Enabling Enterprise Transformation

Business and Grassroots Innovation for the Knowledge Economy

Contents

1 An ICT-Enabled Innovation and Enterprise Transformation 1
An ICT-Enabled Transformation: A New Technoeconomic Paradigm 4
A New Paradigm for Development 7
Technological Revolutions, Crises, Stimulus and ICT 9
Innovation Ecosystems, Innovation Clusters and ICT 12
The Enterprise Transformation Imperative 14
Transforming Business and the Future of Competition 16
A Networked Economy and Knowledge-Based Enterprise 17
Building on Emerging Lessons of Development 18
Integrating ICT into Business Development Strategy 19
Thinking Creatively About ICT-Enabled Transformation 21
A Process of Self-Discovery 22
Structure 22
Themes 24

2 Implications of the ICT Revolution for Business 27
Promises of the ICT Revolution for Business and Development 28
Early Phase of a Technological Revolution 29
Early Phase of a Productivity Revolution 31
New Competitive Strategies 34
Intelligent Enterprise 36
New Organizations and Markets 37
New Financial Services 42
Media Industry Revolution 44
Intelligent Infrastructure and Supply Chains 46
Energy and Environment 48
Managing Risks 50
Wasting Scarce Development Resources 51
Exacerbating Inequalities 51
Reinforcing Existing Power Structures and Hierarchies 54
Controlling, Not Empowering 55
Polluting, not Greening 55
Productivity, Growth and Technological Determinism 56

3 Strategic Options for Private Sector Development 59
Three Fundamental Roles 59
Three Strategic Options for Development 62
Promoting the ICT Industries 62
Deploying ICT to Transform User Industries and Services 68
Leveraging ICT as an Enabling and Connecting Infrastructure 69

4 Transforming Enterprises: Innovation, Networking and Diffusion 73
Defining e-Business 74
E-Business as Enabler for Innovation and Transformation 76
Leveraging ICT for Innovation 77
Enabling New Forms of Innovation 81
Offshoring Innovation 84
Cocreating the Knowledge Environment 85
Enabling Demand-Driven Supply Chains 85
Linking e-Business to Institutional Learning and Managerial Innovation 86
Aligning Innovation, ICT and Business Strategies 90
Managing Big Change and Business Process Innovation 91
Understanding e-Business Diffusion, Drivers and Barriers 94
E-Business Diffusion in Developing Countries 96
Case: e-Business in China 97
OECD Experience with e-Business Diffusion Programs 99
Designing e-Business Diffusion Programs 103
Information, Training and Consultancy Services for e-Business Adoption 103
Sectoral e-Business Support 104
Shared, Low-Cost, On-Demand e-Business Solutions 106
Matching-Grants and Cluster Support 107
Conclusion 110

5 Transforming Business Environment 113
Improving Investment Climate and Regulatory Environment 114
Simplifying Government-to-Business Transactions 117
Supporting Access to Information, Finance and Online Business Services 118
Making Government Procurement Competitive, Transparent and Innovation-inducing 121
Facilitating Trade 124
Promoting Connectivity for SMEs 127
Promoting Market-Oriented Business Development Services 130
Case: Mexico's e-Biz and e-Gov Business Services 131

6 ICT Services Industry for an Innovation Economy 135
ICT as a Dynamic Sector of Economy 136
ICT Competencies Necessary for Broad-Based Development 137
Should New Industrial Policies be Adopted? 138
ICT Sector as a User and Driver of Innovation 141
Potential of the Services Offshoring Revolution 142
Entry Strategies to Global Markets 144
No One-Size-Fits-All Export Strategy 149
Assessing Competitive Advantage in Offshoring 151
What about the Domestic Market? 153
Digital Content and the Media Industry 156

7 Developing the ICT Industry Ecosystem 159
Responses to IT Sector Development Challenges 161
Promotion Funds 164
Incubators: Roles, Models and Success Factors 166
Success Factors 168
Parks and Clusters 170
Telecenters for Outsourcing 172
Emerging Lessons for Developing Technology Parks 173
Management, Private Sector Participation and Financing 173
Marketing, Recruitment and Product-Service Mix 174
Linkages and Partnerships 174
Physical, Communication and Social Infrastructures 175
Finance and Business Support Services 175
Enabling National Policies and Strategies 176
Public–Private Partnership in Promoting IT/ITES 177
Comprehensive Programs for IT Sector Development 179
Supporting ICT Research and Adaptation 182
Matching Instruments to Country Conditions 182

8 Telecenter Enterprises and Grassroots Innovation 185
Telecenters 186
Socioeconomic Context for Telecenters 187
Business Models and Financial Sustainability 188
Mix of Services, Impact and Sustainability 191
Cost Effective and Affordable Technologies 196
Capacity Building to Manage Shared Access 197
Collaborating for Shared Services 198
Linking Telecenters to a Sustainable Ecosystem 200
Promoting Grassroots Innovation 204
The Next 4 Billion: A Market Approach 206
Strategies to Serve the Base of the Pyramid 208

The User Innovation Revolution 209
Social Knowledge Creation 210
Grassroots Innovation Networks 212
Modernizing Microfinance Institutions 213
Grassroots Innovation Funds 213
Grassroots Innovation for Poverty Reduction 215

9 A Holistic Framework for Enterprise and Social Transformation 217
A Holistic Framework 217
Role of a Holistic Framework 219
Taking Account of Synergies and Economies of Scale 220
Integrating ICT into Private Sector Development Strategies 221
E-Development as a Technoeconomic Paradigm 222
E-Development Framework as a Shaping Strategy 224
Linking E-Business to E-Development 225
Linking ICT Sector Capabilities to e-Development 227
Linking Telecenters to e-Development 228
Linking e-Society to e-Development 229
Designing Key Elements of e-Development 230
A Vision of e-Transformation 230
Policies 236
Institutions 244
Human Resources for e-Transformation 249
Dynamic Information Infrastructure 259
Technological Changes and the Next Generation Network 261
Development of Dedicated Networks 264
Information Infrastructure and e-Transformation 265

10 Lessons and Conclusions 267
Leveraging ICT for New Business Development Strategies 268
Comanaging ICT, Innovation, Entrepreneurship and SME Development Policies 271
Adopting a Holistic Approach to e-Transformation and Innovation 272
Prioritizing Portfolios for Business Innovation and Transformation 275
Addressing Soft Aspects: Policies, Institutions, Leadership, Culture 277
Building Strategic, Knowledge-based Partnerships 282
Balancing Strategic Direction with Grassroots Innovation and Experimentation 284
Building Local Learning Capabilities 287
