Plenum Press • London and New York

Contents

Introduction	1
---------------------------	----------

Jan Strelau and Alois Angleitner

PART I. CONTEMPORARY CONCEPTUALIZATIONS

1. Temperament and the Concept of Goodness of Fit	15
--	-----------

Stella Chess and Alexander Thomas

The Goodness-of-Fit Concept	15
Diagnostic Formulation of Temperamental Categories	16
Examples of Goodness and Poorness of Fit	18
Variability in the Goodness of Fit	21
Sociocultural Factors	23
Other Theoretical Approaches and Goodness of Fit	24
Goodness of Fit and Similarities of Temperament	25
Goodness of Fit, Self-Awareness, and Self-Esteem	25
Generalization of the Goodness-of-Fit Model	26
Prevention and Treatment of Behavior Disorders	27
Conclusion	27

2. The Functional Significance of Organismic Individuality: The Sample Case of Temperament	29
---	-----------

*Rachna Talwar, Katherine Nitz, Jacqueline V. Lerner,
and Richard M. Lerner*

Features of a Developmental Contextual Perspective	30
--	----

Measuring the Dimensions of Temperament and of Ethnotheories of Temperamental Difficulty	32
The Dimensions of Temperament	32
Contextual Demands Regarding Temperament	33
The Pennsylvania Early Adolescent Transitions Study (PEATS)	36
Conclusions and Future Directions	39
3. The EAS Theory of Temperament	43
<i>Arnold H. Buss</i>	
Activity	43
Components	43
Measures	44
Sex Differences	46
Learning	46
Person and Environment	47
Emotionality	47
Components of Fear	48
Components of Anger	49
Measures	49
Sex Differences	50
Learning	51
Person and Environment	52
Positive Emotionality	53
Sociability	53
Components	53
Measures	54
Sex Differences	55
Learning	56
Person and Environment	57
Problem Behaviors	58
Shyness	58
Hyperactivity	58
Difficult Children	58
EAS Theory	59
4. Temperament: A Developmental Framework	61
<i>Mary Klevjord Rothbart</i>	
The Newborn Period	62

Infancy 64
 The Preschool Period 67
 Effortful Control and Ego-Control and Resiliency 68
 Similarities between Temperamental Dimensions Identified in Infancy
 and Early Childhood and Those Identified in Adult Subjects 69
 A Developmental Model for Temperament 69

5. Outline of a General Emotion-Based Theory of Temperament 75

Albert Mehrabian

Emotion States: Core Mediating Variables of the Theory 76
 Personality Described in Terms of Three Basic Temperament
 Variables 77
 Description and Measurement of Temperament 77
 The Three-Dimensional Temperament Space
 in Relation to Existing Personality Measures 79
 Situations Described in Terms of Their Emotion-Eliciting Qualities ... 81
 Hypotheses Outlining Answers to the Contemporaneous Questions ... 82
 Hypotheses Outlining Answers to the Longitudinal Questions 83

6. Dimensions of Personality: The Biosocial Approach to Personality 87

Hans J. Eysenck

A Paradigm of Personality Description 87
 Biological Theories of Personality 89
 Problems in Theories Testing 90
 EEG Studies and Personality 91
 Electrodermal Studies of Personality 94
 Miscellaneous Measures of Personality 96
 Biochemical Determinants of Personality 98

7. The Neuropsychology of Temperament 105

Jeffrey A. Gray

Some General Background 105
 The Analysis of Emotion 106
 The Model: I—The Behavioral Inhibition System 109

The Model: II—The Fight/Flight System	114
The Model: III—The Behavioral Approach System	114
Personality	122

