## Fuzzy Systems

|                                                                                                                |    |
|----------------------------------------------------------------------------------------------------------------|----|
| A New Perspective on Reasoning with Fuzzy Rules . . . . .                                                      | 1  |
| <i>D. Dubois, H. Prade, L. Ughetto</i>                                                                         |    |
| On Interpretability of Fuzzy Models . . . . .                                                                  | 12 |
| <i>T. Furuhashi</i>                                                                                            |    |
| Degree of Similarity in Fuzzy Partition . . . . .                                                              | 20 |
| <i>R. Intan, M. Mukaidono</i>                                                                                  |    |
| Fuzzy Set in Default Reasoning . . . . .                                                                       | 27 |
| <i>S. Raha, S. Hossain</i>                                                                                     |    |
| Interpolation in Hierarchical Rule-Bases with Normal Conclusions . . . . .                                     | 34 |
| <i>L.T. Kóczy, L. Muresan</i>                                                                                  |    |
| The Dempster-Shafer Approach to Map-Building<br>for an Autonomous Mobile Robot with Fuzzy Controller . . . . . | 40 |
| <i>Y.-C. Kim, S.-B. Cho, S.-R. Oh</i>                                                                          |    |
| The Fuzzy Model for Aircraft Landing Control . . . . .                                                         | 47 |
| <i>S. Ionita, E. Sofron</i>                                                                                    |    |
| Implementation of Nonlinear Fuzzy Models Using Microcontrollers . . . . .                                      | 55 |
| <i>S. Himavathi, B. Umamaheswari</i>                                                                           |    |
| A Gain Adaptive Fuzzy Logic Controller . . . . .                                                               | 62 |
| <i>R.K. Mudi, K. Majumdar, C. Dey</i>                                                                          |    |
| A Traffic Light Controlling FLC Considering the Traffic Congestion . . . . .                                   | 69 |
| <i>W.K. Choi, H.S. Yoon, K. Kim, I.Y. Chung, S.J. Lee</i>                                                      |    |
| Vehicle Routing, Scheduling and Dispatching System<br>Based on HIMS Model . . . . .                            | 76 |
| <i>K. Hirota, F. Dong, K. Chen, Y. Takama</i>                                                                  |    |
| Similarity between Fuzzy Multi-objective Control and Eligibility . . . . .                                     | 85 |
| <i>H.-C. Myung, Z.Z. Bien</i>                                                                                  |    |
| A Fuzzy Goal Programming Approach<br>for Solving Bilevel Programming Problems . . . . .                        | 91 |
| <i>B.N. Moitra, B.B. Pal</i>                                                                                   |    |

|                                                                                                |    |
|------------------------------------------------------------------------------------------------|----|
| Material Handling Equipment Selection<br>by Fuzzy Multi-criteria Decision Making Methods ..... | 99 |
| <i>S.K. Deb, B. Bhattacharyya, S.K. Sorkhel</i>                                                |    |

