# Portfolio Selection and Asset Pricing

Springer

Technische Universität Darmstadt

Fachbereich 1

Betriebswirtschaftliche Bibliothek

Inventar-Nr.: 53.291

Abstell-Nr.: A 22 / 1185

00 348 577

Contents

1. Criteria, Models and Strategies in Portfolio Selection.....1

1.1 Introduction.....1

1.2 Mean and Variance as Return and Risk.....2

1.2.1 Markowitz formulation of portfolio optimization.....2

1.2.2 Supporting evidence for Markowitz model.....4

1.2.3 Index models.....5

1.2.4 Mean-semivariance model.....6

1.2.5 Mean absolute deviation model.....7

1.2.6 Mean target model.....8

1.2.7 Mean-variance-skewness model.....8

1.2.8 Multi-objective optimization methods.....9

1.3 Different Criteria for Risk and Return.....10

1.3.1 Baumol's confidence limit criterion.....11

1.3.2 Minimizing probability of specified risk.....11

1.3.3 Three stochastic dominance criteria.....12

1.3.4 Entropy as a measure of risk.....13

1.3.5 Maximizing the geometric mean return.....14

1.4 Best in the Worst Case or in the Average.....15

1.4.1 Competitive analysis.....15

1.4.2 Scenario analysis.....16

1.4.3 Tracking models.....17

1.4.4 Two person game models.....18

1.5 Multiple Stage Models.....18

1.5.1 Capital growth theory.....19

- 1.5.2 Flip-flop across time.....19
  - 1.5.3 Optimal portfolios with asymptotic criteria.....20
  - 1.5.4 Multi-stage stochastic linear portfolio selection model.....20
  - 1.5.5 Consumption-investment optimization.....21
  - 1.5.6 Universal portfolio.....21
  - 1.6 Remarks and Discussions.....22
- 2. A Model for Portfolio Selection with Order of Expected Returns.....23**
  - 2.1 Introduction.....23
  - 2.2 Model.....24
  - 2.3 Order of Expected Returns.....27
  - 2.4 Genetic Algorithm.....28
  - 2.5 A Numerical Example.....31
  - 2.6 Portfolio Selection with Transaction Costs.....34
  - 2.7 Conclusions.....37
- 3. A Compromise Solution to Mutual Funds Portfolio Selection with Transaction Costs.....39**
  - 3.1 Introduction.....39
  - 3.2 Structure of Returns and Transaction Costs.....40
  - 3.3 Compromise Solution.....43
  - 3.4 Extension of the Compromise Solution.....48
  - 3.5 Properties of the Compromise Solution.....48
  - 3.6 A Numerical Example.....49
  - 3.7 Conclusions.....54
- 4. Optimal Portfolio Selection of Assets with Transaction Costs and No Short Sales.....55**
  - 4.1 Introduction.....55
  - 4.2 General Model Framework.....56
  - 4.3 Solution Properties.....59
  - 4.4 An Interactive Method.....67
  - 4.5 Conclusions.....72
- 5. Portfolio Frontier with Different Interest Rates for Borrowing and Lending..... 73**
  - 5.1 Introduction.....73
  - 5.2 Preliminaries.....75

