Editors

Reliability and Safety Analyses under Fuzziness

With 106 Figures

Physica-Verlag

A Springer-Verlag Company

Table of Contents

<i>Foreword</i>	v
M. Sugeno	
1. INTRODUCTORY SECTIONS	
<i>Foundations of reliability and safety</i>	3
J. Karpiński, W. Lewin and J. Rudnicki	
<i>Brief introduction to fuzzy sets</i>	31
M. Fedrizzi and J. Kacprzyk	
2. RELIABILITY AND SAFETY ANALYSES UNDER FUZZINESS: GENERAL ISSUES	
<i>System reliability from the viewpoint of evaluation and fuzzy sets theory approach</i>	43
T. Onisawa	
<i>Issues in possibilistic reliability theory</i>	61
B. Cappelle and E.E. Kerre	
<i>Coherent systems in profust reliability theory</i>	81
K.-Y. Cai, Ch.-Y. Wen and M.-L. Zhang	
<i>The usefulness of complete lattices in reliability theory</i>	95
J. Montero, B. Cappelle and E.E. Kerre	
3. FAULT TREE ANALYSIS USING FUZZY SETS AND POSSIBILITY THEORY	
<i>Multi state fault tree analysis using fuzzy probability vectors and resolution identity</i>	113
K.B. Misra and K.P. Soman	
<i>Fuzzy fault tree analysis: case studies</i>	126
A.W. Deshpande and P. Khanna	

<i>FAES - Fault analysis expert system</i>	142
M. Schneider and A. Kandel	
4. LIFE TIME ANALYSIS AND FUZZY SETS	
<i>Reliability estimation based on fuzzy life time data</i>	153
R. Viertl and W. Gurker	
<i>Lifetime tests for imprecise data and fuzzy reliability requirements</i>	169
O. Hryniewicz	
5. RELIABILITY AND QUALITY CONTROL IN ENGINEERING SYSTEMS	
<i>Reliability behavior of combined hardware–software systems</i>	183
K.-Y. Cai, Ch.-Y. Wen and M.-L. Zhang	
<i>An application of fuzzy set theory to reliability analysis: Reliability prediction for equipment using fuzzy inference</i>	196
T. Murata	
<i>Application of fuzzy relational modelling to industrial product quality control</i>	203
Y. Qian, P.J.C. Tessier and G.A. Dumont	
<i>An application of fuzzy structural modeling to relation diagram method in quality control</i>	217
S. Nagasawa	
6. RELIABILITY OF MAN-MACHINE SYSTEMS	
<i>Human reliability analysis with fuzzy integral</i>	233
T. Washio and M. Kitamura	
<i>Fuzzy reliability analysis of labour (man-machine) systems</i>	245
A. Rotshtein	
7. SAFETY AND RISK ANALYSES	
<i>Risk index and application of fuzzy logic</i>	273
Ch. Preyssl and Y. Nishiwaki	
<i>Risk-based ranking in inspection of industrial facilities</i>	285
A.A. Ibrahim and B.M. Ayyub	

- A probabilistic-fuzzy model for seismic hazard* 302
D.M. Frangopol and K. Hong
- Seismic reliability analysis of existing structures based on fuzzy probability* 326
H. Furuta, M. Sugito, S. Yamamoto and N. Shiraishi
- Combined probability-possibility evaluation theory for structural reliability* 341
H. Kawamura and Y. Kuwamoto
- Reliability assessment using variance reduction techniques based on fuzzy system performance* 358
K.-L. Lai and B.M. Ayyub
