

# **MECHANISMS OF POLYMER DEGRADATION AND STABILISATION**

*Edited by*

**GERALD SCOTT**

*Professor of Polymer Science,  
Aston University,  
Birmingham, UK*

**ELSEVIER APPLIED SCIENCE**  
LONDON and NEW YORK

# Contents

Preface . . . . .	v
List of Contributors . . . . .	ix
1. A Theoretical Approach to the Optimisation of Antioxidant Action . . . . .	1
E. T. DENISOV	
2. Mechanisms of Antioxidant Action of Phosphite and Phosphonite Esters . . . . .	23
K. SCHWETLICK	
3. Antioxidant Mechanisms of Derivatives of Dithiophosphoric Acid . . . . .	61
S. AL-MALAIIKA	
4. Polymers and High-Energy Irradiation: Degradation and Stabilization . . . . .	109
D. J. CARLSSON & S. CHMELA	
5. Photodegradation and Stabilization of PPO <sup>®</sup> Resin Blends . .	135
J. E. PICKETT	

6. Photo-oxidation and Stabilization of Polyethylene . . . . .	169
F. GUGUMUS	
7. Analysis of Antioxidants and Light Stabilisers in Polymers by Modern Liquid Chromatography . . . . .	211
D. MUNTEANU	
Index . . . . .	315
