Preface	xi
---------	----

GENERAL OVERVIEW

The schedule-based modeling of transportation systems: recent developments	1
<i>Agostino Nuzzolo, Umberto Crisalli</i>	
1.1 Introduction	1.
1.2 Transit schedule-based modelling	3
1.3 Models for multimodal passenger transport- ation networks	17
1.4 Models for multimodal freight transportation networks	19
1.5 Conclusions	21

TRANSIT NETWORKS MODELS AND APPLICATION

2	
Passenger delay models for rail networks	27
<i>Otto A. Nielsen, Alex Landex, Rasmus D. Frederiksen</i>	
2.1 Introduction	28
2.2 Models principles	31
2.3 Implementation of the 3.generation model	41
2.4 Results on empirical data in the Copenhagen network	42
2.5 Calculating future passenger delays by simulation	44
2.6 Conclusions and summary	47

3		
Multi-day dynamic transit assignment		51
<i>Markus Friedrich</i>		
3.1	Introduction	51
3.2	Network model	54
3.3	Assignment	57
3.4	Analysis of results	58
3.5	Conclusion	60
4		
Schedule-based dynamic transit assignment		63
<i>Thomas Haupt, Klaus Nokel, Uwe Reiter</i>		
4.1	Introduction	63
4.2	Extension to the network model	64
4.3	Extension to analysis procedures	66
4.4	Conclusion	72
5		
The potential impact of automated data collection systems on urban public transport planning		75
<i>Nigel EM. Wilson, Jinhua Zhao, Adam Rahbee</i>		
5.1	Introduction	76
5.2	Public transport agency functions	76
5.3	Automated Data Collection Systems	78
5.4	ADCS - Potential and Reality	81
5.5	CTA rail OD matrix inference and analysis	84
5.6	Rail path choice modeling	90
5.7	Conclusion	97
6		
Using automated fare collection data, GIS, and dynamic schedule queries to improve transit data and transit assignment model		101
<i>Howard Slavin, Andres Rabinowicz, Jonathan Brandon, Giovanni Flammia, Robert Freimer</i>		
6.1	Introduction	101
6.2	AFC data processing	104
6.3	Using AFC Data to Improve Transit Assignments	114

7

Large-scale schedule-based transit assignment - further optimization of the solution algorithms	119
---	-----

Otto A. Nielsen, Ramsus D. Frederiksen

7.1	Introduction	119
7.2	Components of Schedule-Based models	120
7.3	Model platform	127
7.4	Optimization of the solution algorithm	130
7.5	Discussion and conclusion	140

Schedule-based transit assignment: new dynamic equilibrium model with vehicle capacity constraints	145
--	-----

Natale Papola, Francesco Filippi, Guido Gentile, Lorenzo Meschini

8.1	Introduction	146
8.2	Transit network formalization	148
8.3	The Arc Performance Model	151
8.4	The Network Loading Map	156
8.5	The Dynamic User Equilibrium Model	161
8.6	Solution algorithm	162
8.7	Numerical applications	166

9

MILATRAS: a new modeling framework for the transit assignment problem	171
---	-----

Mohamed Wahba, Amer Shalaby

9.1	Introduction	171
9.2	The complexity of the transit assignment problem	172
9.3	MILATRAS - An integrated modelling framework	173
9.4	Applications	190
9.5	Conclusions	192

10

Simulation-based evaluation of Advanced Public Transportation Information Systems (APTIS)	195
---	-----

Pierluigi Coppola, Luca Rosati

10.1	Introduction	195
10.2	Modeling architecture	197
10.3	Simulation laboratory	204
10.4	Case study	209
10.5	Conclusions	213

11		
The build-up of capacity problems during the peak hour		217
<i>Jan-Dirk Schmocker, Michael G.H. Bell</i>		
11.1	Introduction	217
11.2	The frequency and Schedule-Based approach	218
11.3	Dynamic capacity constrained transit assignment	223
11.4	London case study	231
11.5	Conclusions	236

FREIGHT TRANSPORTATION MODELS AND APPLICATIONS

12		
Schedule-based passenger and freight mode choice models for ex-urban trips		241
<i>Ennio Cascetta, Vittorio Marzano, Andrea Papola</i>		
12.1	Introduction	241
12.2	Passenger interurban mode choice models	242
12.3	Freight interurban mode choice models	244
12.4	Conclusions	248
13		
A schedule-based methodology proposal for Sea Motorways feasibility evaluation		251
<i>Dario Aponte, Fedele Iannone, Andrea Papola</i>		
13.1	Introduction	251
13.2	The methodology's phases	252
13.3	Supply analysis	253
13.4	Demand Analysis	257
13.5	Financial-economic analysis of the service	262
13.6	Conclusions	264
14		
Estimation of target time distribution for agri-food products by road transport		267
<i>Francesco Russo, Antonino Vitetta, Antonio Comi</i>		
14.1	Introduction	267
14.2	State of the art	268
14.3	Departure time estimation	273
14.4	Experimentation in a real case	275
14.5	Conclusions	281

15

A macroscopic model of a container terminal based on diachronic networks 285

Stefano de Luca, Giulio E. Cantarella, Armando Carteni

15.1 Introduction 285

15.2 The proposed approach 288

15.3 Application 304

15.4 Conclusions 309

Index 311