**8. Biotypes for Basic Personality Dimensions? “The Twilight Zone”
between Genotype and Social Phenotype** 129

Marvin Zuckerman

Personality Traits	130
Cognitive Affective and Behavioral Mechanisms	132
Psychophysiology	133
Autonomic Arousal and Arousability	134
Biochemistry	135
Catecholamines (Dopamine, Norepinephrine, and Epinephrine) ..	135
Benzodiazepine-GABA System	136
Serotonin	137
Testosterone	137
Monoamine Oxidase (MAO)	138
Neuropsychology	139
Reward and Activity	139
Behavioral Inhibition	139
Emotionality	140
Behavior Genetics	141
Personality Traits	141
Biological Traits	142
Conclusions	142

**9. Biochemical Variables in the Study of Temperament: Purposes,
Approaches, and Selected Findings** 147

Petra Netter

Introduction	147
Approaches to the Study of Biochemical Variables	148
Explanation of Theories on Temperament	148
Theories Based on Psychological Observations in Humans	148
Theories Based on Biochemical Observations in Animal Models	150
Theories Based on Psychopathology	151
Explanation of Underlying Biochemical Processes of Psychological Functions Indicative of Differences in Temperament	152

- Psychomotor Functions 152
- Cognitive Functions 153
- Emotional Functions 153
- Coping Processes 154
- Explanation of Underlying Biochemical Processes of Somatic
Response Differences Related to Temperament 154
 - Drug Responses 154
 - Psychophysiological Responses 155
- Detection of Psychochemical Relationships in the Development
of Psychosomatic Diseases Related to Temperament 155
- Heuristic Purposes 156
- Considerations of Validity 156
- Conclusions 157

10. Temperament and the Person-Situation Debate 163

Guus L. Van Heck

- A Paradigm Crisis in Personality Psychology 163
- Mischel’s Attack on the Generality of Behavior 163
- Outcomes of the Person-Situation Debate 164
- Stability of Temperament 166
- Transsituational Consistency of Temperament 166
- Temperament and the Interactionist Approach to Personality 167
- “Niche Picking”: Temperament and Situation Selection 168
- Temperament, Response Preferences, and Situation Transformation 169
- An Illustrative Study 170
- Final Remarks 171

11. The Concepts of Personality and Temperament 177

Willem K. B. Hofstee

- The Personological Twist 177
 - The Alleged Circularity of Personological Explanation 178
 - The Alleged Invalidity of Personological Explanation 179
 - The Alleged Atheoretical Nature of Personological Explanations 180
- Temperament and Personology 181
 - Strelau on Temperament and Personality 182
 - The Role of Biological Explanations 184
 - A Judgmental Conception of Temperament 185
- Conclusion 187

PART II. DIAGNOSTIC AND METHODOLOGICAL ISSUES

12. What Can We Learn from the Discussion of Personality Questionnaires for the Construction of Temperament Inventories?	191
<i>Alois Angleitner and Rainer Riemann</i>	
Personality and Temperament: Where Are the Differences?	191
How to Find the Real Temperament Traits	192
Temperament and the Item Content of Temperament Scales	194
Steps in the Construction of a Temperament Scale	199
The Cross-Cultural Adaptation of Temperament Scales	202
Conclusions	202
13. Questionnaire Measurement of Infant and Child Temperament: Current Status and Future Directions	205
<i>Elizabeth H. Slabach, Judy Morrow, and Theodore D. Wachs</i>	
Introduction	205
Reliability	209
Internal Consistency	209
Test-Retest Reliability	210
Stability of Temperament	211
Interrater and Interparent Agreement	212
Validity Issues	213
Weak Validity Studies	214
Strong Validity Studies	218
Summary and Conclusions	225
The Psychometric Adequacy of Temperament Questionnaires	225
The Utilization of Questionnaires	227
14. Mother-Father Agreement in Temperament Ratings: A Preliminary Investigation	235
<i>Roy P. Martin and Charles F. Halverson, Jr.</i>	
Method	236
Participants	236

