Contents

Introduction	1
1.1 Subject of Analysis	1
1.2 International Evidence on the Risk-free Rate and the Equity Premium	3
1.3 Purpose and Outline of Analysis	9
1 Intertemporal Asset Pricing: Theory	13
2 The Market Pricing Kernel Approach	15
2.1 The Market Pricing Kernel	15
2.1.1 Definition	15
2.1.2 Equivalent Characterizations	16
2.1.3 Absence of Arbitrage Opportunities	18
2.1.4 Existence of a One-period Risk-free Asset	19
2.1.5 Completeness of the Market	19
2.2 Arbitrage Free Versus Equilibrium Asset Pricing	20
2.3 Market Pricing Kernel and Linear Asset Pricing	21
2.4 Summary of Chapter 2	23
3 Implications of Asset Prices for the Market Pricing Kernel	25
3.1 Implications of Specific Asset Price Processes	25
3.2 Estimating Conditional Distributions from Asset Prices	26
3.3 Placing Restrictions on the Unconditional Distribution Using Time Series of Asset Returns	29
3.3.1 Motivation	29
3.3.2 Variance Bounds of the Market Pricing Kernel	32
3.3.2.1 Variance Bound Imposed by One Risky Asset	32
3.3.2.2 Variance Bound Imposed by More than One Risky Asset	35
3.3.3 Statistical Tests of Parametrized Market Pricing Kernels Using Variance Bounds	38
3.4 Summary of Chapter 3	40

4	Parametric Models of the Market Pricing Kernel	41
4.1	Conditional Capital Asset Pricing	42
4.2	Consumption-based Equilibrium Asset Pricing	46
4.2.1	Intertemporal Consumption and Investment Choice of a Representative Agent	46
4.2.1.1	Intertemporal Consumption and Investment Choice of Individuals.	47
4.2.1.2	Preferences over Consumption Paths	48
4.2.1.3	Optimal Intertemporal Consumption and Investment Choice of Individuals.	59
4.2.1.4	Aggregation of Individual Behavior.	64
4.2.1.5	Summary.	67
4.2.2	Representative Agent with Time-additive Expected Utility.	68
4.2.2.1	Time-additive Expected Utility with Con- stant Relative Risk Aversion.	68
4.2.2.2	Deriving the Market Pricing Kernel	69
4.2.2.3	The Consumption-based CAPM.	69
4.2.2.4	Time-additive Expected Logarithmic Utility and the Static CAPM.	73
4.2.3	Representative Agent with Recursive Non-expected Utility.	74
4.2.3.1	Recursive Non-expected Utility.	75
4.2.3.2	Deriving the Market Pricing Kernel.	79
4.2.3.3	A Two-factor CAPM.	82
4.3	Summary of Chapter 4.	85
5	The Calibration Approach for Empirically Investigating Parametric Models of the Market Pricing Kernel	87
5.1	Calibration Versus Estimation.	87
5.2	Calibration of a Model Economy with i.i.d. Production Growth: An Illustrative Example.	96
5.2.1	The Model Economy.	96
5.2.2	Equilibrium Rates of Return Implied by Time- additive Expected Utility.	97
5.2.3	Equilibrium Rates of Return Implied by Recursive Non-expected Utility.	98
5.2.4	Excursus: Equivalence of Both Utility Specifications under i.i.d. Consumption Growth	99
5.3	Review of Studies Applying the Calibration Approach	101
5.4	Summary of Chapter 5.	106

II Intertemporal Asset Pricing: Empirical Analysis 107

6	Overview and Description of Data	109
6.1	Overview	109
6.2	Description of Data	111
6.2.1	Asset Price Data	111
6.2.1.1	Original Time Series	111
6.2.1.2	Length of Time Interval and Method of Return Calculation	116
6.2.1.3	Estimating Dividend Returns	121
6.2.2	Real Tax Adjusted Returns	123
6.2.2.1	German Tax Rates, Taxation Scenarios and the Marginal Investor	123
6.2.2.2	Calculating Real Tax Adjusted Returns	127
6.2.2.3	Stylized Facts about Real Tax Adjusted Returns	127
6.2.3	Consumption Data	132
7	Analyzing Variance Bounds of the Market Pricing Kernel	139
7.1	Implications of Different Return Time Series for the Market Pricing Kernel	140
7.1.1	Bounds Implied by Different Sets of Assets	140
7.1.2	Sensitivity to the Method of Return Calculation	141
7.1.3	Effects of Taxation	143
7.1.4	Sensitivity to the Length of the Time Intervals	144
7.1.5	Summary	146
7.2	Implications for the Parameters of Parametric Models of the Market Pricing Kernel	147
7.2.1	Parametric Model Derived from Time-additive Expected Utility with Constant Relative Risk Aversion	148
7.2.2	Parametric Model Derived from Time-additive Expected Logarithmic Utility	153
7.2.3	Parametric Model Derived from Recursive Non-expected Utility	154
7.2.4	Summary	157
8	Applying the Calibration Approach	159
8.1	A Model Economy with State-switching Production Growth	161
8.1.1	Reasons for a State-switching Economy	161
8.1.2	Implied Equilibrium Rates of Return	163
8.1.2.1	Return on the Market Portfolio	163
8.1.2.2	Risk-free Rate of Return	164
8.1.2.3	Risk Premium on the Market Portfolio	165
8.1.3	The Markov State-switching Model	166

8.1.3.1	Estimation of the Model.	166
8.1.3.2	Evaluation of the Model.	168
8.1.3.3	Simulation of the Model.	173
8.2	Analysis of the Non-levered Market Portfolio.	174
8.2.1	Time-additive Expected Utility.	174
8.2.2	Recursive Non-expected Utility.	178
8.2.3	Summary.	181
8.3	Analysis of the Levered Market Portfolio.	182
8.3.1	Equity Equals Levered Market Portfolio.	182
8.3.2	Implied Equilibrium Return on Equity.	184
8.3.3	Calibration Results.	185
8.3.3.1	Time-additive Expected Utility.	185
8.3.3.2	Recursive Non-expected Utility.	190
8.3.4	Summary.	193
8.4	Separating Consumption and Dividends.	195
8.4.1	The Bivariate Model.	195
8.4.2	Implied Equilibrium Return on Equity.	197
8.4.3	Growth Rates of Payoff on Equity.	198
8.4.4	The Bivariate Markov State-switching Model.	202
8.4.4.1	Estimation of the Model.	202
8.4.4.2	Evaluation of the Model.	206
8.4.4.3	Simulation of the Model.	207
8.4.5	Calibration Results.	209
8.4.6	Summary.	217
8.5	Summary of Chapter 8.	218
9	Evaluating the Calibrated Equilibrium Models	221
9.1	Additional Unconditional Properties of Implied Rates of Return	222
9.1.1	Properties of One-period Returns.	222
9.1.2	Mean Reversion in Multiperiod Returns.	225
9.2	Using Conditional Moments.	232
9.3	Summary of Chapter 9.	239
10	Conclusion	241
Appendix		249
A.1	Expected Value of the Product of Jointly Lognormally Dis- tributed Variables.	249
A.2	Additional Tables and Figures.	251
	List of Symbols	263
	List of Tables	267
	List of Figures	271