|                                                                           |            |
|---------------------------------------------------------------------------|------------|
| 5.2.1 Portfolio frontier without riskless asset.....                      | 75         |
| 5.2.2 General model.....                                                  | 77         |
| 5.2.3 Case of the same interest rate.....                                 | 78         |
| 5.3 Portfolio Frontier with Different Interest Rates.....                 | 81         |
| 5.3.1 Solution to (QP1).....                                              | 82         |
| 5.3.2 Solution to (QP 2).....                                             | 92         |
| 5.3.3 Case of $r_b > r_l$ .....                                           | 95         |
| 5.4 Conclusions.....                                                      | 103        |
| <b>6. Multi-period Investment.....</b>                                    | <b>105</b> |
| 6.1 Introduction.....                                                     | 105        |
| 6.2 Multi-period Investment Models.....                                   | 106        |
| 6.2.1. Multi-period consumption and portfolio models.....                 | 106        |
| 6.2.1.1 Discrete time multi-period portfolio selection.....               | 106        |
| 6.2.1.2 Continuous time case.....                                         | 107        |
| 6.2.2. Multi-period portfolio selection models.....                       | 108        |
| 6.2.3. Multi-period asset and liability management.....                   | 108        |
| 6.3 Empirical Results for Multi-period Stochastic Programming Models..... | 109        |
| 6.3.1. Discrete multi-period asset allocation problem.....                | 109        |
| 6.3.1.1 Risk averseness behavior results.....                             | 115        |
| 6.3.1.2 Risk seeking behavior results.....                                | 117        |
| 6.3.2. Continuous multi-period asset allocation problem.....              | 119        |
| 6.3.2.1 Piece-wise linear utility function.....                           | 120        |
| 6.3.2.2 Quadratic utility function.....                                   | 123        |
| 6.3.2.3 Cubic utility function.....                                       | 124        |
| 6.3.2.4 Exponential utility function.....                                 | 125        |
| 6.4 Conclusions.....                                                      | 127        |
| <b>7. Mean-Variance-Skewness Model for Portfolio Selection</b>            |            |
| <b>with Transaction Costs.....</b>                                        | <b>129</b> |
| 7.1 Introduction.....                                                     | 129        |
| 7.2 Mean-Variance-Skewness Model.....                                     | 131        |
| 7.3 An Approximate Model.....                                             | 134        |
| 7.4 A Numerical Example.....                                              | 141        |
| 7.5 Conclusions.....                                                      | 144        |
| <b>8. Capital Asset Pricing: Theory and Methodologies.....</b>            | <b>145</b> |

|                                                                  |            |
|------------------------------------------------------------------|------------|
| 8.1 Introduction.....                                            | 145        |
| 8.2 The Capital Asset Pricing Model.....                         | 146        |
| 8.3 Nonstandard Forms of Capital Asset Pricing Models.....       | 149        |
| 8.3.1 Modifications of riskless lending and borrowing.....       | 149        |
| 8.3.1.1 No riskless lending or borrowing.....                    | 149        |
| 8.3.1.2 Riskless lending but no riskless borrowing.....          | 150        |
| 8.3.2 Different holding periods.....                             | 150        |
| 8.3.3 Personal taxes.....                                        | 150        |
| 8.3.4 Non-marketable assets.....                                 | 151        |
| 8.3.5 Heterogeneous expectations.....                            | 152        |
| 8.3.6 Non-price-taking behavior.....                             | 153        |
| 8.3.7 Market frictions.....                                      | 154        |
| 8.4 Tests of CAPM.....                                           | 155        |
| 8.5 An Intertemporal Capital Asset Pricing Model.....            | 156        |
| 8.6 Consumption-Based Capital Asset Pricing Model.....           | 158        |
| 8.7 Arbitrage Pricing Model.....                                 | 159        |
| 8.8 Intertemporal Arbitrage Pricing Theory.....                  | 160        |
| 8.9 Comparison of CAPM and APT.....                              | 161        |
| 8.10 Conclusions.....                                            | 161        |
| <b>9. Empirical Tests of CAPM for China's Stock Markets.....</b> | <b>163</b> |
| 9.1 Introduction.....                                            | 163        |
| 9.2 Models.....                                                  | 164        |
| 9.2.1 Two parameter model of CAPM.....                           | 165        |
| 9.2.2 CAPM with taxes on dividends.....                          | 165        |
| 9.3 Data and Methodology.....                                    | 166        |
| 9.4 Empirical Results and Discussions.....                       | 168        |
| 9.5 Conclusions.....                                             | 175        |
| <b>References.....</b>                                           | <b>177</b> |
| <b>Subject Index.....</b>                                        | <b>193</b> |
