

HACIA EL FUTURO

Energy, Economics, and the Environment
in 21 st Century Mexico

by

Maria Eugenia Ibarra

Universidad de las Americas - Puebla, Puebla, Mexico

and

Roy Boyd

O'lo University, Athens, OH, U.S.A.

Preface by Mario Molina

Nobel Laureat in Chemistry, 1995

fyj Springer

CONTENTS

PART	1	1
CHAPTER 1. INTRODUCTION		3
1. STRUCTURE OF THE BOOK		5
2. CHAPTER CONTENT		6
3. TO THE USERS		11
CHAPTER 2. GREENHOUSE GAS EMISSIONS AND CLIMATE CHANGE		13
1. THE CHEMISTRY OF CLIMATE CHANGE IN BRIEF		14
1.1 Evidence of Climate Change		15
1.2 The Source and Global Warming Potential of GHGs		17
1.3 Modeling the Effects of Climate Change		19
2. ECONOMIC ACTIVITY AND CLIMATE CHANGE		20
3. THE POLITICS OF CLIMATE CHANGE		22
3.1 The Largest Emitters		22
3.2 Regional Impacts of Climate Change		24
3.3 Overview of Mitigation Policies		25
4. CONCLUSIONS		26
CHAPTER 3. FORECASTING THE IMPACT OF CLIMATE CHANGE		29
1. EMISSIONS FROM LATIN AMERICA		30
2. EMISSIONS AND ECONOMIC ACTIVITY		31
3. POSSIBLE EFFECTS ON MEXICO		33
3.1 Regional Impacts		34
3.2 Specific Vulnerability		35
Agriculture		36
Forest Ecosystems		37
Desertification and Drought		39
Hydrology		40
Coastal Zones		40
Human Health		41
3.3 Policy Responses to Threats from Climate Change		42
Mexico's Responses		42
4. CONCLUSIONS		44

CHAPTER 4. ENERGY USE IN MEXICO	45
1. INTRODUCTION	46
2. DEMOGRAPHY AND URBANIZATION	46
3. ECONOMIC GROWTH AND STRUCTURAL CHANGE	50
4. BRIEF OVERVIEW OF ENERGY USE	54
4.1 Residential, Commercial, and Public	55
4.2 Industry	56
4.3 Transportation	56
4.4 Agriculture	57
4.5 Electricity	- 57
5. ENERGY PRICING AND FISCAL POLICY	58
5.1 Energy Prices	58
5.2 Fiscal Policy towards the Energy Sector	62
6. ENERGY IN OTHER LATIN AMERICAN COUNTRIES	62
6.1 Brazil	64
6.2 Venezuela	67
6.3 Argentina	69
7. CONCLUSIONS	72
CHAPTER 5. ECONOMIC THEORY, EMISSION CONTROL, AND KYOTO	75
1. ENVIRONMENTAL CONTROL MECHANISMS	76
2. THE ECONOMICS OF CLIMATE CHANGE	78
2.1 The Global Commons and Public Goods	78
2.2 Missing Markets and Externalities	80
2.3 Applicability of the Coase Theorem	81
2.4 Ownership of the Commons: Back to Geo-Economics of Climate Change	81
3. CLIMATE CHANGE AND THE KYOTO PROTOCOL	82
3.1 Some Background	82
3.2 Recent International Agreements	83
4. ECONOMIC INSTRUMENTS	85
4.1 The Clean Development Mechanism	86
Implementation of CDM Projects	88
Opposition to CDM Projects	89
4.2 Carbon Taxes on Fuels	91
4.3 Tradable Carbon Emission Permits	94
4.4 Carbon Taxes vs. Tradable Emissions Permits	97
5. LATIN AMERICA AND THE KYOTO PROTOCOL	100
6. CONCLUSIONS	104
APPENDIX	105

PART 2	107
CHAPTER 6. THE DYNAMIC GENERAL EQUILIBRIUM MODEL	109
1. THE GENERAL EQUILIBRIUM FRAMEWORK	110
2. RECENT MODELING EFFORTS	112
3. OVERALL STRUCTURE OF THE PRESENT MODEL	113
3.1 Production	114
3.2 Labor Market	116
3.3 Consumption	117
3.4 Government	118
3.5 Income Distribution	120
3.6 Trade	120
3.7 Labor Growth and Capital Formation	122
3.8 Terminal Conditions	123
3.9 Depletion	125
4. CALIBRATION AND DATA	125
APPENDIX	127
A. 1 Energy and Economic Modeling: Global and Developed-Country Models	127
A.2 Aggregate Economic Models	128
A.3 Multi-Sector General Equilibrium Models	129
A.4 Multi-Sector Macro-Econometric Models	129
A.5 Modeling of Energy Consumption and Emissions in Mexico	130
A.6 Current Bottom-up Models	130
CHAPTER 7. SIMULATION RESULTS UNDER PERFECT COMPETITION	133
1. FEATURES OF THE MODEL	134
1.1 Growth and Technology in the Model	134
1.2 Investment and Depletion in the Model	135
1.3 Government Investment in the Model	136
1.4 Environmental Costs in the Model	137
2. RESULTS	139
Scenario 0: The Benchmark Case	139
Scenario 1: Introducing Depletion	140
Scenario 2: Depletion and Deregulation of Electricity Prices	143
Scenario 3: Capital Enhancing Investment in the Energy Sector	144
Scenario 4: Investment and Deregulation of Electricity	146
Scenario 5: Energy Efficient Technological Change	147
Scenario 6: Capital Enhancing Technological Change and Carbon Taxes	148
Scenario 7: Energy Efficiency and Carbon Taxes	150

Scenario 8: Overall Technological Change and Carbon Taxes	151
3. CONCLUSIONS	152
APPENDIX	158
CHAPTER 8. SIMULATION RESULTS UNDER IMPERFECT COMPETITION	161
1. INTRODUCING IMPERFECT MARKETS	162
2. RESULTS	163
Scenario 9: Unemployment and Technological Change	163
Scenario 10: Unemployment and No Technological Change	165
Scenario 11: Unemployment and Energy Efficient Technological Change	167
Scenario 12: Unemployment, Overall Technological Change and Carbon Taxes	168
Scenario 13: Monopoly and Technological Change in the Energy Sector	169
Scenario 14: Monopoly and Overall Energy Efficiency	171
Scenario 15: Monopoly and No Technological Change	" 172
Scenario 16: Monopoly, Unemployment and Carbon Taxes	172
3. CONCLUSIONS	173
APPENDIX	180
CHAPTER 9. EMISSIONS TRADING: INTERSECTORAL AND INTERNATIONAL	183
1. INTRODUCTION	184
2. BACKGROUND	184
3. MODELING STRUCTURE	186
4. RESULTS	189
Scenarios OP and IP: Benchmark Cases for the Disaggregated Mexican Model	189
Scenarios 2P-4P: Introduction of Domestic Tradable Permits	190
Scenarios 5P-7P: Trading Permits with Manufacturers in the United States	192
5. CONCLUSIONS	- 196
CHAPTER 10. CONCLUSIONS	201
1. ENVIRONMENTAL AND ECONOMIC EFFECTS	202
2. FUTURE ENERGY POLICIES	209
REFERENCES	211
