

The Chemistry of Natural Products

Second edition

Edited by

R.H. THOMSON

Emeritus Professor of Organic Chemistry
University of Aberdeen

BLACKIE ACADEMIC & PROFESSIONAL

An Imprint of Chapman & Hall

London · Glasgow · New York · Tokyo · Melbourne · Madras

Contents

1	Carbohydrates	1
	K.J. HALE and A.C. RICHARDSON	
1.1	Introduction	1
1.2	Recent developments in <i>O</i> -glycosidation methodology	1
1.3	Recent developments in <i>C</i> -glycoside synthesis	20
1.4	Synthesis of antibiotic sugars	26
1.5	Use of carbohydrates as chiral templates and reagents for asymmetric synthesis	32
1.5.1	Asymmetric reduction	32
1.5.2	Enantioselective alkylation of carbohydrate derived nucleophiles	35
1.5.3	Enantioselective alkylation of carbohydrate derived electrophiles	38
1.5.4	Monosaccharides as chiral auxiliaries for cycloaddition reactions	39
1.6	Use of carbohydrates as chiral starting materials for the synthesis of enantiomerically pure natural products	45
	References	53
2	Aromatic compounds	60
	M. GILL	
2.1	Introduction	60
2.2	Benzenoids	60
2.3	Coumarins	65
2.4	Isocoumarins, chromanones, chromones and cannabinoids	68
2.5	Macrocyclic lactones	72
2.6	Pyrones, butenolides, lignans and benzofurans	74
2.7	Terphenyls	77
2.8	Flavonoids	78
2.9	Xanthenes and benzophenones	80
2.10	Naphthalenes and naphthoquinones	82
2.11	Anthraquinones	85
2.12	Anthracyclines	92
2.13	Some other polycyclic antibiotics	96
2.14	Ansamycins	98
	References	99
3	Terpenoids	106
	R.A. HILL	
3.1	Introduction	106
3.2	Monoterpenoids	107
3.3	Sesquiterpenoids	117
3.4	Diterpenoids	124
3.5	Sesterterpenoids	129
3.6	Triterpenoids	131
3.7	Carotenoids	134
	References	135

4	Steroids	140
	A.B. TURNER	
4.1	Introduction	140
4.2	Molecular rearrangement	140
4.3	Remote functionalisation	147
4.4	Photochemical reactions	154
4.5	Partial synthesis	160
4.5.1	Oestrans	160
4.5.2	Androstanes	162
4.5.3	Pregnanes	164
4.5.4	Cholanes	165
4.5.5	Cardenolides and bufadienolides	167
4.5.6	Vitamins D	169
4.5.7	Cholestanes and derivatives	172
	References	176
5	Amino acids, peptides and proteins	183
	C. BLADON	
5.1	Introduction	183
5.2	Amino acids	183
5.2.1	Synthesis	183
5.2.2	New naturally occurring amino acids	186
5.3	Peptides	188
5.3.1	Synthesis	188
5.3.2	Synthesis of glycopeptides	191
5.3.3	Synthesis of phosphorylated peptides	193
5.3.4	Post-translational modifications	193
5.3.5	Design of peptide-based pharmaceuticals	195
5.3.6	New peptides from natural sources	198
5.4	Techniques for structural elucidation	200
5.4.1	X-ray crystallography	200
5.4.2	N.m.r. spectroscopy	202
5.4.3	Molecular modelling	208
5.5	Proteins	208
5.5.1	Incorporation of unnatural amino acids	208
5.5.2	Purification and analysis	209
5.5.3	Sequences, databases and protein folding	209
5.6	Appendix	211
5.6.1	Useful books	211
5.6.2	Databases	211
	References	211
6	Alkaloids	218
	J. LEONARD	
6.1	Introduction	218
6.2	Biomimetic studies	218
6.2.1	Biomimetic synthesis of <i>Iboga</i> and <i>Aspidosperma</i> alkaloids	219
6.2.2	Biomimetic routes to <i>Daphniphyllum</i> alkaloids	222
6.3	Synthesis	231
6.3.1	Reserpine	232
6.3.2	Other yohimbine and heteroyohimbine alkaloids	239
6.4	Marine alkaloids	243
6.4.1	The manzamines	245
6.4.2	Biosynthetic origin of manzamines	247

