

IUTAM Symposium on

Theoretical and Numerical Methods in Continuum Mechanics of Porous Materials

Proceedings of the IUTAM Symposium
held at the University of Stuttgart, Germany,
September 5–10, 1999

Edited by

WOLFGANG EHLERS

*Institute of Applied Mechanics,
University of Stuttgart, Germany*

KLUWER ACADEMIC PUBLISHERS

DORDRECHT / BOSTON / LONDON

CONTENTS

Preface	xi
Sponsors	xiii
List of Participants	xv

Session A1: Opening

Introduction to the Porous Media Theory <i>R. de Boer</i>	3
2-D Localization Analysis of Saturated Porous Media <i>B. A. Schrefler and H. W. Zhang</i>	13

Session A2: Constitutive Modelling

Evolution of the Volume Fractions in Compressible Porous Media <i>S. Diebels</i>	21
Constitutive Relations for Thermo-Elastic Porous Solid within the Framework of Finite Deformations <i>J. Bluhm</i>	27
A Generalized Cam-Clay Model <i>S. Krenk</i>	33

Session A3: Experiments and Parameter Identification

Theoretical and Experimental Investigation into Mechanical Properties of High Density Foam Plastics <i>Z. Lu, Z. Gao and R. Wang</i>	41
A Unified Sensitivity Analysis Approach for Parameter Identification of Material Models in Fluid-Saturated Porous Media <i>R. Mahnken and P. Steinmann</i>	51

Session A4: Numerical Aspects

Numerical Solution of Soil Freezing Problem by a New Finite Element Scheme <i>J. Hartikainen and M. J. Mikkola</i>	61
--	----

Space-Time Finite Elements and Adaptive Strategy for the Coupled Poroelasticity Problem <i>K. Runesson, F. Larsson and P. Hansbo</i>	67
--	----

Poster Session A

Packed-to-Fluidized Bed Transition and Origin of Particle- Free Regions <i>A. K. Didwania</i>	75
<i>h</i> -Adaptive Strategies Applied to Multi-Phase Models <i>W. Ehlers, P. Ellsiepen and M. Ammann</i>	81
A Viscoelastic Two-Phase Model for Cartilage Tissues <i>W. Ehlers and B. Markert</i>	87
A Poroelastic Material with a Scale Independent Pressure- Volume Relation <i>D. Elata</i>	93
Numerical Modelling of Cartilage as a Deformable Porous Medium <i>A. J. H. Frijns, E. F. Kaasschieter and J. M. Huyghe</i>	99
Numerical Description of Elastic-Plastic Behavior of Saturated Porous Media <i>J. Skolnik</i>	105

Session B1: Homogenization

Effective Physical Properties of Sandstones <i>J. Widjajakusuma and R. Hilfer</i>	113
Perspective of Computational Micro-Macro-Transition for the Postcritical Analysis of Localized Failure <i>C. Miehe and M. Lambrecht</i>	119
Micromechanics of Unsaturated Porous Media <i>X. Chateau and L. Dormieux</i>	125
Influence of Porosity on the Response of Fibrous Composites <i>S. C. Baxter, C. T. Herakovitch and A. M. Roerden</i>	131

Session B2: Biot's Theory

Non Linear Thermomechanical Couplings in Unsaturated Clay Barriers <i>P. Dangla, O. Coussy, E. Olchitzky and C. Imbert</i>	139
--	-----

Porothermoelasticity in Transversely Isotropic Porous Materials <i>Y. Abousleiman and S. Ekbote</i>	145
Constitutive Description of Fluid-Porous Solid Immiscible Mixtures. Derivation of the Effective Stress-Strain Relation <i>J. Kubik and M. Cieszko</i>	153

Session B3: Flow in Porous Media

Two-Phase Flow Modelling of Flood Defense Structures <i>M. Paul, R. Hinkelmann, H. Sheta and R. Helmig</i>	163
A Sand Erosion Problem in Axial Flow Conditions on the Ex- ample of Contact Erosion due to Horizontal Groundwater Flow <i>A. Scheuermann, I. Vardoulakis, P. Papanastasiou and M. Stavropoulou</i>	169

Session B4: Waves in Porous Media I

Rayleigh Waves in Porous Media Saturated with Liquid <i>A. A. Gubaidullin and O. Y. Kuchugurina</i>	179
Geometry Effects on Sound in Porous Media <i>A. Cortis, D. M. J. Smeulders, D. Lafarge, M. Firdaouss and J. L. Guermond</i>	187
Mechanics of Liquefaction in Saturated Granular Soils <i>A. Sawicki</i>	193

