New York, Boston, Dordrecht, London, Moscow

# Contents

## 1. Biological Materials

**Yoshito Ikada**

1.1. Introduction . . . . .	1
1.2. Fundamentals of Biological Materials . . . . .	2
1.2.1. Polypeptides . . . . .	2
1.2.2. Polysaccharides . . . . .	5
1.2.3. Polyesters . . . . .	11
1.2.4. Inorganic Materials . . . . .	12
1.2.5. Composites . . . . .	12
1.3. Medical Application of Biological Materials . . . . .	14
1.3.1. General Surgery . . . . .	14
1.3.2. Replacement of Diseased Tissues . . . . .	16
; 1.3.3. Drug Delivery Systems (DDS) . . . . .	19
1.3.4. Tissue Engineering . . . . .	20
1.4. Conclusions . . . . .	22
References . . . . .	22

## 2. Structure and Properties of Polymeric Materials

**Walter Marconi and Antonella Piozzi**

2.1. Introduction . . . . .	25
2.2. Polymers . . . . .	27
2.2.1. General Properties . . . . .	27
2.2.2. Synthesis . . . . .	29
2.2.3. Molecular Weight . . . . .	30
2.2.4. Isomerism . . . . .	v 32
2.2.5. Crystallinity . . . . .	33
2.2.6. Mechanical Properties . . . . .	35
2.3. Polymers in Medicine . . . . .	36
2.3.1. Synthetic Polymers . . . . .	37
2.3.2. Biodegradable and Bioresorbable Polymers . . . . .	40
2.3.3. Polymers for Extracorporeal Enzymatic Detoxification . . . . .	41
2.4. Requirements and Evaluation of Polymeric Materials . . . . .	43
2.4.1. Bulk and Surface Properties . . . . .	43

2.4.2. Chemical Modifications . . . . .	50
2.4.3. Production of Polymeric Materials . . . . .	56
2.4.4. Biological Interaction of Polymer Materials . . . . .	63
References . . . . .	66

### **3. Fundamentals of Polymeric Composite Materials**

**Claudio Migliaresi and Alessandro Pegoretti**

3.1. Introduction . . . . .	69
3.2. Fiber Reinforcements . . . . .	71
3.2.1. Inorganic Fibers . . . . .	72
3.2.2. Carbon (Graphite) Fibers . . . . .	73
3.2.3. Polymeric Fibers . . . . .	76
3.3. Matrix Resins . . . . .	78
3.3.1. Thermoset Matrices . . . . .	79
3.3.2. Thermoplastic Matrices . . . . .	81
3.4. Fiber/Matrix Adhesion . . . . .	84
3.5. Volume and Weight Fractions . . . . .	87
3.6. Mechanics of Continuous-Fiber-Reinforced Composites . . . . .	88
3.6.1. Elastic Properties of a Unidirectional Lamina . . . . .	88
3.6.2. Elastic Properties of a Laminate . . . . .	94
3.6.3. Failure of a Unidirectional Lamina . . . . .	97
3.7. Mechanics of Discontinuous-Fiber-Reinforced Composites . . . . .	99
3.7.1. Fiber/Matrix Stress Transfer . . . . .	99
3.7.2. Elastic Properties of Discontinuous-Fiber Composites . . . . .	101
3.7.3. Ultimate Properties of Discontinuous-Fiber Composites . . . . .	105
3.8. Mechanics of Particulate Composites . . . . .	106
3.9. Manufacture of Composites . . . . .	108
3.9.1. Manufacture of Thermosetting Polymer Composites . . . . .	108
3.9.2. Manufacture of Thermoplastic Polymer Composites . . . . .	113
References . . . . .	114

### **4. Biodegradable Polymers**

**Luca Fambri, Claudio Migliaresi, Kernal Kesenci, and Erhan Piskin**

4.1. Introduction . . . . .	> . . . . .	119
4.2. Definition . . . . .		120
4.3. Mechanisms . . . . .		121
4.4. Properties and Applications . . . . .		126
4.5. Natural Polymers . . . . .		129
4.5.1. Polysaccharide-Based Polymers . . . . .		129
4.5.2. Protein-Based Polymers . . . . .		137
4.5.3. Microbial Polyesters (Poly-J-hydroxyalkanoates) . . . . .		143
4.6. Synthetic Polymers . . . . .		145
4.6.1. Aliphatic Polyesters . . . . .		145