6.4.3	Total synthesis of manzamine C	249
6.4.4	Synthetic approaches to manzamine A	249
References		257

7 Nucleosides, nucleotides and nucleic acids 259

J.B. HOBBS

7.1	Introduction	259
7.2	Nucleosides	260
7.2.1	Nucleoside synthesis: general methods	260
7.2.2	Nucleosides containing modified sugars	264
7.2.3	Other nucleosides of interest	280
7.2.4	Some useful and novel reactions	283
7.3	Nucleotides	285
7.3.1	Nucleoside monophosphates and their analogues	285
7.3.2	Cyclic nucleotides	289
7.3.3	Nucleoside polyphosphates and their analogues	290
7.4	Nucleic acids	301
7.4.1	Oligodeoxyribonucleotide synthesis	301
7.4.2	Oligoribonucleotide synthesis	311
7.4.3	Oligonucleotides containing modified internucleotidic links	313
7.4.4	Nucleic acid sequencing	317
7.5	Supplementary reading	319
References		320

8 Porphyrins 329

L.R. MILGROM and F.O'NEILL

8.1	General introduction	329
8.2	Macrocycle biosynthesis	329
8.2.1	Introduction	329
8.2.2	Substitution pattern of uroporphyrinogen III	331
8.2.3	Biosynthesis of vitamin B12	334
8.3	Haemoprotein model compounds	336
8.3.1	Introduction	336
8.3.2	Supramolecular effects in haemoprotein model compounds	337
8.3.3	Cytochrome P-450 models	344
8.4	Porphyrins with easily oxidisable substituents	347
8.4.1	Introduction	347
8.4.2	Mesotetrakis (3,5-di- <i>t</i> -butyl-4-hydroxyphenyl)porphyrin	347
8.4.3	Mesotetrakis (pyrogallyl) porphyrin	351
8.5	Utilisation of porphyrin excited states	351
8.5.1	Introduction	351
8.5.2	Modelling photosynthesis	352
8.5.3	Solar energy conversion	354
8.6	Porphyrins in photodynamic therapy	357
8.6.1	Introduction	357
8.6.2	Haematoporphyrin derivative, HpD	357
8.6.3	Second generation porphyrins	359
8.6.4	New approaches to photosensitiser delivery	364
8.6.5	Mechanism of photodynamic action	364
8.6.6	Photosensitising porphyrins as herbicides	366
8.7	DNA-porphyrin interactions	366
8.7.1	Introduction	366
8.7.2	DNA cleavage	367
8.7.3	DNA binding	368
8.8	Porphyrins as novel materials	368

8.8.1	Introduction: solid state and liquid crystalline phenomena	368
8.8.2	Porphyrins in molecular electronics	370
8.9	Porphyrins with liquid crystalline properties	373
8.9.1	Introduction	373
8.9.2	Porphyrins with discotic phases	375
	References	376

9 Aliphatic compounds 382

D.R. KELLY

9.1	Introduction	382
9.2	Semiochemicals	382
9.2.1	Lepidopteran pheromones	383
9.2.2	Methyl substituted aliphatic pheromones	387
9.2.3	Unbridged spiroketals	391
9.3	Development of synthetic technology	392
9.3.1	Bridged spiroketal semiochemicals of bark beetles	393
9.3.2	Organosulphur semiochemicals	397
9.4	Marine natural products	400
9.4.1	Palytoxin	400
9.4.2	Okadaic acid, dinophysistoxins and acanthifolicin	402
9.4.3	Fused ring polyethers	406
9.5	Enyne-allene and enediyne antibiotics	417
9.5.1	Neocarzinostatin	418
9.5.2	Trisulphide triggered enediyne antibiotics: the esperamicins and calicheamicins	421
9.5.3	Dynemicins	421
	References	428

Chemical abbreviations and acronyms 442
