# Table of Contents

|   |     |
|---|-----|
| Preface   | vii |
| 1. Introduction                                 | 1   |
| 2. Discovery                                    | 3   |
| 3. Limits and size                              | 5   |
| 4. Geological data                              | 8   |
| 5. Local geomorphological terminology           | 14  |
| 6. The climate                                  | 16  |
| 7. River hydrology                              | 19  |
| 8. The Amazonian connection                     | 22  |
| 9. The flood regime                             | 23  |
| 10. The Pantanal lakes                          | 28  |
| 11. Hydrochemistry                              | 31  |
| 12. Soils                                       | 34  |
| 13. How many Pantanals?                         | 34  |
| 14. Regional connections                        | 37  |
| 15. Introduction to the biology of the Pantanal | 38  |
| 16. Phytogeography                              | 41  |
| 17. Aquatic vegetation                          | 44  |
| 18. Terrestrial vegetation                      | 50  |
| 19. Fire in the Pantanal                        | 57  |
| 20. Zoogeography                                | 58  |
| 21. Aquatic meiofauna                           | 60  |
| 22. Macrobenthos                                | 64  |
| 23. Ichthyofauna                                | 65  |
| 24. Pantanal fisheries                          | 71  |
| 25. The herpetofauna                            | 72  |
| 26. The avifauna                                | 77  |
| 27. The mammals                                 | 84  |
| 28. The humans in the Pantanal                  | 89  |
| 29. Environmental worries                       | 98  |
| 30. Nature conservancy and ecotourism           | 100 |
| Taxonomic glossary                              | 111 |
| Geographical and ethnographic index             | 118 |
| Subject index                                   | 120 |
