

Christoph Clauser (Ed.)

Numerical Simulation of Reactive Flow in Hot Aquifers

SHEMAT and Processing SHEMAT

With Contributions by

Jörn Bartels, Li Zhen Cheng, Wen-Hsing Chiang,
Christoph Clauser, Suzanne J. Hurter, Michael Kühn,
Volker Meyn, Hansgeorg Pape, Daniel RC. Pribnow,
Giorgio Ranalli, Wilfried Schneider, Heinke Stöfen

With a CD-ROM, 202 Figures, 139 in Colour, and 83 Tables

Springer

Contents

Contents.....	V
Contributing Authors.....	IX
1 Introduction.....	1
Christoph Clauser and Jörn Bartels	^
2 Numerical Simulation of Reactive Flow using SHEMAT.....	5
Jörn Bartels, Michael Kühn, and Christoph Clauser	
2.1 General.....	5
2.2 Governing Equations.....	6
2.2.1 General.....	6
2.2.1 Ground Water Flow.....	8
2.2.2 Heat Transport.....	9
2.2.3 Species Transport.....	11
2.2.4 Physical Properties.....	12
2.2.5 Chemical Reactions.....	16
2.3 Numerical Techniques.....	18
2.3.1 Finite Difference Method.....	18
2.3.2 Flow Discretization.....	19
2.3.3 Discretization Schemes for Transport of Heat and Dissolved Species.....	21
2.3.4 Equation Solver.....	25
2.3.5 Time Step Control.....	26
2.3.6 Process Coupling.....	28
2.4 Input/Output.....	32
2.4.1 General Overview.....	32
2.4.2 Control File.....	32
2.4.3 Input File.....	33
2.4.4 Output File.....	48
2.4.5 Plot Files.....	48
2.4.6 Output Grid.....	50
2.4.7 Monitoring Files.....	50
2.4.8 Run-time Information.....	51
2.5 Practical Modeling: Remarks, Explanations and Instructions.....	52
2.5.1 Problem Size.....	53
2.5.2 Remarks on Flow Input Parameters.....	53
2.5.3 Boundary Conditions and Wells.....	53
2.5.4 Time.....	54
2.5.5 Convergence.....	55
2.6 Code Verification.....	56

2.6.1 Theis Problem.....	56
2.6.2 Rotating Cone Test.....	60
2.6.3 Henry's Problem...;	64
2.6.4 Elder's problem.....	68
3 Pre- and Post-Processing with "Processing SHEMAT".....	75
Michael Kühn and Wen-Hsing Chiang	
3.1'Whatis Processing SHEMAT?.....	75
3.1.1 Professional Graphical Data Input Features.....	75
3.1.2 Sophisticated Modeling Tools.....	75
3.2 Modeling Environment.....	76
3.2.1 Units.....	76
3.2.2 Toolbar.....	77
3.2.3 Grid Editor.....	78
3.2.4 Data Editor.....	82
3.2.5 Value.....	87
3.2.6 Options.....	91
3.3 Menü System.....	99
3.3.1 File.....	99
3.3.2 Grid.....	101
3.3.3 Type.....	103
3.3.4 Time.....	107
3.3.5 Flow.....	110
3.3.6 Heat.....	115
3.3.7 Transport.....	118
3.3.8 Reaction.....	121
3.3.9 Models.....	128
3.3.10 Tools.....	131
3.3.11 Help.....	153
4 Advanced Features.....	153
Michael Kühn and Hansgeorg Pape	
4.1 Chemical Equilibrium Speciation for Brines at High Temperatures and Ionic Strength.....	153
4.1.1 Activity calculations.....	154
4.1.2 Comparison of the Pitzer and Debye-Hückel Models.....	157
4.1.3 Chemical Module based on Pitzer's Equations.....	158
4.1.4 Specification of the Chemical Module.....	163
4.2 Fractal Relation Between Porosity and Permeability: Theory and Verification.....	171
4.2.1 Introduction.....	171
4.2.2 Permeability Derived from Pore Space Models.....	172
4.2.3 Exponents in the Relationship between Porosity and Permeability Implemented in SHEMAT.....	187