Instrument	237
Data Analysis Procedures	238
Results	238
Mean Differences in Ratings of Mothers and Fathers	238
Differences in Variation of Mothers' and Fathers' Ratings	240
Correlations between Ratings of Mothers and Fathers	240
Absolute Differences between Ratings of Mother and Father	243
Intraclass Correlations between Ratings of Mother and Father	244
Discussion	245
15. Contemporary Instruments for Assessing Early Temperament by Questionnaire and in the Laboratory	249
<i>H. H. Goldsmith and Mary Klevjord Rothbart</i>	
The Infant Behavior Questionnaire	251
Development of the IBQ	251
Household Reliability	253
Content of the IBQ	253
Intercorrelations Among Scale Scores	254
Theoretical Approach to Temperament	254
Stability	255
Validation of the IBQ	255
Advice to Potential Users	257
The Toddler Behavior Assessment Questionnaire	258
Rationale	258
Construction	258
Validity Scales	258
Scale Definitions and Sample Items	259
Reliability and Validity	260
Relation between IBQ and TBAQ	262
Applicability	262
Companion Instruments Developed by Rothbart	263
Questionnaire for Preschoolers and Early School-Age Children ..	263
Questionnaire for Adolescents	263
Questionnaire for Adults	263
Need for Non-Questionnaire Measures	264
Behavioral Assessment of Early Temperament in the Laboratory: The Laboratory Temperament Assessment Battery	264
Terminology	264
Physical Setting, Equipment, and Laboratory Routine	265
Carryover Effects and Sequencing of Episodes	265
Maternal Interview	266

Summary of Research	267
Anticipated Use	269
Conclusion	269
16. Reactivity and Anxiety in the Laboratory and Beyond	273
<i>Paul M. Kohn</i>	
Psychometric versus Experimental Measures of Reactivity	273
Reactivity and Response to Pain	274
Reactivity, Anxiety, and Adverse Reactions to Stress	278
A Psychometric Detour	279
Predicting Adverse Reactions to Stress	280
Overview	283
17. Correlations between Psychometric Measures and Psychophysiological as Well as Experimental Variables in Studies on Extraversion and Neuroticism	287
<i>Manfred Amelang and Ulrike Ullwer</i>	
Theoretical Outline, Methodological Criticisms, and Some Unresolved Questions	287
Psychometric Studies: Pro-Eysenck Findings	290
Psychophysiological and Experimental Variables: A Selective Literature Overview	293
Multivariate Studies	293
The "Dual Nature of Extraversion": Rediscovered	296
Neuroticism	298
Report of a (Nearly) Comprehensive Study	300
Method	300
Results	303
Discussion and Concluding Remarks	310
18. Differential Psychophysiology and the Diagnosis of Temperament	317
<i>Jochen Fahrenberg</i>	
Introduction	317

Multivariate Activation Theory 318

The Search for Psychophysiological Traits 320

 Basic Assumptions 320

 The Psychophysiology of Neuroticism and Anxiety 321

 Relevant Issues in Testing Psychophysiological Trait Postulates .. 322

Generalizability of Psychophysiological Assessments 323

 An Extension from the Laboratory to the Field 323

 The First Study 324

 The Second Study 328

Conclusions 330

PART III. ADDENDUM

19. Renaissance in Research on Temperament: Where to? 337

Jan Strelau

Introduction 337

The Last Three Decades in Studies on Temperament 338

Invasion of Traits (Dimensions) and Diagnostic Tools
in Temperament Research 342

 One versus Many Temperament Dimensions 342

 The Many Traits and Cumulative Value of Temperament
 Research 343

 The Structure of Temperament Needs to Be Described by Traits
 Representing the Same Level of Behavior Organization 343

 The Temperamental Traits Less Diverse Than Names
 Suggest 344

 Not All So-Called Temperament Traits Pertain
 to Temperament 344

 Temperamental Traits Differ in Evidence for Heritability 346

 Different Temperamental Traits under the Same Label
 and Differences in Their Popularity 346

 Neutral Traits versus Traits with Evaluative Loading 347

 Uncontrolled Growth of Psychometric Methods
 in Temperament Research 348

Final Remarks 349

Index 359
