

Stefan M. Luthi

Geological Well Logs

Their Use in Reservoir Modeling

With 234 Figures and 28 Tables

Springer

Table of Contents

1	Introduction	3
1.1	Overview	3
	Scope of Book	3
	Well Logging Companies	8
	Geological Service	9
	Professional Societies	9
	Periodicals	10
1.2	A Brief History of Logging	12
1.3	The Petrophysical Approach	21
1.3.1	Archie's Law	21
1.3.2	Mobility	24
1.3.3	Clays and Saturation Determination	26
1.3.4	Simultaneous Solutions for Lithologies and Saturations	29
1.3.5	Permeability	31
2	Geological Measurements	35
2.1	Dipmeter	37
2.1.1	Tool Principles	37
2.1.2	Dip Calculation	41
2.1.3	Graphical Representation	46
2.1.4	Dipmeter Interpretation	49
	Human Expertise	51
	Dipmeter Interpretation with Expert Systems	60
	Dipmeter Interpretation Using Geometric Constructions	61
	Statistical Methods on Dip and Curve Characters	65
2.1.5	Summary	71
2.2	Electrical Borehole Imaging	74
2.2.1	Tool Principles	74
	Microelectrical Imaging	76
	Azimuthal Resistivity Imaging	78
	LWD Resistivity Imaging	80
	Summary	82
2.2.2	Image Processing	83

2.2.3	Graphic Representations	89
2.2.4	Dip Calculations	91
2.2.5	Image Interpretation	94
	Bedding Analysis	96
	Structural Analysis	104
	Fracture Analysis	108
	Heterogeneities	116
2.2.6	Summary	118
2.3	Acoustic Borehole Imaging	124
2.3.1	Tool Principles	124
2.3.2	Tool Response	129
2.3.3	Processing and Graphic Representations	132
2.3.4	Dip Calculations	136
2.3.5	Image Interpretation	137
	Fractures	137
	Hole Shape Analysis	139
	Bedding Analysis	143
2.3.6	Summary	144
2.4	Density Borehole Imaging	147
2.4.1	Measurement Principles	147
2.4.2	Applications	151
2.5	Optical Borehole Imaging	154
2.5.1	Measurement Principles	154
2.5.2	Applications	155
2.6	Nuclear Magnetic Resonance Logging	159
2.6.1	Introduction	159
2.6.2	Measurement Principle	161
2.6.3	Applications	171
	Bound and Free Fluids	171
	Heavy Hydrocarbons	173
	Pore Size Distribution	174
	Permeability	175
2.6.4	Summary	180
2.7	Nuclear Spectroscopy Logging	183
2.7.1	History of Lithology Computations	183
2.7.2	Origin and Nature of Natural Radioactivity	188
2.7.3	Total Gamma Ray Logging	191
2.7.4	Natural Gamma Ray Spectroscopy Logging	194
2.7.5	Applications of Natural Gamma Ray Measurements	197
	Volume of Clay	197
	Correlation and Pattern Analysis	198
	Mineral Identification	200

2.7.6	Induced Gamma Ray Spectroscopy	201
2.7.7	Applications of Spectroscopy Measurements	206
	Mineral Concentrations	206
	Permeability	210
	Other Applications	212
2.7.8	Summary	213
2.8	Paleomagnetic Logging	216
2.8.1	Basics of Paleomagnetism	216
2.8.2	Measurement Principle	222
2.8.3	Processing	224
2.8.4	Interpretation	228
2.8.5	Summary	233
2.9	Core Sampling	236
2.9.1	Introduction	236
2.9.2	Percussion Coring	238
2.9.3	Rotary Coring	240
2.9.4	A Brief Comparison	244
3	Applications and Case Studies	245
3.1	Structural Modeling	247
3.1.1	General Comments	247
3.1.2	Combining Seismic and Dip Data	248
3.1.3	Modeling Cross-Beds	250
	Deterministic Approach	251
	Statistical Approach	252
3.1.4	Remarks	258
3.2	Bedding and Reservoir Zonation	259
3.2.1	Introduction	259
	Unsupervised Classifications	260
	Supervised Classifications	266
	Reservoir Zonation Using Geological Logs	267
3.2.2	"Thin Beds"	268
	Bed Thickness and Tool Resolution	268
	Thresholding for Sand Count	271
	A Turbidite Case Study	271
	Sharpening the Tool Response	284
3.2.3	Bedding from Image Texture	290
3.2.4	Conclusions	294
3.3	Fractured Reservoirs	297
3.3.1	Introduction	297
3.3.2	A Fractured Carbonate Case Study	298

Fracture Analysis	300
Results	305
Discussion	308
3.3.3 A Fractured Basement Case Study	311
Introduction	311
Data Analysis and Results	312
Discussion	314
3.4 Well Correlation	317
3.4.1 Introduction	317
3.4.2 Lithostratigraphic Correlation Using Spectroscopy Logs	318
3.4.3 Chronostratigraphic vs. Lithostratigraphic Correlation	321
3.4.4 Correlation with Neural Networks	325
3.4.5 Correlation with Dynamic Programming	330
3.4.6 Correlation from Facies Zonation	333
3.4.7 Sequence Analysis	337
3.4.8 Summary	340
3.5 Geological Drilling	342
3.5.1 Directional Drilling	342
Directional Drilling Techniques	345
3.5.2 Geosteering	350
Technique	350
Borehole Images: The Future of Geosteering?	353
Geostopping	355
3.5.3 Summary	357
Conclusions	358
Figure Credits	364
Abbreviation Index	366
Subject Index	367
