Contents

Contributors	ix
Acknowledgment	xiii
1 Introduction	1
<i>Kurt H. Stern</i>	
1.1 Protective coatings	1
1.2 Stresses	1
1.3 Selection of coating materials	2
1.4 Methods of application	3
1.5 Electroplating – an example of a technology	3
1.6 Plan of this book	5
References	8
2 Electrodeposition of refractory metals from molten salts	9
<i>Kurt H. Stern</i>	
2.1 Introduction	9
2.2 Experimental techniques	12
2.3 The refractory metals	16
References	34
3 Metallizing	38
<i>Kurt H. Stern</i>	
3.1 Introduction	38
3.2 The metallizing process	39
3.3 Properties of metallized layers	43

3.4 Individual metalliders	44
3.5 Conclusions	52
References	52
4 Electrodeposition of refractory compounds from molten salts – borides, carbides and silicides	54
<i>Kurt H. Stern</i>	
4.1 Introduction	54
4.2 Methodology	55
4.3 Boron and the borides	56
4.4 Silicon and the silicides	59
4.5 Carbon and the carbides	62
4.6 Conclusions	71
References	71
5 Laser assisted surface coatings	74
<i>J. Mazumder</i>	
5.1 Laser surface alloying	75
5.2 Laser surface cladding	82
5.3 Laser chemical vapor deposition (LCVD)	89
References	102
6 Sol–gel derived ceramic films – fundamentals and applications	112
<i>C. Jeffrey Brinker, Carol S. Ashley, Richard A. Cairncross, Ken S. Chen, Alan J. Hurd, Scott T. Reed, Joshua Samuel, P. Randall Schunk, Robert W. Schwartz and Cathy S. Scotto</i>	
6.1 Introduction	112
6.2 Sol–gel chemistry	114
6.3 Deposition by dip-coating	118
6.4 Deposition by spin-coating	125
6.5 Effects of entrained condensed phases	125
6.6 Drying of films	128
6.7 Control of film microstructure	133
6.8 Applications	140
6.9 Summary	148
Acknowledgments	148
References	148
7 Solid phase cladding	152
<i>S.B. Dunkerton</i>	
7.1 Introduction	152
7.2 Explosive cladding	153
7.3 Roll bonding	164

7.4 Friction surfacing	168
7.5 Resistance cladding	183
7.6 Hot isostatic pressing	186
7.7 Summary	191
References	192
8 Thermal barrier coatings	194
<i>R.L. Jones</i>	
8.1 Introduction	194
8.2 Material requirements	196
8.3 Stabilization of zirconia	197
8.4 Phase transformation reactions of stabilized zirconia	199
8.5 Identification of phases in stabilized zirconia	203
8.6 Zirconia thermal barrier coatings	204
8.7 Causes for failure of zirconia TBCs	215
8.8 Alleviation of TBC hot corrosion	222
8.9 Future uses and trends for zirconia TBCs	223
References	229
9 Pack cementation diffusion coatings	236
<i>Robert Bianco and Robert A. Rapp</i>	
9.1 Principles and history	236
9.2 Range of applicability	243
9.3 Technical aspects	244
9.4 Possibilities for improvement	246
9.5 Summary	257
Acknowledgments	257
References	257
10 Thermal spray coatings	261
<i>H. Herman and S. Sampath</i>	
10.1 Introduction	261
10.2 Thermal spray processes	262
10.3 Feed materials	267
10.4 Particle-plasma interaction and process control	269
10.5 Deposit formation dynamics	271
10.6 Materials science of thermal spray deposits	275
10.7 Thermal spray coating applications	280
10.8 Thermal spray and advanced manufacturing	286
10.9 Summary	286
References	287

11 Degradation of coatings by high temperature atmospheric corrosion and molten salt deposits	290
<i>N. Birks, G.H. Meier and F.S. Pettit</i>	
11.1 Introduction	290
11.2 Metallic coatings	291
11.3 Ceramic coatings	299
11.4 Erosion	303
References	304
12 Measurement of coating adhesion	306
<i>David Rickerby</i>	
12.1 Introduction	306
12.2 Surface engineering	307
12.3 The requirements of an ideal adhesion test	309
12.4 Methods of adhesion evaluation	313
12.5 Summary	331
References	331
Index	334
