Stefan Spinier

# Capacity Reservation for Capital-Intensive Technologies

## An Options Approach

Springer

# Table of Contents

**Introduction** . . . . . **1**

**Literature Review** . . . . . 5
2.1 Insights from the Options Literature . . . . . 5
2.1.1 Financial Derivatives . . . . . 6
2.1.2 Real Options . . . . . 6
2.1.3 Valuation of Real Options . . . . . 8
2.2 Supply Contracts . . . . . 9
2.2.1 Pricing Issues . . . . . 10
2.2.2 Long-Term Investment vs. Short-Term Flexibility . . . . . 12
2.2.3 Contractual Flexibility . . . . . 16
2.3 Management of Demand Uncertainty . . . . . 20
2.3.1 Joint Production and Capacity Planning . . . . . 21
2.3.2 Revenue Management . . . . . 22
2.4 Summary . . . . . 25

**The Valuation of Options on Capacity** . . . . . 27
3.1 Market Set-Ups in Theory and Practice . . . . . 28
3.2 Analytical Tools . . . . . 29
3.2.1 Decision Making under Risk: Expected Utility Theory 29
3.2.2 Game-Theoretic Analysis . . . . . 31
3.2.3 Dynamic Programming . . . . . 32
3.2.4 Multi-Variate Optimization . . . . . 33
3.3 Assumptions on the Contract and the Spot Market . . . . . 34
3.4 The Buyer's Problem . . . . . 37
3.4.1 Assumptions on the Buyer . . . . . 37
3.4.2 State-Contingent Contract and Spot Consumption . . . . 39
3.4.3 Optimal Reservation Policy . . . . . 41
3.4.4 The Case of Affine Separable Utility . . . . . 44
3.4.4.1 Perfect Correlation between Spot Price and Utility . . . . . 46
3.4.4.2 Non-Perfect Correlation between Spot Price and Utility . . . . . 53
3.5 The Seller's Problem . . . . . 64
3.5.1 Assumptions About the Seller . . . . . 64

3.5.2 The Seller's Expected Profit . . . 66
3.5.3 The Case of Affine Separable Utility . . . 66
3.5.3.1 Perfect Correlation between Spot Price and Buyer's Utility . . . 66
3.5.3.2 Non-Perfect Correlation between Spot Price and Buyer's Utility . . . 71
3.6 Equilibrium Quantity . . . 74
3.6.1 Perfect Correlation between Spot Price and Buyer's Utility . . . 74
3.6.1.1 Case A: Full Options Execution . . . 74
3.6.1.2 Case B: Partial Options Execution . . . 74
3.6.2 Non-Perfect Correlation between Spot Price and Buyer's Utility . . . 75
3.6.2.1 Case A: Full Options Execution . . . 75
3.6.2.2 Case B: Partial Options Execution . . . 77
3.6.2.3 Full vs. Partial Options Execution . . . 77
3.7 Welfare Properties . . . 77
3.7.1 Forward Market . . . 78
3.7.1.1 The Buyer's Problem . . . 78
3.7.1.2 The Seller's Problem . . . 79
3.7.1.3 Equilibrium Quantity . . . 80
3.7.2 Welfare Comparison: Options vs. Forwards . . . 81
3.7.3 Welfare Comparison: Options vs. Spot Market Only . . . 82
3.8 Conditions for Trade . . . 83
3.9 Summary . . . 85

**4 Extensions to the Option Valuation Model . . . 87**
4.1 State-Contingent Execution Fee . . . 88
4.1.1 Slowly Rising Execution Fee . . . 88
4.1.1.1 The Buyer's Problem . . . 88
4.1.1.2 The Seller's Problem . . . 90
4.1.1.3 Equilibrium Quantity . . . 91
4.1.1.4 Welfare Properties . . . 91
4.1.1.5 Conditions for Trade . . . 92
4.1.2 Steeply Rising Execution Fee . . . 92
4.1.2.1 The Buyer's Problem . . . 93
4.1.2.2 The Seller's Problem . . . 94
4.1.2.3 Equilibrium Quantity . . . 94
4.1.3 Further Scenarios . . . 95
4.2 Competing Technology . . . 96
4.2.1 Competing Technology Part of Total Consumption Portfolio . . . 97
4.2.1.1 The Buyer's Problem . . . 97
4.2.1.2 The Seller's Problem . . . 100
4.2.2 Competing Technology Supplementary . . . 101

4.2.2.1 The Buyer's Problem . . . 101
4.3 Limited Sourcing in the Spot Market . . . 103
4.3.1 Case S: Spot Market Size Matters . . . 105
4.3.2 Synopsis of Cases S, A and B . . . 107
4.4 Summary . . . 108

**5 Managerial Insights and Conclusion** . . . 109
5.1 The Role of Derivative Markets . . . 110
5.1.1 Hedging, Speculation and Strategic Action . . . 110
5.1.2 Informational Role . . . 112
5.2 Roles for Markets for Real Assets . . . 112
5.2.1 Capitalize on Early Information . . . 112
5.2.2 Enable Demand Information Sharing . . . 113
5.2.3 Improve Capacity Planning and Allocation . . . 113
5.2.4 Elicit Willingness-to-Pay . . . 114
5.2.5 Risk-Sharing between Buyer and Seller . . . 115
5.3 Applications in the Industry . . . 115
5.3.1 Air Cargo Industry . . . 116
5.3.2 Electricity Industry . . . 119
5.3.3 Tourism Industry . . . 121
5.4 Conclusion and Outlook . . . 121
5.4.1 The Model as a Cornerstone for Further Research . . . . 121
5.4.2 Implications for Empirical Analysis . . . 122
5.4.3 Enhancement via Simulation . . . 123
5.4.4 Towards an Integrated Risk Management . . . 124
