

Uwe Meierhenrich

Amino Acids and the Asymmetry of Life

Caught in the Act of Formation

With a Foreword by Henri B. Kagan

Springer

Contents

List of Symbols and Abbreviations	xix
1 Tracing Life's Origin: From Amino Acids to Space Mission	
ROSETTA	1
1.1 The Origin of Life	1
1.2 The Asymmetry of Life	2
1.3 How Life's Asymmetry Originated	5
1.3.1 Random Mechanisms	5
1.3.2 Determinate Mechanisms	7
1.3.3 Chirogenesis in Outer Space	10
2 Stereochemistry for the Study of the Origin of Life	17
2.1 Amino Acids and Chemical Reactions: A Guided Tour	17
2.2 Optical Activity	24
2.3 Stereochemical Nomenclature	25
2.3.1 The Cahn-Ingold-Prelog Notation: <i>R</i> - and <i>S</i> -Enantiomers ...	25
2.3.2 (+)- and (-)-Enantiomers	26
2.3.3 <i>D</i> - and <i>L</i> -Enantiomers	26
2.3.4 <i>d</i> - and <i>l</i> -Enantiomorph Crystals	27
2.3.5 <i>P</i> - and <i>M</i> -Descriptors	27
2.3.6 Δ - and Λ -Descriptors	27
2.4 Optical Rotation Dispersion and Cotton Effect	28
2.5 Through the Eye of a Chromophore: CD Spectroscopy	31
2.6 Miscellaneous Techniques	34
2.7 "Chiral Light" and the Stokes Parameters	36
2.8 Chromatographic Resolution of Enantiomers	39
3 Minority Report: Life's Chiral Molecules of Opposite Handedness ...	47
3.1 Sympathy for the Devil: How <i>D</i> -Amino Acids Make Organisms Work	48
3.1.1 <i>D</i> -Amino Acids in Plants and Human Food	48
3.1.2 <i>D</i> -Amino Acids in Peptides	49
3.1.3 Do <i>D</i> -Amino Acids Affect Grey Matter?	50

3.2	The Dark Side of D-Amino Acids	51
3.3	“What Time was it?” Ask the Amino Acid Clock!	52
3.4	Biotic Origin: Were D-Life and L-Life Contemporaries?	54
3.4.1	Biotic and Selection Theories	54
3.4.2	How Polypeptides Form	55
3.4.3	Counterarguments Against the Biotic Theory	56
4	When Crystals Deliver Chirality to Life	61
4.1	Spontaneous Crystallization of Chiral Minerals	63
4.2	Heated Debate: Which Amino Acid Enantiomer Precipitates First? ..	67
4.3	Turning World: The Direction of Stirring	72
4.4	Deposits of Enantiomorphous Quartz on Earth	74
4.5	Adsorption of Chiral Organic Molecules on Enantiomorphous Crystals	76
5	When Parity Falls: The Weak Nuclear Interaction	79
5.1	The Fall of Parity: “I Couldn’t Understand It”	80
5.2	Asymmetric Radiolysis by Polarized Electrons	84
5.3	The Vester-Ulbricht Process	86
5.3.1	Circularly Polarized Bremsstrahlung in the VU Process	87
5.3.2	In Search of the Ultimate VU Experiment: California Dreaming?	88
5.3.3	What Are the Next VU Experiments?	90
5.4	Parity Non-Conserving Energy Differences	90
5.4.1	The Electroweak Interaction	91
5.4.2	Characteristics of Electromagnetic and Weak Interaction ..	92
5.4.3	Difference Matters: Energies of Enantiomers	93
5.4.4	Calculated Energy Differences of Amino Acid Enantiomers	95
5.4.5	Calculated Energy Differences of Sugar Enantiomers	97
5.4.6	Never Say Never: Measuring Parity Non-Conserving Energy Differences	99
5.4.7	Implications of Parity Non-Conserving Energy Differences .	102
6	Chiral Fields: Light, Magnetism, and Chirality	103
6.1	Magneto-Optical Effects	104
6.2	Photochirogenesis	107
6.2.1	Asymmetric Photolysis of Racemic Organic Molecules	107
6.2.2	Asymmetric Photolysis of Amino Acids	108
6.2.3	Asymmetric Photoisomerization	117
6.2.4	Asymmetric Synthesis	119
6.2.5	‘Natural’ Sources of Circularly Polarized Light	120

7	Key to the Prebiotic Origin of Amino Acids	125
7.1	Amino Acid Formation Under Atmospheric Conditions	125
7.2	Amino Acid Formation Under Hydrospheric Conditions	127
7.3	Amino Acid Formation Under Interstellar Conditions	127
7.3.1	Photochemistry in the Interstellar Medium	127
7.3.2	Simulation of Interstellar Chemistry in the Lab	128
7.3.3	Fresh in the Ice: Amino Acid Structures	131
7.3.4	Illumination with Circularly Polarized Light	140
8	A New Record for Chiral Molecules in Meteorites	145
8.1	Chiral Organic Molecules in Meteorites?	145
8.1.1	Amino Acids in Meteorites	146
8.1.2	The Untold Story of Diamino Acids in Meteorites	148
8.2	Diamino Acids as Gene Trigger	154
8.3	Survival of Organic Molecules After Impact on Earth	157
8.4	Space Exploration and Chirality: What Next?	158
9	The New Space Race: Chiral Molecules on Comets and on Mars	161
9.1	In Search of Chiral Molecules in Comets	161
9.1.1	Comet Formation: Theory and Experimental Results	162
9.1.2	ROSETTA: A Cometary Mission Full of Answers	163
9.1.3	The Chirality-Module of Mission ROSETTA	165
9.2	Chiroptical Techniques and the SETH Project	178
9.3	The Search for Chiral Molecules on Mars	179
9.3.1	Space Invaders: Traces of Life in Martian Meteorites	179
9.3.2	Chirality and Mission ExoMars	180
10	Accelerating the Carousel: Amplification Mechanisms	185
10.1	Some Amplification Needed: The Bifurcation Theory	187
10.2	Amplification by Kinetic Reaction Sequences	189
10.3	Amplification by Progressive Accumulation	194
10.4	Amplification by the Soai Reaction	195
10.5	Transfer, Memory, and Switching of Chiral Properties	197
10.6	Concluding Remarks	198
	Appendix	199
	Bibliography	207
	Index	229