4.6.2. Poly(ester-amides) . . . . .	150
4.6.3. Polyorthocesters . . . . .	152
4.6.4. Polyanhydrides . . . . .	154
4.6.5. Poly(alkyl 2-cyanoacrylate) . . . . .	155
4.6.6. Polyimino Carbonates . . . . .	156
4.6.7. Polyphosphazenes . . . . .	157
4.6.8. Polyethyleneterephthalate . . . . .	159
4.6.9. Polyamides . . . . .	161
4.6.10. Polyurethanes . . . . .	163
4.7. Factors Affecting the Degradation of Polymeric Materials . . . . .	165
References . . . . .	170

## 5. Bioceramics and Biological Glasses

A. Krajewski and A. Ravaglioli

5.1. The Structure of Ceramics from Synthesis to Processing . . . . .	189
5.1.1. Ceramics . . . . .	190
5.1.2. The Outstanding Properties of Ceramics . . . . .	191
5.1.3. The Drawbacks of Ceramics . . . . .	192
5.1.4. The Structural Properties of Ceramics and Their Possibilities . . . . .	193
5.1.5. Processing of Ceramics . . . . .	200
5.1.6. The Thermal Process . . . . .	202
5.1.7. Sintering . . . . .	202
5.2. Design and Duration of Ceramic Devices under Load . . . . .	207
5.3. Ceramics for Surgical Implants . . . . .	208
5.3.1. Inert Bioceramics . . . . .	209
5.3.2. Bioactive Ceramics . . . . .	217
5.3.3. Ceramic and Polymeric Carbons . . . . .	240
5.3.4. Biological Glasses . . . . .	244
5.3.5. Coatings . . . . .	249
5.4. A Survey on the Adhesion of Ceramics to Bone Tissue . . . . .	252
References . . . . .	252

## 6. Metallic Materials

Alberto Cigada, Roberto Chiesa, Maria Rosa Pinasco,  
and Kunihiro Hisatsune

6.1. The Crystalline Structure of Metallic Materials . . . . .	255
6.2. Lattice Defects . . . . .	256
6.2.1. Point Defects and Solid State Diffusion . . . . .	257
6.2.2. Linear Defects and Plastic Deformation . . . . .	257
6.2.3. Surface Defects and Grain Boundaries . . . . .	260
6.2.4. Effect of Plastic Deformation Temperature on Grain Size . . . . .	261

6.3.	Structure of Metallic Alloys . . . . .	262
6.3.1.	Interstitial Solid Solutions . . . . .	262
6.3.2.	Substitutional Solid Solutions . . . . .	262
6.3.3.	Intermetallic Phases . . . . .	263
6.3.4.	Presence of More Phases . . . . .	263
6.4.	Phase Diagrams . . . . .	263
6.4.1.	Phase . . . . .	263
6.4.2.	Variance and Phase Rule . . . . .	264
6.4.3.	Graphic Representation of Binary Phase Diagrams . . . . .	264
6.4.4.	Presence of One Phase . . . . .	265
6.4.5.	Presence of Two Phases and the Lever Rule . . . . .	266
6.4.6.	Presence of Three Phases . . . . .	267
6.4.7.	Iron-Carbon Phase Diagrams . . . . .	268
6.4.8.	Iron-Nickel and Iron-Chromium Diagrams . . . . .	269
6.4.9.	Titanium-Aluminum and Titanium-Vanadium Diagrams . . . . .	269
6.4.10.	Other Phase Diagrams . . . . .	271
6.5.	Thermal Treatments . . . . .	272
6.5.1.	Full Annealing . . . . .	276
6.5.2.	Normalization . . . . .	277
6.5.3.	Quenching . . . . .	277
6.5.4.	Tempering . . . . .	277
6.6.	Strengthening of Metals . . . . .	277
6.6.1.	Strengthening by Alloying . . . . .	278
6.6.2.	Strengthening by Work Hardening . . . . .	278
6.6.3.	Strengthening by Addition of Oligoelements . . . . .	278
6.6.4.	Strengthening by Thermal Treatments . . . . .	279
6.6.5.	Strengthening by Order-Disorder Transformations . . . . .	279
6.7.	Working Technologies . . . . .	280
6.7.1.	Hot or Cold Plastic Deformation . . . . .	281
6.7.2.	Molding . . . . .	285
6.7.3.	Powder Metallurgy . . . . .	287
6.7.4.	Tool Machining . . . . .	288
6.7.5.	Bonding . . . . .	288
6.7.6.	Surface Finishing . . . . .	289
6.8.	Main Metallic Materials Used as Biomaterials . . . . .	289
6.8.1.	Austenitic Stainless Steel . . . . .	290
6.8.2.	Cobalt Alloys . . . . .	291
6.8.3.	Titanium and Titanium Alloys . . . . .	N. . . . .
6.8.4.	Precious Metal Alloys . . . . .	294

