

Horst Siebert

Economics of the Environment

Theory and Policy

Sixth Edition

4y Springer

Contents

	Preface	
	List of Figures and Tables	
Part I	Introduction.	1
Chapter 1	The Problem.	3
Chapter 2	Using the Environment - An Allocation Problem.	7
	Externalities.	7
	Relationship between the Environment and the Economic System.	8
	Material Flows between the Environment and the Economic System.	12
	Competing Uses.	13
	Zero Price of Environmental Use.	16
	Environmental Effects of Government Decisions.	18
	How Much Environmental Quality?	19
	A Taxonomy of the Environmental Problem.	19
	Appendix 2A: Input-Output Analysis and the Environment.	20
	Appendix 2B: Applied General Equilibrium Models	23
Part II	Static Allocation Aspect.	25
Chapter 3	Production Theory and Transformation Space.	27
	Production Theory.	27
	Transformation Space with Environmental Quality.	30
	Variables Affecting the Transformation Space.	33
	An Alternative Approach of Production Theory.	36
	Appendix 3A: Properties of the Transformation Space	37
	Appendix 3B: Transformation Space with Negative Productivity Effect.	41
Chapter 4	Optimal Environmental Use.	43
	Criteria for Optimality.	43
	Optimization Problem.	45

	A Shadow Price for Pollutants.	46
	Implications for the Shadow-Price System of the Economy.	49
	Optimum and Competitive Equilibrium.	50
	Requirements for an Emission-Tax Solution.	53
	Appendix 4A: Nonlinear Optimization.	54
	Appendix 4B: Implications of the Allocation Problem	55
	Appendix 4C: Implications of the Profit Maximum.	56
Chapter 5	Environmental Quality as a Public Good.	59
	Characteristics of a Public Good.	59
	Allocation of Public Goods.	62
	Social-Welfare Function.	63
	Benefit-Cost Analysis.	65
	Costs of Environmental Quality.	66
	Evaluation of Environmental Quality.	70
	Individual Preferences and the Pareto-Optimal Provision of Environmental Quality.	74
	Thesis of Market Failure.	77
	Lindahl Solution.	77
	Mechanisms of Social Choice.	84
	Ethical Aspects of Environmental Evaluation.	91
	An Example: Ambient Quality Standards.	95
Chapter 6	Property-Rights Approach to the Environmental Problem.	97
	Property-Rights Approach.	97
	Property Rights and Environmental Allocation.	98
	Coase Theorem.	99
	Coase Theorem and Transaction Costs.	101
	Can Property Rights Be Specified?.	102
Part III	Environmental-Policy Instruments.	105
Chapter 7	Incidence of an Emission Tax.	107
	Standard-Price Approach.	107
	Reaction of Producers.	109
	Emission Taxes in Monopoly.	110
	General Equilibrium Approach.	111
	Allocation in a General Equilibrium Model.	114
	Pollution Intensities, Factor Intensities, and Allocation Effects.	118
	Overshooting of the Emission Tax.	120
	Is there a Double Dividend of Emission Taxes?.	120
	Appendix 7A: Reaction of the Individual Firm.	124
	Appendix 7B: General Equilibrium Model.	124

Chapter 8	Policy Instruments	127
	Transforming Quality Targets into Individual Behavior . . .	127
	The Principal-Agent Problem	128
	Available Policy Instruments	129
	Criteria for Evaluating Instruments	130
	Moral Suasion	131
	Government Financing and Subsidies	132
	Regulatory Approach	132
	Voluntary Agreements	136
	Emission Taxes	136
	Pollution Licenses	140
	The Bubble Concept	145
	Success of Emission Trading *	147
	Institutional Arrangements for Cost Sharing	148
	Combining Standards and an Emission Tax	150
	Liability	150
Chapter 9	Policy Instruments and the Casuistics of Pollution	153
	Solid Waste	153
	Optimal Waste Reduction	155
	Establishing Scarcity Prices for Waste with Collection Costs	157
	Waste Management and Spatial Structure	157
	Closed Substance Cycle and Product Responsibility	158
	The German System of Waste Management	158
	Emissions from Mobile Sources	160
	Accidental Emissions	161
	Vintage Damages	161
	Pollutants in Consumption Goods	161
	Pollutants in New Products	162
	Externalities in Land Use	162
Chapter 10	The Political Economy of Environmental Scarcity	163
	The Opportunity Cost Principle	163
	The Polluter-Pays Principle	164
	The Pollutee-Pays Principle	166
	The Precautionary Principle	166
	The Principle of Interdependence	167
	Major Environmental Legislation	168
Part IV	Environmental Allocation in Space	171
Chapter 11	Environmental Endowment, Competitiveness and Trade	173
	Environmental Systems in Space	173
	Environmental Endowment	174

