Multiscale Modeling and Simulation of Composite Materials and Structures

 Springer

Contents

Preface v

Chapter 1
Account for Random Microstructure in Multiscale Models 1
Vadim V. Silberschmidt

Chapter 2
Multiscale Modeling of Tensile Failure in Fiber-Reinforced
Composites 37
Zhenhai Xia and W.A. Curtin

Chapter 3
Adaptive Concurrent Multi-Level Model for Multiscale Analysis
of Composite Materials Including Damage 83
Somnath Ghosh

Chapter 4
Multiscale and Multilevel Modeling of Composites 165
Young W. Kwon

Chapter 5
A Micromechanics-Based Notion of Stress for Use
in the Determination of Continuum-Level Mechanical Properties
via Molecular Dynamics 203
Francesco Costanzo and Gary L. Gray

Chapter 6
Multiscale Modeling and Simulation of Deformation
in Nanoscale Metallic Multilayered Composites 235
F. Akasheh and H.M. Zbib

Chapter 7
Multiscale Modeling of Composites Using Analytical Methods271
L.N. McCartney

Chapter 8
Nested Nonlinear Multiscale Frameworks for the Analysis
of Thick-Section Composite Materials and Structures 317
Rami Haj-Ali

Chapter 9
Predicting Thermooxidative Degradation and Performance
of High-Temperature Polymer Matrix Composites 359
G.A. Schoeppner, G.P. Tandon and K.V. Pochiraju

Chapter 10
Modeling of Stiffness, Strength, and Structure–Property
Relationship in Crosslinked Silica Aerogel 463
Samit Roy and Awlad Hossain

Chapter 11
Multiscale Modeling of the Evolution of Damage
in Heterogeneous Viscoelastic Solids 495
David H. Allen and Roberto F. Soares

Chapter 12
Multiscale Modeling for Damage Analysis 529
Ramesh Talreja and Chandra Veer Singh

Chapter 13
Hierarchical Modeling of Deformation of Materials
from the Atomic to the Continuum Scale 579
Namas Chandra

Index..... 625
