

# COOPERATIVE GAMES, SOLUTIONS AND APPLICATIONS

*by*

THEO DRIESSEN

*Assistant Professor, Faculty of Applied Mathematics,  
University of Twente, The Netherlands*

KLUWER ACADEMIC PUBLISHERS

DORDRECHT / BOSTON / LONDON

## TABLE OF CONTENTS

PREFACE	v
NOTATION	xiii
CHAPTER I	
COOPERATIVE GAMES AND EXAMPLES	
1. The Tennessee Valley Authority	1
2. Cooperative games in characteristic function form	3
3. A production economy with landowners and peasants	4
4. An exchange economy with traders of two types	5
5. The airport game	6
6. The bankruptcy game	7
7. Cooperative water resource development in Japan	8
8. Simple games	9
9. Notions	11
CHAPTER II	
SOLUTION CONCEPTS FOR COOPERATIVE GAMES AND RELATED SUBJECTS	
1. Notions	13
2. The Shapley value	15
3. The stable sets	19
4. The core and the strong $\epsilon$ -cores	20
5. The bargaining set $M$	24
6. The kernel and the prekernel	26
7. The nucleolus	37
8. Balancedness	47
CHAPTER III	
THE $\tau$ -VALUE	
1. The upper vector, the concession vector and the gap function of a game	57
2. The $\tau$ -value of a quasibalanced game	59
3. Necessary and sufficient conditions for the $\tau$ -value on $QB^n$ to belong to the core	62
4. An axiomatic characterization of the $\tau$ -value on $QB^n$	70
5. 1-Convex games	73
6. Semiconvex games	76
7. The $\tau$ -value of a quasibalanced simple game	79
8. The $\tau$ -value of a game with a nonempty imputation set	81

## CHAPTER IV

A GAME THEORETIC APPROACH TO THE COST ALLOCATION PROBLEM BY MEANS OF THE  $\tau$ -VALUE, THE NUCLEOLUS AND THE SHAPLEY VALUE

1. The TVA cost allocation problem	91
2. The $\tau$ -value in comparison with cost allocation methods based on separable and nonseparable costs	92
3. The nucleolus in comparison with the egalitarian nonseparable cost method	98
4. The airport cost allocation problem	104

## CHAPTER V

## CONVEX GAMES AND SOLUTION CONCEPTS

1. Convex games	111
2. Examples of convex games	116
3. The core of a convex game	120
4. The Shapley value and the $\tau$ -value of a convex game	129
5. The stable set of a convex game	132
6. The bargaining set $M$ of a convex game	135
7. The kernel and the prekernel of a convex game	138

## CHAPTER VI

## DIVISION RULES AND ASSOCIATED GAME THEORETIC SOLUTIONS FOR BANKRUPTCY PROBLEMS

1. Introduction	145
2. The recursive completion division rule in comparison with the Shapley value	146
3. The contested garment consistent division rule in comparison with the nucleolus	151
4. The adjusted proportional division rule in comparison with the $\tau$ -value	159
5. Axiomatic characterizations of division rules in terms of self-duality	162

## CHAPTER VII

## k-CONVEX GAMES AND SOLUTION CONCEPTS

1. k-Convex games	171
2. Characterizations of k-convexity in terms of the gap function	178
3. Examples of k-convex games	184
4. The core of a k-convex game	194
5. The $\tau$ -value of a k-convex game	200
6. The Shapley value of a k-convex game	203

TABLE OF CONTENTS

xi

7. The kernel and the prekernel of a $k$ -convex game	206
8. The bargaining set $M$ of a $k$ -convex game	208