5 Tutorial for "Processing SHERAT"	189
Heinke Stöfen and Michael Kühn	
5.1 Introduction.....	189
5.1.1 General Information.....	189
5.1.2 How to use this Tutorial.....	189
5.1.3 Description of the Example Problem.....	190
5.2 Creating a Fluid Flow, Heat Transfer, and Solute Transport Model...	191
5.2.1 Generating a New Model.....	191
5.2.2 Defining the Flow Parameters.....	202
5.2.3 Defining the Heat Parameters.....	204
5.2.4 Defining the Transport Parameters.....	205
5.2.5 Running Models and Visualizing Results.....	207
5.3 Using the Geochemical Reaction Module.....	210
5.3.1 General Information.....	210
5.3.2 Refining the Model Grid.....	210
5.3.3 Defining the Reaction Parameters.....	213
5.3.4 Running Geochemical Reaction Models and Visualizing Results	216
5.4 Expanding the Model to Three Dimensions.....	217
5.4.2 Defining the additional Model Parameters.....	218
5.4.3 Running 3-D Models and Visualizing Results.....	223
6 Applications.....	229
Jörn Bartels, Li Zhen Cheng, Christoph Clauser, Suzanne Hurter, Michael Kühn, Volker Meyn, Daniel Pribnow, Giorgio Ranalli, Wilfried Schneider, Heinke Stöfen	
6.1 Development of a Preferential Flow Path in an Anhydrite Cemented Sandstone: Numerical Simulation of a Core Flooding Experiment	231
Michael Kühn	
6.1.1 Problem description.....	231
6.1.2 Laboratory core flooding experiment.....	232
6.1.3 Concept and conditions for preferential flow path development.	233
6.1.4 Model description and assumptions.....	233
6.1.5 Results and Discussion.....	239
6.1.6 Conclusion.....	240
6.2 Modeling Flooding of a Sandstone Core with Reactive Transport and Subsequent Changes in Porosity and Permeability.....	243
Jörn Bartels, Michael Kühn, Christoph Clauser and Volker Meyn	
6.2.1 Problem description and experimental data.....	243
6.2.2 Model Description and Assumptions.....	247
6.2.4 Results and Discussion.....	250
6.3 Injection Well with Reaction Kinetics.....	253
Michael Kühn and Wilfried Schneider	
6.3.1 Problem description.....	253
6.3.2 Model description and assumptions.....	254
6.3.3 Results and Discussion.....	258

6.3.4 Conclusion.....	262
6.4 Magmatic Intrusions in Long Valley Caldera.....	263
Suzanne Hurter	
6.4.1 Long Valley Caldera: introduction and regional setting.....	263
6.4.2 Model description and assumptions.....	264
6.4.3 Steady-state Conductive Models.....	269
6.4.4 Transient Models of Heating and Cooling.....	273
6.4.5 Discussion.....	274
6.5 Rhine Graben Cross Section.....	277
Daniel Pribnow	
6.5.1 Rhine Graben: Introduction and regional setting.....	277
6.5.2 Temperature Data Across the Upper Rhine Graben.....	278
6.5.3 Model description and assumptions.....	279
6.5.4 Results and Discussion.....	280
6.5.5 Discussion.....	283
6.6 Thermal Transect of Continental Lithosphere in Canada.....	287
Li Zhen Cheng and Giorgio Ranalli	
6.6.1 Problem description..... <i>t</i>	287
6.6.2 Temperature in the lithosphere: a matter of uncertainty.....	288
6.6.3 Model description.....	290
6.6.4 Results and discussion.....	293
6.7 Waiwera Coastal Geothermal System.....	297
Heinke Stöfen and Michael Kühn	
6.7.1 Problem description.....	297
6.7.2 Observations.....	299
6.7.3 Model description and assumptions.....	302
6.1.4 Results and Discussion.....	311
6.7.5 Conclusions.....	316
References.....	317
Index.....	331