## Soft Computing – Theory and Applications

|                                                                                                   |     |
|---------------------------------------------------------------------------------------------------|-----|
| The Rough Set View on Bayes' Theorem .....                                                        | 106 |
| <i>Z. Pawlak</i>                                                                                  |     |
| Verbalizing Computers – A Way to Everyday Language Computing .....                                | 117 |
| <i>M. Sugeno</i>                                                                                  |     |
| Soft Computing Based Emotion/Intention Reading for Service Robot .....                            | 121 |
| <i>Z.Z. Bien, J.-B. Kim, D.-J. Kim, J.-S. Han, J.-H. Do</i>                                       |     |
| Generalization of Rough Membership Function<br>Based on $\alpha$ -Coverings of the Universe ..... | 129 |
| <i>R. Intan, M. Mukaidono</i>                                                                     |     |
| A Class of Quantitative-Qualitative Measures of Directed-Divergence .....                         | 136 |
| <i>H.C. Taneja</i>                                                                                |     |
| $(\alpha, \beta)$ Reduction of Decision Table: A Rough Approach .....                             | 141 |
| <i>S. Ghosh, S.S. Alam</i>                                                                        |     |
| Wavelet Transform Based Fuzzy Inference System<br>for Power Quality Classification .....          | 148 |
| <i>A.K. Tiwari, K.K. Shukla</i>                                                                   |     |
| A Fuzzy-Neural Technique for Flashover Diagnosis<br>of Winding Insulation in Transformers .....   | 156 |
| <i>A. De, N. Chatterjee</i>                                                                       |     |
| Feature Identification for Fuzzy Logic Based Adaptive Kalman Filtering ..                         | 163 |
| <i>A. Mukherjee, P.P. Adhikari, P.K. Nandi</i>                                                    |     |
| Soft-Biometrics: Soft-Computing Technologies<br>for Biometric-Applications .....                  | 171 |
| <i>K. Franke, J. Ruiz-del-Solar</i>                                                               |     |
| Comparative Study between Different Eigenspace-Based Approaches<br>for Face Recognition .....     | 178 |
| <i>P. Navarrete, J. Ruiz-del-Solar</i>                                                            |     |
| Static Signature Verification Employing a Kosko-Neuro-fuzzy Approach ...                          | 185 |
| <i>K. Franke, Y.-N. Zhang, M. Köppen</i>                                                          |     |

|                                                                                                                                                           |     |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| A Control Analysis of Neuronal Information Processing:<br>A Study of Electrophysiological Experimentation<br>and Non-equilibrium Information Theory ..... | 191 |
| <i>P.K. Roy, J.P. Miller, D. Dutta Majumder</i>                                                                                                           |     |

## Neural Networks

|                                                                                                    |     |
|----------------------------------------------------------------------------------------------------|-----|
| Modeling of Nonlinear Systems by Employing Self-Organization<br>and Evaluation – SOR Network ..... | 204 |
| <i>T. Yamakawa, K. Horio</i>                                                                       |     |
| Characterization of Non-linear Cellular Automata Model<br>for Pattern Recognition .....            | 214 |
| <i>N. Ganguly, P. Maji, A. Das, B.K. Sikdar, P. Pal Chaudhuri</i>                                  |     |
| On Convergence of a Neural Network Model Computing MSC .....                                       | 221 |
| <i>S.K. Parui, A. Datta</i>                                                                        |     |
| Recognition of Handprinted Bangla Numerals<br>Using Neural Network Models .....                    | 228 |
| <i>U. Bhattacharya, T.K. Das, A. Datta, S.K. Parui, B.B. Chaudhuri</i>                             |     |
| Optimal Synthesis Method for Binary Neural Network Using NETLA.....                                | 236 |
| <i>S.-K. Sung, J.-W. Jung, J.-T. Lee, W.-J. Choi, S.-J. Ji</i>                                     |     |
| A Neural Network Based Seafloor Classification<br>Using Acoustic Backscatter .....                 | 245 |
| <i>B. Chakraborty</i>                                                                              |     |

## Neuro-fuzzy Systems

|                                                                                                  |     |
|--------------------------------------------------------------------------------------------------|-----|
| Designing Rule-Based Classifiers with On-Line Feature Selection:<br>A Neuro-fuzzy Approach ..... | 251 |
| <i>D. Chakraborty, N.R. Pal</i>                                                                  |     |
| Decomposed Neuro-fuzzy ARX Model .....                                                           | 260 |
| <i>M. Golob, B. Tovornik</i>                                                                     |     |
| Weather Forecasting System Based on Satellite Imageries<br>Using Neuro-fuzzy Techniques .....    | 267 |
| <i>C.-W. Tham, S.-H. Tian, L. Ding</i>                                                           |     |
| Evolutionary Subsethood Product Fuzzy Neural Network .....                                       | 274 |
| <i>C.S. Velayutham, S. Paul, S. Kumar</i>                                                        |     |
| VSS Learning Based Intelligent Control of a Bioreactor System .....                              | 281 |
| <i>U. Yildiran, O. Kaynak</i>                                                                    |     |

## Pattern Recognition

|                                                                                                  |     |