National Environmental Policy and Comparative Advantage	175
Environmental Policy and Trade Flows	177
Environmental Policy, Imperfect Competition and Trade	179
Location Advantage	180
International Specialization and Environmental Quality	180
The Equalization of Prices for Emissions	181
Environmental Policy and Gains from Trade	182
Environmental Pollution: A race to the Bottom?	183
Empirical Studies of the Impact of Environmental Policy and Trade	184
Trade Policy as a Means for Environmental Protection?	185
Environmental Concerns - A Pretext for Protection	186
Environmental Policy and World Trade Order	187
Trade Policy to Solve Transfrontier and Global Pollution Problems?	190
Elements of a Multilateral Environmental Order	190
Environmental Policy in the Single Market	192
Chapter 12 Transfrontier Pollution	195
Transfrontier Diffusion Function versus International Public Good	195
Distortions from Transfrontier Pollution	196
The Noncooperative Solution to Transfrontier Pollution	196
The Cooperative Solution to Transfrontier Pollution	200
Side Payments	201
The Bargaining Approach to Transfrontier Pollution	203
Policy Instruments for Transfrontier Pollution	204
Positive International Spillovers: The Equatorial Rain Forest	206
Biodiversity	206
Chapter 13 Global Environmental Media	209
The Noncooperative Solution to Global Media	209
The Cooperative Solution to Global Media	211
Side Payments and Global Goods	214
Controlling the Free Rider	215
Coalitions	216
The Unilateral First Mover	217
Uniform Reduction	217
A Workable System of Transferable Discharge Permits	217
Reneging the Contract	218
An International Order for the Global Environment	219
Implementing the Kyoto Protocol	222
EU Emission Trading	223

Chapter 14	Regional Aspects of Environmental Allocation	225
	The Problem	225
	Spatial-Allocation Model	228
	Regional Implications of a National Environmental Policy	229
	Regional Differentiation of the Emission Tax	229
	Location Advantage	231
	Diagrammatic Explanations	232
	Resource Mobility and Adjustment of Emission Taxes	235
	Differences in Environmental Quality	236
	Siting Issues and the National Interest	237
	Regional versus National Authorities	237
	Some Restraints on Regional Authorities	239
	Regional Autonomy and Environmental Media	240
	Environmental Equity and Specialization of Space	241
	Environmental Policy and Regional Planning	242
	Appendix 14A: A Regional Allocation Model	243
Part V	Environmental Allocation in Time and under Uncertainty	245
Chapter 15	Long-Term Aspects of Environmental Quality	247
	The Problem	247
	Dynamic Model	249
	Implications	249
	Three Strategies for Dynamic Environmental Use	251
	Social Discount Rate and Environmental Allocation	255
	Further Determining Factors of the Shadow Price of Emissions	256
	Appendix 15A: Control Theory	258
	Appendix 15B: A Dynamic Allocation Model	261
Chapter 16	Economic Growth, Sustainability and Environmental Quality	263
	Interdependencies between Environmental Quality, Growth, and Resources	263
	Growth and Environmental Degradation	264
	The Survival Issue	270
	Environmental Quality as a Normative Restriction for Growth	270
	Optimal Growth	272
	Growth with Finite Resources	272
	Weak or Strong Substitutability	272
	Growth with Human Capital	273

Endogenous Growth	273
Sustainable Development	274
Zero Economic Growth	277
An Optimistic Note: The Environmental Kuznets Curve	279
Chapter 17 Risk and Environmental Allocation	281
Environmental Risks	281
Risk and Environmental Quality	283
A Simple Static Model	285
Risk in an Intertemporal Context	286
Preventive Environmental Policy	288
Irreversibilities and Option Values	289
Allocating Environmental Risks?	290
Risk Reduction	291
Allocating the Costs of Risk Reduction	291
The Response of the Polluter under Uncertainty	293
About the Author	295
Bibliography	297
Subject Index	321