## 7. Degradation Processes on Metallic Surfaces

Emma Angelini, Angelo Caputo, and Fabrizio Zucchi

7.1.	Introduction . . . . .	297
7.2.	The Biological Environment . . . . .	297

7.3.	Metallic Corrosion . . . . .	298
-	7.3.1. Dry Corrosion . . . . .	298
	7.3.2. Wet Corrosion . . . . .	299
	7.3.3. Kinetics . . . . .	303
	7.3.4. Influence of the Biological Environment . . . . .	308
7.4.	Corrosion Forms . . . . .	308
	7.4.1. Generalized Corrosion . . . . .	309
	7.4.2. Localized Corrosion . . . . .	309
	7.4.3. Galvanic Corrosion . . . . .	316
	7.4.4. Selective Corrosion . . . . .	320
	7.4.5. Wear Corrosion . . . . .	320
7.5.	Corrosion Prevention . . . . .	320
	References . . . . .	323

## 8. Characterization of Biomaterials

**Donald Lyman**

8.1.	Requirements of Biomedical Characterization . . . . .	325
8.2.	Structure of Materials . . . . .	327
8.3.	The Nature of Surface Dynamics and Surface Analysis . . . . .	328
	8.3.1. Metal and Ceramic Surfaces . . . . .	328
	8.3.2. Polymer Surfaces . . . . .	329
8.4.	Organization of Polymer Surfaces . . . . .	330
	8.4.1. Anisotropy of Polymer Surfaces . . . . .	331
	8.4.2. Microphase Heterogeneous Surfaces . . . . .	332
	References . . . . .	336

## 9. Tissues

**Luigi Ambrosio, Paolo A. Netti, and Peter A. Revell**

9.1.	Introduction . . . . .	339
9.2.	Soft Tissues . . . . .	340
9.3.	Hard Tissues . . . . .	342
	References . . . . .	345

## 10. Soft Tissue

**Luigi Ambrosio, Paolo A. Netti, and Luigi Nicolais**

10.1.	Structure-Property Relationship of Soft Tissue . . . . .	347
	10.1.1. Introduction . . . . .	347
	10.1.2. Mechanical Properties . . . . .	349
	10.1.3. Transport Properties . . . . .	352
= 10.2.	Skin . . . . .	353

10.2.1. Composition and Structure . . . . .	354
10.2.2. Mechanical Properties . . . . .	356
10.3. Tendons and Ligaments . . . . .	357
10.3.1. Composition and Structure . . . . .	358
10.3.2. Mechanical Properties . . . . .	359
References . . . . .	363

## 11. The Eye

**Domenico Lepore, Luigi Ambrosio, Roberto De Santis,  
Luigi Nicolais, and Luigi Scullica**

11.1. Introduction . . . . .	367
11.2. The Cornea . . . . .	368
11.3. The Sclera . . . . .	373
11.4. The Vitreous . . . . .	375
References . . . . .	379

