Karyotypes of Parasitic Hymenoptera
## Contents

1 Chromosomes of Hymenoptera .................................................. 1
  1.1 Karyotype Structure of Hymenoptera ..................................... 1
      1.1.1 Main Genetic Features of Life Cycle ............................. 1
      1.1.2 Chromosome Numbers and Ploidy Levels ......................... 3
      1.1.3 Size of Mitotic Chromosomes ...................................... 5
      1.1.4 Centromere Position and Centromere Index ..................... 5
      1.1.5 Heterochromatic and Euchromatic Chromosome Segments: C-Banding ............................................. 6
      1.1.6 Nucleolus Organiser: AgNOR-Banding .............................. 7
      1.1.7 Other Techniques of Differential Chromosome Segmentation ........ 7
      1.1.8 Details of Meiosis and Structure of Meiotic Chromosomes .... 9
  1.2 Diversity of Chromosome Sets of Hymenoptera ......................... 11
      1.2.1 Karyotypic Features of Various Taxonomic Groups ............. 11
      1.2.2 Types of Chromosomal Rearrangements .......................... 13
  1.3 Systematic and Phylogenetic Implications of Chromosomal Characters in Hymenoptera ........................................................ 17
      1.3.1 Taxonomic Significance of Karyotypic Features ................ 17
      1.3.2 Phylogenetic Implications of Karyotypic Characters .......... 22

2 Material and Methods ............................................................. 31
  2.1 Material Studied ..................................................................... 31
  2.2 Methods of Obtaining Chromosomal Preparations ...................... 32
  2.3 Methods of Analysing Chromosomal Preparations ...................... 33
  2.4 Sources of Data on Taxonomy and Phylogeny ............................ 33

3 Morphological Features of Karyotypes of Parasitic Hymenoptera ....... 35
  3.1 Chromosome Number and Nuclear DNA Content .......................... 35
  3.2 Size of Mitotic Chromosomes: Centromere Position and Centromere Index .................................................. 37
  3.3 Differential Chromosome Staining ......................................... 38
  3.4 Details of Meiosis and Structure of Meiotic Chromosomes .......... 39
