petrophysics of Touching-Vug Pore Space 53
2.5 Summary 53
References 56

Chapter 3
Rock-Fabric/Petrophysical Properties from Core Description and Wireline Logs: The One-Dimensional Approach

3.1 Introduction 59
3.2 Core Description 60
3.3 Core Analysis 61
3.4 Core/Log Calibration 61
3.4.1 Procedures for Core-Log Calibration 62
3.4.2 Gamma-Ray Logs and Depositional Textures 62
3.4.3 Borehole Environment 64
3.4.4 Neutron/Density Logs and Rock Fabric 64
3.4.5 Acoustic Logs, Interparticle Porosity, and Vuggy Porosity 68
3.4.6 Resistivity/Induction Logs and Rock Fabrics 72
3.4.7 Formation Imaging Logs and Vuggy Pore Space 75
3.4.8 Permeability from Wireline Logs, the Rock-Fabric Method 77
3.5 Summary 78
References 80

Chapter 4
Origin and Distribution of Depositional Textures and Petrophysical Properties: The Three-Dimensional Approach

4.1 Introduction 81
4.2 Textures, Mineralogy, and Petrophysical Properties of Carbonate Sediments 82
4.3 Spatial Distribution of Textures and Petrophysical Properties 88
4.3.1 High-Frequency Cycles and Facies Progression 89
4.3.2 High-Frequency Sequence 96
4.4 Example 100
4.5 Summary 104
References 106

Chapter 5
Diagenetic Overprinting and Rock-Fabric Distribution: The Cementation, Compaction, and Selective Dissolution Environment

5.1 Introduction 109
5.2 Cementation/Compaction/Selective Dissolution 111
5.2.1 Calcium Carbonate Cementation 112
5.2.2 Compaction 115
5.2.3 Selective Dissolution 117
5.2.4 Effects on Petrophysical Properties Distribution 118
5.3 Reservoir Examples 121
5.3.1 Ghawar (Jurassic) Field, Saudi Arabia 121
5.3.2 Tubarao (Cretaceous) Field, Offshore Brazil 122

5.3.3 Mississippian Chester Oolite, Oklahoma, USA 124
5.3.4 Upper Devonian Reef Buildups, Alberta, Canada 127
5.3.5 Moldic Grainstone, Permian, Guadalupe Mountains, USA..... 130
References 131

Chapter 6
Diagenetic Overprinting and Rock-Fabric Distribution: The Dolomitization/Evaporite-Mineralization Environment

6.1 Introduction..... 135
6.2 Dolomitization/Evaporite Mineralization..... 136
6.2.1 Dolomitization 137
6.2.1.1 Calcitization of Dolomite..... 143
6.2.2 Evaporite Mineralization..... 143
6.2.2.1 Calcitization of Anhydrite/Gypsum 146
6.2.3 Effects on Petrophysical Properties Distribution 146
6.3 Reservoir Examples..... 150
6.3.1 Red River Reservoirs, Montana and North Dakota 150
6.3.2 Andrews South Devonian Field, West Texas..... 150
6.3.3 Flanagan (Upper Clear Fork) Field, West Texas..... 153
References..... 154

Chapter 7
Diagenetic Overprinting and Rock-Fabric Distribution: The Massive Dissolution, Collapse and Fracturing Environment

7.1 Introduction..... 157
7.2 Massive Dissolution, Collapse, and Fracturing..... 159
7.2.1 Effects on Petrophysical Properties Distribution 163
7.3 Reservoir Examples..... 164
7.3.1 San Andres Fields, West Texas 165
7.3.2 Elk Basin Field, Wyoming-Montana 168
7.3.3 Ellenburger Fields, West Texas 170
7.3.4 Northern Michigan Silurian Reef Fields, Michigan..... 175
References 175

Chapter 8
Reservoir Models for Input into Flow Simulators

8.1 Introduction..... 177
8.2 Geostatistical Methods..... 179
8.2.1 Introduction 179
8.2.2 Variograms 179
8.2.2.1 Variography 180
8.2.2.2 Conditional Simulation 182
8.3 Scale of Variability and Average Properties..... 182
8.4 Rock-Fabric Reservoir Models 188
8.4.1 Lawyer Canyon Reservoir Analog Study..... 190

8.4.1.1 Model Construction 190
8.4.1.2 Fluid Flow Experiments 193
8.5 Reservoir Model Construction Using the Rock-Fabric Facies Method 194
8.5.1 Construction of Rock-Fabric Layers 196
8.6 Field Example: Seminole San Andres Unit, Gaines County, Texas 200
8.6.1 Introduction 200
8.6.2 Seminole Field and Geological Setting 201
8.6.3 Rock Fabric-Petrophysical Relationships 202
8.6.4 Vertical Succession of Rock Fabrics and Depositional Textures from Core 207
8.6.5 Sequence Stratigraphy 211
8.6.6 Wireline Log Analysis 211
8.6.6.1 Introduction 211
8.6.6.2 Porosity 212
8.6.6.3 Separate-Vug Porosity 212
8.6.6.4 Water Saturation 212
8.6.6.5 Particle Size and Sorting 213
8.6.6.6 Permeability 214
8.6.7 Reservoir Model Construction 215
8.6.7.1 Rock-Fabric Flow Units 216
8.6.7.2 Reservoir Model 217
8.6.8 Simulation Results 219