## 12. Articular Cartilage

**Paolo A. Netti and Luigi Ambrosio**

12.1. Introduction . . . . .	381
12.2. Co'mposition and Structure . . . . .	382
12.2.1. Composition . . . . .	382
12.2.2. Structure . . . . .	383
12.3. Mechanical Properties . . . . .	386
12.3.1. Static Properties . . . . .	386
12.3.2. Time-Dependent Properties . . . . .	388
12.3.3. Viscoelastic Shear Properties . . . . .	388
12.3.4. Viscoelastic Properties in Compression . . . . .	389
12.3.5. Hydraulic Conductivity of Cartilage . . . . .	390
12.3.6. Compressive Behavior of Articular Cartilage . . . . .	391
12.3.7. Confined Compression . . . . .	393
12.4. Electromechanical Transduction . . . . .	394
12.5. Remodeling and Repair . . . . .	396
References . . . . .	398

## 13. The Mechanical and Material Properties of the Healthy and Degenerated Intervertebral Disc

**Ron Alkalay**

13.1. Introduction . . . . .	403
13.2. Anatomy . . . . .	404
13.2.1. Nucleus Pulposus . . . . .	404

13.2.2. Annulus Fibrosus . . . . .	405
13.2.3. End Plate . . . . .	406
13.3. Material Properties of the Structures of the Disc . . . . .	406
13.3.1. Nucleus Pulposus . . . . .	406
13.3.2. Annulus Fibrosus . . . . .	408
13.3.3. End Plate . . . . .	411
13.4. Mechanical Behavior of the Intervertebral Disc . . . . .	411
13.5. The Effect of Degradation on the Mechanical Properties of the Disc . . . . .	415
13.6. Intervertebral Disc Prostheses . . . . .	416
13.7. Summary . . . . .	419
References . . . . .	420

## 14. Soft Tissue Replacement

**Matteo Santin, Luigi Ambrosio, Andrew W. Lloyd,  
and Stephen P. Denyer**

14.1. Introduction . . . . .	425
14.2. Cardiovascular Devices . . . . .	426
14.2.1. Vascular Grafts . . . . .	427
14.2.2. Vascular Stents . . . . .	431
14.2.3. Substitute Heart Valves (SHV) . . . . .	434
14.3. Intraocular Devices . . . . .	436
14.3.1. Intraocular Lenses . . . . .	437
14.3.2. Keratoprostheses . . . . .	441
14.4. Other Applications in Soft Tissue Replacement . . . . .	444
14.4.1. Artificial Skin . . . . .	444
14.4.2. Hernia Repair . . . . .	445
14.4.3. Urological Devices . . . . .	445
14.4.4. Ligament and Tendon Prostheses . . . . .	446
14.4.5. Intervertebral Disc Prostheses . . . . .	447
14.5. Conclusions . . . . .	449
References . . . . .	450

## 15. Mechanics of Hard Tissues

**Arturo N. Natali and Richard T. Hart**

15.1. Introduction . . . . .	459
15.2. Experimental Methods and Results: Determination of Mechanical Properties and Structural Configuration . . . . .	462
15.2.1. Mechanical Testing . . . . .	462
15.2.2. Ultrasound Analysis . . . . .	468
15.3. Mechanics of Bone . . . . .	469

15.3.1. Material Properties . . . . .	469
15.3.2. Structural Properties . . . . .	471
15.4. Bone Physiology . . . . .	475
15.5. Functional Adaptation of Bone . . . . .	476
15.5.1. Phenomenological Models . . . . .	478
15.5.2. Mechanistic Models . . . . .	481
15.6. Numerical Approach . . . . .	482
15.7. Conclusions . . . . .	486
References . . . . .	486

## 16. Hip Joint Replacements

**Giuseppe Guida and Dante Ronca**

16.1 Introduction to Joint Replacements . . . . .	491
16.2 History . . . . .	492
16.3 Cemented Prostheses . . . . .	498
16.3.1. Femoral Stem . . . . .	498
16.3.2. Cotyle . . . . .	503
16.4 The Noncemented Prostheses . . . . .	505
16.4.1. Femoral Stem . . . . .	505
16.4.2. Cotyle . . . . .	512
16.5 Friction and Wear . . . . .	517
16.5.1. Femoral Head Materials . . . . .	518
16.5.2. Dimensions of the Head . . . . .	519
16.5.3. Cotyle Materials . . . . .	519
References . . . . .	520