Poster Session B

Fluid Mechanics in Minkowski Space. Modelling of Fluid Motion in Porous Materials with Anisotropic Pore Space Structure <i>M. Cieszko</i>	201
Modelling of Soils by Use of the Theory of Porous Media <i>W. Ehlers and P. Blome</i>	209
Integration and Calibration of a Plasticity Model for Granular Materials <i>L. Jacobsson and K. Runesson</i>	215
Mechanical Properties of Modified Wood <i>S. J. Kowalski and L. Kyziol</i>	221
Water Transport in Phase-Changing Snowpacks <i>S. Sellers</i>	229

Session C1: Localization

Modelling of Localisation at Finite Inelastic Strains in Fluid Saturated Porous Media <i>L. Sanavia, B. A. Schrefler, E. Stein and P. Steinmann</i>	239
Influence of Density and Pressure on Spontaneous Shear Band Formations in Granular Materials <i>E. Bauer and W. Huang</i>	245
Localization Analysis of a Saturated Elastic Plastic Porous Medium Based on Regularized Discontinuity <i>R. Larsson and J. Larsson</i>	251

Session C2: Extended Models

Shear Band Localization in Frictional Geomaterials: Basic Modelling and Adaptive Computations <i>W. Ehlers and P. Ellsiepen</i>	259
Analysis of Instability Conditions for Normally Consolidated Soils <i>R. Nova and S. Imposimato</i>	265
Structure and Elastic Properties of Reinforced Cellular Plastics <i>J. Brauns</i>	273

Session D1: Micromechanics

Effective Stress and Capillary Pressure in Unsaturated Porous Media <i>A. K. Didwania</i>	281
Porous Medium Mechanics and the Skin Barrier <i>J. M. Huyghe, P. M. van Kemenade, L. F. A. Douven and P. H. M. Bovendeerd</i>	287
Discrete Element Modelling of Compaction of Cylindrical Powder Particles <i>P. Redanz and N. A. Fleck</i>	293

Session D2: Fracture and Damage

Modeling of In-Situ Solution Mining Processes <i>H.-B. Mühlhaus, J. Liu and B. E. Hobbs</i>	301
--	-----

Coupling of Damage and Fluid-Solid Interactions in Quasi-Brittle Unsaturated Porous Materials <i>J. Carmeliet</i>	307
--	-----

An Influence of Initial Porosity on Damage Process in Semi-Brittle Polycrystalline Ceramics under Compression <i>T. Sadowski and S. Samborski</i>	313
--	-----

Session D3: Swelling, Drying and Shrinkage

The Physical Role of Crack Rate Dependence in the Long-Term Behaviour of Cementitious Materials <i>G. P. A. G. van Zijl, J. G. Rots and R. de Borst</i>	321
--	-----

Macroscopic Swelling of Clays Derived from Homogenization <i>C. Moyne and M. Murad</i>	329
---	-----

Extending Griffiths Theory to Cohesive Types of Dried Materials <i>S. J. Kowalski and K. Rajewska</i>	335
--	-----

Session D4: Waves in Porous Media II

Reflection and Transmission of Waves at a Fluid/Porous-Medium Boundary <i>A. I. M. Denneman, G. G. Drijkoningen, D. M. J. Smeulders and C. P. A. Wapenaar</i>	343
--	-----

Poroelasto-Electric Longitudinal Waves in Porous Wet Long Bones - a Transmission Line Model <i>R. Uklejewski</i>	351
---	-----

Scattering of SH-Waves by a Porous Slab - Approximate Solution <i>Y. C. Angel and A. R. Aguiar</i>	357
---	-----

Session D5: Applications

A Three-Dimensional Nonlinear Model for Soil Consolidation <i>R. Lancellotta, G. Musso and L. Preziosi</i>	365
---	-----

Poster Session D

Drying Induced Stresses in Viscoelastic Sphere <i>J. Banaszak and S. J. Kowalski</i>	381
---	-----

Settlements of Sand due to Cyclic Twisting of a Tube <i>R. Cudmani and G. Gudehus</i>	387
Studies of Rayleigh Scattering of Longitudinal Waves in Saturated Porous Materials <i>J. Kubik, M. Kaczmarek and J. Kochanski</i>	397
A Thermomechanical Model for Partially Saturated Expansive Clay <i>A. J. Lempinen</i>	403
Constitutive Modeling of Charged Porous Media <i>M. M. Molenaar, J. M. Huyghe and F. P. T. Baaijens</i>	409
Damage of Porous Materials during Drying <i>G. Musielak</i>	415
Author Index	421
