Joseph L. Awange

Energy Resources in East Africa

Opportunities and Challenges

with 52 Figures and 19 Tables

4y Springer

Contents

Preface	VII
Acknowledgement	XI
1 East Africa	1
1.1 Introductory Remarks.....	1
1.2 Background Facts of East Africa.....	4
1.3 Energy in East Africa.....	10
1.4 Household Energy Application and Management.....	20
1.5 Commercial Energy Management.....	23
1.6 Energy Choice Factors.....	31
1.7 Institutional Constraints.....	38
1.8 Global Energy Situation.....	40
1.9 Concluding Remarks.....	43
2 East African Energy Resources	45
2.1 Introductory Remarks.....	45
2.2 Natural Gas.....	47
2.3 Coal.....	48
2.4 Geothermal.....	49
2.5 Petroleum-Based Fuels.....	51
2.6 Hydropower.....	52
2.7 Thermal Generators.....	56
2.8 Co-Generation.....	58
2.9 Solar and Wind Energies.....	60
2.10 Biomass Energy.....	62
2.11 Concluding Remarks.....	64

3	Energy Potentials	65
3.1	Introductory Remarks	65
3.2	Hydro Energy	68
3.3	Co-Generation	74
3.4	Portable Generators	77
3.5	Natural Gas, Coal, and Geothermal	78
3.6	Solar Energy	79
3.7	Wind Energy	81
3.8	Biomass	83
3.9	Concluding Remarks	86
4	Energy Planning and Provision Challenges	87
4.1	Introductory Remarks	87
4.2	Reforms: The Immediate Challenge	93
4.2.1	Effects of Electricity Reforms in Kenya	95
4.2.2	Effects of Electricity Reforms in Uganda	97
4.3	Concluding Remarks	100
5	Alternative Energy Technology for East Africa	101
5.1	Introductory Remarks	101
5.2	Solar Energy Technologies	102
5.2.1	Low Grade Solar Heat Applications	103
5.2.2	High Temperature Solar Heat Applications	110
5.3	Solar Electricity	114
5.3.1	The Development of Photovoltaic	115
5.3.2	Photovoltaic Cost Reduction Trends	116
5.3.3	Properties of Solar Cell Materials	118
5.3.4	The Solar Cell	122
5.3.5	Recombination of Electrons and Holes	123
5.3.6	Cell Efficiency	124
5.3.7	Solar Cell Production Method	127
5.4	Wind Energy	132
5.4.1	Wind Energy Technology	132
5.5	Small Hydro Energy	144
5.6	Biomass Technologies	151
5.6.1	Biomass: The Traditional Use	153
5.6.2	Biomass: Charcoal Production	168
5.6.3	Biomass: Briquette Production	171
5.6.4	Biomass: Industrial Application	173
5.6.5	Biogas	177

5.6.6	Biomass: Gasification	181
5.7	Biomass Energy in Uganda: An East African Model	185
5.7.1	Uganda's Biomass Energy Policy	185
5.7.2	Overall National Energy Policy	188
5.7.3	Forestry Policy and the National Forest Plan	189
5.7.4	Availability of Woody Biomass	190
5.7.5	Agriculture	190
5.7.6	Agricultural Residues (Food and cash crops)	191
5.7.7	Livestock	191
5.7.8	Total Biomass Production and Use	191
5.7.9	Some Biomass Energy Challenges	193
5.7.10	Information Deficiency	194
5.7.11	Technology	195
5.7.12	Institutions	195
5.7.13	Objectives of Biomass Energy Development Strategy	195
5.7.14	Institutional Arrangements	196
5.7.15	Human Resource Development	198
5.7.16	Mobilizing Financial Resources	200
5.7.17	Dissemination and Awareness	201
5.7.18	Quality Control	202
5.7.19	Research	203
5.8	Concluding Remarks	204
6	The Status of Renewable Energy in East Africa	205
6.1	Introductory Remarks	205
6.2	Renewable Energy Research and Development	212
6.2.1	Biomass Energy	213
6.2.2	Solar Energy	214
6.2.3	Wind Energy	214
6.2.4	Research and Development	215
6.3	Impact of Energy Use on The Environment	216
6.3.1	Energy Contribution to CO ₂ Emission in Kenya . .	217
6.3.2	Measures and Options	222
6.4	Concluding Remarks	224
7	Options and Challenges	225
7.1	Human Resource Development	228
7.2	Biomass: The Challenges	232
7.3	Solar Energy Applications: The Constraints	239

7.4	Wind Energy Challenges.	245
7.5	Small Hydropower Systems.	247
7.6	Municipal Waste.	250
7.7	Policy Issues.	251
7.8	Concluding Remarks.	260
8	The Way Forward	261
8.1	Some Guidelines.	268
8.2	Concluding Remarks.	278
	Appendix	279
	Appendix: Energy Units and Conversion Factors.	279
	References	281
	Index	285