## 17. Knee Joint Replacements

**Dante Ronca and Giuseppe Guida**

17.1 Introduction . . . . .	527
17.2 History . . . . .	529
17.2.1. Total Knee Arthroplasty . . . . .	529
17.2.2. Hinged Knee Arthroplasty . . . . .	532
17.2.3. Unicompartmental Knee Arthroplasty . . . . .	534
17.3 The Knee: Anatomical, Functional, and Structural Considerations . . . . .	536
17.4 Polyethylene . . . . .	537
17.4.1. Contact Stress, Congruency, and Conformity . . . . .	537
17.4.2. Thickness . . . . .	540
17.4.3. Metal Backing . . . . .	541
17.4.4. Strength . . . . .	542
17.4.5. Degradation . . . . .	543
17.4.6. Debris . . . . .	544

17.5. Alignment . . . . .	545
17.6. Fixation . . . . .	546
17.7. Patellofemoral Joint . . . . .	547
17.8. Conclusion . . . . .	550
References . . . . .	550

## 18. Biomaterial Applications: Elbow Prosthesis

**Luigi Celli**

18.1. Introduction . . . . .	555
18.2. The Prosthetic Design . . . . .	556
18.3. Cases in which the Elbow Prosthesis Is Advisable . . . . .	558
References . . . . .	558

## 19. Biomaterial Applications: Shoulder Prosthesis

**Luigi Celli**

19.1. Introduction . . . . .	561
19.2. The Prosthetic Design . . . . .	562
19.3. The Prosthetic Implantation . . . . .	563
19.4. Conforming Design of the Articular Surfaces . . . . .	564
19.5. Articular and Periarticular Resistances . . . . .	566
19.6. The Active Role of Periarticular Muscles . . . . .	566
References . . . . .	568

## 20. Acrylic Bone Cements

**Maria-Pau Ginebra, Francisco-Javier Gil, and Josep-Anton Planell**

20.1. Introduction . . . . .	569
20.2. Chemistry of Acrylic Bone Cements . . . . .	570
20.2.1. Chemical Composition: Powder and Liquid . . . . .	570
20.2.2. Chemical Reactions and Setting Process . . . . .	571
20.2.3. Molecular Weight . . . . .	x574
20.3. Mechanical Properties . . . . .	574
20.3.1. Strength and Elastic Modulus . . . . .	575
20.3.2. Viscoelastic Behavior . . . . .	575
20.3.3. Fracture. Toughness . . . . .	576
20.3.4. Fatigue . . . . .	576
20.4. Factors Affecting the Microstructure and the Microstructure-Mechanical Properties Relationship . . . . .	578
20.4.1. Porosity . . . . .	579

20.4.2. <i>In Vivo</i> Environment . . . . .	579
20.4.3. Additives . . . . .	580
20.5. Biological Properties . . . . .	582
20.6. Modification of Acrylic Bone Cements . . . . .	582
References . . . . .	584

## 21. Mechanical Properties of Tooth Structures

**Roberto De Santis, Luigi Ambrosio, and Luigi Nicolais**

21.1. Introduction . . . . .	589
21.2. Mechanical Properties . . . . .	592
21.2.1. Static Mechanical Properties . . . . .	592
21.2.2. Hardness . . . . .	595
21.2.3. Fracture Toughness . . . . .	595
References . . . . .	597

