Contents

Dedication v
List of Figures xv
List of Tables xviii
Preface xix

Part I Conceptual and methodological issues

1. WELL-BEING AND POVERTY 3
1.1 The welfarist approach 3
1.2 Non-welfarist approaches 5
1.2.1 Basic needs and functionings 5
1.2.2 Capabilities 7
1.3 A graphical illustration 8
1.3.1 Exercises 11
1.4 Practical measurement difficulties for the non-welfarist approaches 12
1.5 Poverty measurement and public policy 15
1.5.1 Poverty measurement matters 15
1.5.2 Welfarist and non-welfarist policy implications 16

2. THE EMPIRICAL MEASUREMENT OF WELL-BEING 19
2.1 Survey issues 19
2.2 Income versus consumption 21
2.3 Price variability 22
2.3.1 Exercises 26
2.4 Household heterogeneity 27

2.4.1 Estimating equivalence scales 28
2.4.2 Sensitivity analysis 29
2.4.3 Household decision-making and within-household inequality 32
2.4.4 Counting units 33
2.5 References for Chapters 1 and 2 33

Part II Measuring poverty and equity

3. INTRODUCTION AND NOTATION 39
3.1 Continuous distributions 40
3.2 Discrete distributions 41
3.3 Poverty gaps 42
3.4 Cardinal versus ordinal comparisons 43

4. MEASURING INEQUALITY AND SOCIAL WELFARE 49
4.1 Lorenz curves 49
4.2 Gini indices 53
4.2.1 Linear inequality indices and S-Gini indices 53
4:2.2 Interpreting Gini indices 57
4.2.3 Gini indices and relative deprivation 59
p 4.3 Social welfare and inequality 60
4.4 Social welfare 63
4.4.1 Atkinson indices 63
4.4.2 S-Gini social welfare indices 65
4.4.3 Generalized Lorenz curves 65
4.5 Statistical and descriptive indices of inequality 66
4.6 Decomposing inequality by population subgroups 67
4.6.1 Generalized entropy indices of inequality 67
4.6.2 A subgroup Shapley decomposition of inequality indices 69
4.7 Appendix: the Shapley value 71
4.8 References 72

5. MEASURING POVERTY 81
5.1 Poverty indices 81
5.1.1 The EDE approach 81
5.1.2 The poverty gap approach 82
5.1.3 Interpreting FGT indices 83

●

5.1.4 Relative contributions to FGT indices 84
5.1.5 EDE poverty gaps for FGT indices 86
5.2 Group-decomposable poverty indices 87
5.3 Poverty and inequality 88
5.4 Poverty curves 89
5.5 S-Gini poverty indices 90
5.6 Normalizing poverty indices 91
5.7 Decomposing poverty 92
5.7.1 Growth-redistribution decompositions 92
5.7.2 Demographic and sectoral decomposition of differences in FGT indices 95
5.7.3 The impact of demographic changes 96
5.7.4 Decomposing poverty by income components 97
5.8 References 98
6. ESTIMATING POVERTY LINES 103
6.1 Absolute and relative poverty lines 103
6.2 Social exclusion and relative deprivation 105
6.3 Estimating absolute poverty lines 106
6.3.1 Cost of basic needs 106
6.3.2 Cost of food needs 106
6.3.3 Non-food poverty lines 110
6.3.4 Food energy intake 113
6.3.5 Illustration for Cameroon 114
6.4 Estimating relative and subjective poverty lines 116
6.4.1 Relative poverty lines 116
6.4.2 Subjective poverty lines 119
6.4.3 Subjective poverty lines with discrete information 120
6.5 References 121
7. MEASURING PROGRESSIVITY AND VERTICAL EQUITY 127
7.1 Taxes and transfers 127
7.2 Concentration curves 128
7.3 Concentration indices 130
7.4 Decomposition of inequality into income components 130
7.4.1 Using concentration curves and indices 130
7.4.2 Using the Shapley value 132

7.5 Progressivity comparisons
7.5.1 Deterministic tax and benefit systems
7.5.2 General tax and benefit systems
7.6 Tax and income redistribution
7.7 References

8. HORIZONTAL EQUITY, RERANKING AND REDISTRIBUTION
8.1 Ethical and other foundations
8.2 Measuring reranking and redistribution
8.2.1 Reranking
8.2.2 S-Gini indices of equity and redistribution
8.2.3 Redistribution and vertical and horizontal equity
8.3 Measuring classical horizontal inequity and redistribution
8.3.1 Horizontally-equitable net incomes
8.3.2 Change-in-inequality approach
8.3.3 Cost-of-inequality approach
8.3.4 Decomposition of classical horizontal inequity
8.4 References

