## Performance Analysis and Optimization of Inbound Call Centers

## Contents

Intr	oducti	ion	1	
Cha	racter	ization of Inbound Call Centers	3	
2.1	What	is an Inbound Call Center?	3	
2.2	Performance Measures and Objective Functions			
	2.2.1	Technical Performance Measures	5	
	2.2.2	Economic Performance Measures	. 8	
	2.2.3	Objective Functions for Operational Planning	.11	
2.3	Opera	tional Personnel Planning in Inbound Call Centers.	.12	
	2.3.1	Main Tasks of Operational Personnel Planning.	.12	
	2.3.2	Call Forecasting	.13	
	2.3.3	Weekly Personnel Scheduling	.15	
		2.3.3.1 Current Planning Process in Practice	.15	
		2.3.3.2 Agent Requirements Planning	.16	
		2.3.3.3 Shift Scheduling and Rostering	.18	
		2.3.3.4 A Simultaneous Planning Approach	.19	
Cla	ssificat	tion of Queueing Models of Inbound Call Centers	21	
3.1	Chara	cteristics of Queueing Models of Call Centers.	21	
3.2	Classification by Customers and Agents			
	3.2.1	Arrival Process	. 22	
	3.2.2	Waiting Behavior	23	
	3.2.3	Distribution of Service Time	24	
	3.2.4	Homogeneity of Customers and Agents		
3.3	Routi	ng Decisions in Call Centers	. 28	
	3.3.1	Overview	28	
	3.3.2	Customer Selection	. 29	
	3.3.3	Agent Selection	31	
3.4	Limit	ation of the Waiting Room	32	
3.5	Revie	w of the Literature	37	
	3.5.1	Overview	37	

		3.5.2 3.5.3	Homoge Heterog 3.5.3.1 3.5.3.2	eneous Customers and Homogeneous Agents eneous Customers and Heterogeneous Agents Introduction of the M-Design The M-Design with Priority-Based Routing Policies	37 40 40 40