## 22. Dental Materials and Implants

**Maria Rosa Pinasco, Arturo Natali, Patrizia Loria, Marc Bolla, and Franck J. Hagege**

22.1. Introduction . . . . .	601
22.2. Stomatognathic Apparatus: Some Considerations . . . . .	602
22.3. Dental Materials for Hard and Plastic Restorative Treatment . . . . .	609
22.3.1. Tooth Restoration: Filling, Inlay, and Onlay . . . . .	609
22.3.2. Restorative Materials: Metals and Alloys, Composite Resins, Glass Ionomers . . . . .	610
22.4. Materials for Complex Reconstructions . . . . .	621
22.5. Prosthetic Therapy Materials . . . . .	622
22.5.1. Fixed Prosthesis Materials . . . . .	623
22.5.2. Moving Partial or Total Prosthesis Materials . . . . .	624
22.5.3. Precious and Nonprecious Alloys for Dental Prostheses . . . . .	625
22.6. Dental Implant Materials: A Few Considerations . . . . .	629
22.7. Biomaterials for Surgical Reconstitution . . . . .	631
22.7.1. Periodontal Regeneration . . . . .	631
22.7.2. Goal of Osseous Grafting . . . . .	631
22.7.3. Factors Influencing Graft Success . . . . .	631
22.7.4. Regenerative Materials . . . . .	631
22.8. Dental Implants and Biomechanics . . . . .	639
22.8.1. Introduction . . . . .	639
22.8.2. Tissue Mechanics . . . . .	640
22.8.3. Implant Mechanics and Loading . . . . .	642

22.8.4. Numerical Formulation of Implant-Tissue Interaction Phenomena . . . . .	643
References . . . . .	647

## 23. Materials/Biological Environment Interactions

**Orsolina Petillo, Alfonso Barbarisi, Sabrina Margarucci,  
Alfredo De Rosa, and Gianfranco Peluso**

23.1. Introduction . . . . .	655
23.2. Cell-Extracellular Matrix Interactions . . . . .	656
23.3. Growth Factors-Extracellular Matrix Interactions . . . . .	658
23.4. Extracellular/Biomaterial Interaction . . . . .	659
23.4.1. Regulation of Tissue Fibrosis, as an Integrated Cellular Response to Biomaterial . . . . .	659
23.4.2. Fibroblast Cell Activation—a Highly Orchestrated Reaction to Biomaterial Implantation . . . . .	660
23.4.3. Mechano/Transduction by Biomaterials and ECM Remodeling . . . . .	663
23.5. Future Perspectives . . . . .	665
References . . . . .	666

## 24. Protein Adsorption and Cellular/Tissue Interactions

**Agnese Magnani, Gianfranco Peluso, Sabrina Margarucci,  
and Krishnan K. Chittur**

24.1. Introduction . . . . .	669
24.2. Protein Adsorption . . . . .	670
24.2.1. What Are Proteins? . . . . .	670
24.2.2. Protein Structure in Solution and on Surfaces . . . . .	670
24.2.3. Measurement of Protein on Surfaces . . . . .	671
24.2.4. Protein Adsorption to Surfaces: Principles . . . . .	674
24.2.5. Importance of Protein Adsorption . . . . .	677
24.3. Cells/Tissue Interactions . . . . .	678
24.3.1. The Wound Healing Process . . . . .	678
24.3.2. <i>In Vivo</i> Models . . . . .	682
References . . . . .	685

## |25. Inflammatory Response to Polymeric Materials

**JDenis Labarre and Marie-Paule Carreno**

1p.1. Introduction . . . . .	691
25.2. Polymeric Materials in Contact with Living Tissues . . . . .	692

25.2.1. Specifications . . . . .	692
25.2.2. Polymeric Materials . . . . .	695
25.3. Characteristics of the Materials Involved in the Inflammatory Response . . . . .	696
25.3.1. Size, Surface Area, and Surface Morphology . . . . .	697
25.3.2. Physicochemical Parameters . . . . .	698
25.4. Assessing the Inflammatory Response to Materials . . . . .	705
25.4.1. Materials in Close Contact with Blood . . . . .	706
25.4.2. Materials in Contact with Other Tissues . . . . .	713
25.5. Conclusion . . . . .	719
Appendix: Abbreviations Used in this Chapter . . . . .	723
References . . . . .	725

## 26. Inflammatory Response to Metals and Ceramics

**Arturo Pizzoferrato, Elisabetta Cenni, Gabriela Ciapetti,  
Donatella Granchi, Lucia Savarino, and Susanna Stea**

26.1. Introduction . . . . .	735
26.2. Materials Degradation and Inflammation . . . . .	735
26.2.1. Metals and Alloys . . . . .	736
26.2.2. Ceramics . . . . .	738
26.3. Acute Inflammatory Response . . . . .	741
26.3.1. Mediators of the Inflammatory Reaction . . . . .	742
26.3.2. Leukocyte Exudation . . . . .	751
26.3.3. Cells of the Inflammatory Acute Reaction . . . . .	753
26.3.4. Chemotaxis . . . . .	755
26.3.5. Phagocytosis . . . . .	757
26.4. Chronic Inflammation . . . . .	760
26.5. Toxicity of Biomaterials and Inflammation . . . . .	767
26.6. Specific Immune Response . . . . .	770
26.6.1. Immunogenicity of Metals and Ceramics . . . . .	771
26.6.2. Interaction between Biomaterials and the Immune System . . . . .	773
26.6.3. Methods for Testing the Immune Specific Response . . . . .	776
References . . . . .	780