Part III Ordinal comparisons

9. DISTRIBUTIVE DOMINANCE
9.1 Ordering distributions
9.2 Sensitivity of poverty comparisons
9.3 Ordinal comparisons
9.4 Ethical judgements
9.4.1 Dominance tests
9.4.2 Paret ian j udgments
9.4.3 First-order judgments
9.4.4 Higher-order judgments
9.5 References

10. POVERTY DOMINANCE
10.1 Primal approach
10.1.1 Dominance tests
10.1.2 Nesting of dominance tests
10.2 Dual approach
10.2.1 First-order poverty dominance

10.2.2 Second-order poverty dominance 174
10.2.3 Higher-order poverty dominance 175
10.3 Assessing the limits to dominance 176
10.4 References 177

11. WELFARE AND INEQUALITY DOMINANCE 181
11.1 Ethical welfare judgments 181
11.2 Tests of welfare dominance 182
11.3 Inequality judgments 184
11.4 Tests of inequality dominance 186
11.5 Inequality and progressivity 187
11.6 Social welfare and Lorenz curves 188
11.7 The distributive impact of benefits 189
11.8 Pro-poor growth 190
11.8.1 First-order pro-poor judgements 190
11.8.2 Second-order pro-poor judgements 192
11.9 References 194

Part IV Policy and growth

12. POVERTY ALLEVIATION: POLICY AND GROWTH 199
12.1 The impact of targeting 199
12.1.1 Group-targeting a constant amount 200
12.1.2 Inequality-neutral targeting 201
12.2 The impact of changes in the poverty line 204
12.3 Price changes 207
12.4 Tax and subsidy reforms 209
12.5 Income-component and sectoral growth 211
12.5.1 Absolute poverty impact 212
12.5.2 Poverty elasticity 213
12.6 Overall growth elasticity of poverty 213
12.7 The Gini elasticity of poverty 216
12.7.1 Inequality and poverty 216
12.7.2 Increasing bi-polarizatioii and poverty 217
12.8 The impact of policy and growth on inequality 218
12.8.1 Growth, fiscal policy, and price shocks 218
12.8.2 Tax and subsidy reforms 220

12.9 References

13. TARGETING IN THE PRESENCE OF REDISTRIBUTIVE COSTS
- 13.1 Poverty alleviation, redistributive costs and targeting
- 13.2 Costly targeting
  - 13.2.1 Minimizing the headcount
  - 13.2.2 Minimizing the average poverty gap
  - 13.2.3 Minimizing a distribution-sensitive poverty index
  - 13.2.4 Optimal redistribution
- 13.3 References

Part V Estimation and inference

14. AN INTRODUCTION TO *DAD:* A SOFTWARE FOR DISTRIBUTIVE ANALYSIS
- 14.1 Introduction
- 14.2 Loading, editing and saving databases in *DAD*
- 14.3 Inputting the sampling design information
- 14.4 Applications in *DAD:* basic procedures
- 14.5 Curves
- 14.6 Graphs
- 14.7 Statistical inference: sampling distributions, confidence intervals and hypothesis testing 252
- 14.8 References 253

15. NON-PARAMETRIC ESTIMATION IN *DAD* 259
- 15.1 Density estimation 259
  - 15.1.1 Uniyariate density estimation 259
  - 15.1.2 Statistical properties of kernel density estimation 262
  - 15.1.3 Choosing a window width 263
  - 15.1.4 Multivariate density estimation 265
  - 15.1.5 Simulating from a density estimate 265
- 15.2 Non-parametric regressions 267
- 15.3 References 269

16. ESTIMATION AND STATISTICAL INFERENCE 271
- 16.1 Sampling design 271
- 16.2 Sampling weights 273

16.3 Stratification 274
16.4 Multi-stage sampling 275
16.5 Impact of sampling design on sampling variability 278
16.5.1 Stratification 278
16.5.2 Clustering 280
16.5.3 Finite population corrections 281
16.5.4 Weighting 283
16.5.5 Summary 284
16.6 Estimating a sampling distribution with complex sample designs 284
16.7 References 287

17. STATISTICAL INFERENCE IN PRACTICE 289
17.1 Asymptotic distributions 289
17.2 Hypothesis testing 291
17.3 p-values and confidence intervals 293
17.4 Statistical inference using a non-pivotal bootstrap 294
17.5 Hypothesis testing and confidence intervals using pivotal bootstrap statistics 295
17.6 References 297

Part VI Exercises

18. EXERCISES 303
18.1 Household size and living standards 303
18.2 Aggregative weights and poverty analysis 303
18.3 Absolute and relative poverty 304
18.4 Estimating poverty lines 304
18.5 Descriptive data analysis 306
18.6 Decomposing poverty 306
18.7 Poverty dominance 306
18.8 Fiscal incidence, growth, equity and poverty 307
18.9 Sampling designs and sampling distributions 316
18.10 Equivalence scales and statistical units 317
18.11 Description of illustrative data sets 319
