KNOWLEDGE MANAGEMENT AND MANAGEMENT LEARNING:
Extending the Horizons of Knowledge-Based Management

Edited by

Walter Baets

CONTENTS

ABOUT THE AUTHOR *xiii*

Introduction **1**

Part 2: Application domains *4*

1. Complexity: an emergent organisational paradigm in the knowledge based economy **9**

1.1 Introduction *9*

1.2 The knowledge era *10*

1.3 The complexity paradigm *13*

1.4 What should be understood by Knowledge Management: the corporate view *19*

1.5 Research perspective on Knowledge Management *22*

2. The epistemology of knowledge **25**

2.1 What can we learn from the philosophers of science? *30*

2.2 Post-modernism comes in fact from architecture *38*

2.3 The widest view: a vision of Man and the holistic world *42*

3. The complexity paradigm for a networked economy **47**

4. Knowledge management and management learning: what computers can still do **59**

4.1 Knowledge and Learning *59*

4.2 Knowledge Management Technologies *74*

4.3 Virtual Learning Technologies *80*

4.4 Communication Technologies *83*

4.5 The Big Picture *84*

5. Supporting Technologies for Knowledge Management **89**

5.1 Introduction *89*

5.2 Information Retrieval *91*

5.3 Basics of information retrieval *93*

5.4 Data Mining *104*

5.5 Conclusions *112*

6. Learning and interaction via ICT tools for the benefit of Knowledge Management **113**

6.1 Introduction *113*

6.2 Learning as a vehicle for Knowledge Management *115*

6.3 Machine learning *118*

6.4 ICT tools to support learning of human beings *123*

6.5 Conclusions *124*

7. Seducing, engaging and supporting communities at Achmea **125**

7.1 1. Introduction *125*

7.2 Communities of Practice at Achmea *126*

7.3 The SES Model for community facilitation *128*

7.4 KennisNet: an example CoP *134*

7.5 Collaboration in Distributed Communities *136*

7.6 Conclusions *140*

8. Virtual learner-centred solutions for management education and training **143**

8.1 Introduction *143*

8.2 The case for e-learning: revolutionising management education and training *143*

8.3 Management education and e-learning *145*

8.4 Towards a learner-centred application of e-learning tools *147*

8.5 Applying learner-centred principles to the development of a virtual learning environment *148*

8.6 Experimentation with the Whizzdom learning environment *150*

8.7 Research approach *153*

8.8 Summary of the findings from the course experiments *154*

8.9 Lessons learned from the course experiments *155*

8.10 Instructional issues related to the design and delivery of hybrid learning *158*

9. A symbiosis of learning and work-practice **165**

9.1 Increased attention for learning *165*

9.2 Consequences for organizations and individuals *165*

9.3 Integration of learning and work *167*

9.4 Adult learning *168*

9.5 Integration of learning and working *170*

9.6 Research Approach *170*

9.7 Summary of the findings from the learning trajectories *171*

9.8 Lessons learned *175*

9.9 Conclusions *180*

10. Facilitating learning from design **181**

10.1 Introduction *181*

10.2 Research issues *181*

10.3 Research objectives *185*

10.4 Preliminary conceptual model *185*

10.5 Research settings and activities *187*

10.6 Main results *188*

10.7 Participation *192*

10.8 Evaluation *193*

10.9 Negotiation *193*

10.10 Creativity *194*

10.11 Suggestions for using the DLM in practice *194*

10.12 Relevance to business and academia *195*

10.13 Summary *196*

11. Cultural complexity: a new epistemological perspective **199**

11.1 Introduction *199*

11.2 The problem of "culture" in (learning) organizations *200*

11.3 A new perspective on cultural complexity? *203*

11.4 What is complexity thinking? *205*

11.5 Complexity thinking and its principles *208*

11.6 What does complexity thinking mean for the cultural problematic in organizations? *210*

11.7 Conclusion *211*

12. Dialogues are the bread and butter of the organization's knowledge exchange **213**

12.1 Management information systems *214*

12.2 Knowledge management *216*

12.3 Customer relationship management *216*

12.4 Larger purposes and long-term needs and values *218*

12.5 Task-oriented larger purposes 219

12.6 Social-affective larger purposes 221

12.7 Indicating and recognising larger purposes 221

12.8 Harvesting the fruits: Applying larger purposes to sales conversations in call centres 224

12.9 The computational model 226

12.10 Experiments 228

12.11 Conclusions 233

13. The influence of knowledge structures on the usability of knowledge systems 235

13.1 Introduction 235

13.2 Our empirical research 238

13.3 Conclusions and implications 241

14. The role of contextuality in process standardization 251

14.1 Introduction 251

14.2 Empirical research 259

14.3 Research object and approach 260

14.4 Results 262

14.5 Description of cases 262

14.6 Environmental features influencing contextuality 264

14.7 Kinds of contextuality with their origins and consequences 266

14.8 Adaptive evolution of knowledge structure 277

14.9 Effects of standardization on knowledge structure 281

14.10 The process of change 282

14.11 Conclusions 285

15. Emergent learning processes in innovation projects 287

15.1 Introduction 287

15.2 The constructed dualism between innovating and learning 288

15.3 Learning, complexity and agency 300

15.4 An agent-based simulation: creating an open learning environment 309

15.5 Conclusions and practical implications 314

16. The dynamics of learning and innovation **317**

16.1 Introduction 317

16.2 Assessment of existing theory of innovation 318

16.3 Cybernetics 327

16.4 How can these outcomes be elaborated? 330

16.5 Options for elaboration 330

16.6 Conclusion 338

17. Knowledge management at Akzo Nobel Car Refinishes R&D:Improving knowledge creation ability **341**

17.1 Introduction 341

17.2 The real life case 342

17.3 The research design 348

17.4 Results 351

17.5 Knowledge creation ability 354

17.6 Bridging the Gap: Complex Adaptive Knowledge Management 355