## 27. Biocompatibility and Biological Tests

**Antonietta M. Gatti and Jonathan C. Knowles**

27.1. Definition . . . . .	793
27.2. Biocompatibility Tests and Their Rules . . . . .	795
27.3. Biological Tests . . . . .	796
27.3.1. Cytotoxicity . . . . .	796
27.3.2. Genotoxicity . . . . .	802

27.3.3. Carcinogenicity . . . . .	802
27.3.4. Reproductive Toxicity . . . . .	803
27.3.5. Irritation and Sensitization . . . . .	803
27.3.6. Local Effect after Implantation . . . . .	803
27.3.7. Systemic Toxicity . . . . .	804
27.3.8.. Hemocompatibility . . . . .	807
27.3.9. Degradation . . . . .	807
27.4. Biofunctionality Tests . . . . .	810
References . . . . .	812

## 28. Infection and Sterilization

**Roberto Giardino and Nicolo Nicoli Aldini**

28.1. Infection . . . . .	815
28.1.1. Tissue Reactivity to the Implant . . . . .	816
28.1.2. The Neutrophil Impairment . . . . .	816
28.1.3. The Protection of the Microorganisms . . . . .	816
28.1.4. Bacterial Adherence . . . . .	817
28.2. Sterilization . . . . .	822
28.2.1. Steam and Dry Heat . . . . .	824
28.2.2. Ethylene Oxide and Other Chemical Agents . . . . .	824
28.2.3. Irradiation . . . . .	825
28.2.4. Electron (E-Beam) Radiation . . . . .	827
References . . . . .	829

## 29. Drug Delivery Systems

**Francesco M. Veronese and Paolo Caliceti**

29.1. Introduction . . . . .	833
29.2. Controlled or Programmable Drug Release versus Slow or Sustained Release . . . . .	834
29.3. Biodegradable and Nonbiodegradable Polymers . . . . .	836
29.4. Polymers for Controlled Release Applications . . . . .	837
29.4.1. Polysiloxanes . . . . .	837
29.4.2. Polyphosphazenes . . . . .	839
29.4.3. Lactic/Glycolic Acid Polymers . . . . .	840
29.4.4. Poly- <i>s</i> -Caprolactones . . . . .	842
29.4.5. Polyanhydrides . . . . .	844
29.4.6. Polyalkyl Acrylates . . . . .	845
29.4.7. Polyacrylate Hydrogels . . . . .	846
29.4.8.. Other Polymers for Controlled Release . . . . .	848
29.5. Novel Drug Delivery System Preparations . . . . .	849
29.5.1. Monolithic Matrices . . . . .	850
29.5.2. Microspheres and Nanospheres . . . . .	851

29.5.3. Microcapsules and Nanocapsules . . . . .	852
29.6. Internally or Externally Controlled Drug Delivery Systems . . . . .	853
29.6.1. Device Erosion Controlled by pH . . . . .	853
29.6.2. Self-Modulated Devices . . . . .	855
29.6.3. Externally Triggered Devices . . . . .	857
29.7. Transdermal Therapeutic Delivery Systems . . . . .	859
29.7.1. Monolithic Devices . . . . .	860
29.7.2. Reservoir Devices . . . . .	861
29.7.3. Skin Permeability Enhancers . . . . .	862
29.8. Mechanisms of Drug Release . . . . .	864
29.8.1. Undegradable and Unswellable Devices . . . . .	865
29.8.2. Swellable and Undegradable Matrices . . . . .	867
29.8.3. Reservoir Systems . . . . .	868
29.8.4. Biodegradable Matrices . . . . .	869
29.9. Overviews of Problems Involving Long-Term Contact between Tissues and Drug Delivery Systems . . . . .	870
References . . . . .	872

### **30. Gene Delivery as a New Therapeutic Approach**

**Libero Vitiello and Francesco M. Veronese**

30.1. Introduction . . . . .	875
30.2. Different Kinds of Therapeutic Nucleic Acids . . . . .	876
30.3. Viral Vectors . . . . .	877
30.4. Synthetic Vectors . . . . .	877
30.4.1. Polyplexes . . . . .	877
30.4.2. Lipoplexes . . . . .	879
30.4.3. Lipopolyplexes . . . . .	881
30.5. Clinical Applications of Gene Transfer . . . . .	881
References . . . . .	882

### **31. Tissue Engineering**

**Giovanni Abatangelo, Paola Brun, Marco Radice, Roberta Cortiro,  
and Marcus K. H. Auth**

x	
31.1. Introduction . . . . .	885
31.2. Cell Culture and <i>In Vitro</i> Tissue Development . . . . .	888
31.2.1. ECM Composition . . . . .	889
31.2.2. ECM Receptors . . . . .	892
31.2.3. Signal Transduction . . . . .	894
31.2.4. Testing Biomaterials and New Strategies for <i>In Vitro</i> Tissue Culture . . . . .	895
31.2.5. Association of Gene Therapy to Tissue Engineering . . . . .	897

31.3.	Artificial Skin . . . . .	900
31.3.1.	Epidermis . . . . .	901
31.3.2.	Dermis . . . . .	902
31.3.3.	Conclusions . . . . .	907

## 32. Assist Devices

Gerardo Catapano

32.1.	Introduction . . . . .	947
32.2.	Biomaterials Used in Extracorporeal Blood Processing . . . . .	949
32.3.	Artificial Devices . . . . .	950
32.3.1.	Membranes and Their Properties . . . . .	951
32.3.2.	Therapeutic Membrane Processes . . . . .	956
32.3.3.	Materials in Artificial Devices . . . . .	960
32.3.4.	Membrane Preparation Techniques . . . . .	961
32.3.5.	Membrane Materials . . . . .	964
32.3.6.	Biocompatibility Issues . . . . .	968
32.3.7.	Activation of Blood Coagulation (Thrombogenicity) . . . . .	969
32.3.8.	Complement Activation . . . . .	971
32.3.9.	Cell Activation . . . . .	973
32.4.	Bioartificial Devices . . . . .	976
32.4.1.	Proposed Bioartificial Devices . . . . .	976

32.4.2. Materials in Bioartificial Devices . . . . .	980
32.4.3. Matrices and Scaffolds . . . . .	981
32.4.4. Immunoisolation Materials . . . . .	982
32.4.5. Biocompatibility Issues . . . . .	983
Suggested Reading . . . . .	983
Nomenclature . . . . .	984

### **33. Standards on Biomaterials**

Maria Vittoria Primiceri and Sandro Paci

33.1. Introduction . . . . .	985
33.1.1. The Need for Standards . . . . .	985
33.1.2. National, EN, and ISO Standards . . . . .	986
33.1.3. Standard of Quality System . . . . .	987
33.2. ISO Standards and Overview . . . . .	989
33.3. European System . . . . .	992
33.3.1. EC Directive on Medical Devices . . . . .	992
33.3.2. Conformity Assessment and CE Mark . . . . .	994
33.3.3. Procedure to Obtain CEE Marking . . . . .	999
33.3.4. Attuned Technical Standards . . . . .	1002
Bibliography . . . . .	1002

### **34. Biomaterials and Patents**

Maria Vittoria Primiceri

34.1. Introduction . . . . .	1003
34.1.1. Historical Overview . . . . .	1003
34.1.2. The European Patent Convention . . . . .	1006
34.1.3. The Patent Cooperation Treaty . . . . .	1007
34.1.4. The Patent Application—General Remarks and Patentability Criteria . . . . .	1009
34.2. Patentable Inventions . . . . .	1009
34.3. Patentability of Biomaterials . . . . .	1012
Bibliography . . . . .	1013

<b>Index . . . . .</b>	<b>1015</b>
