DORDRECHT / BOSTON / LANCASTER

CONTENTS

Preface xi

I. INTRODUCTION 3

II. ON THEORY 15

1. Aggregation without side conditions 17
1.1. Introduction 17
1.2. Examples of consistent aggregation 22
1.3. Nataf's result on consistent aggregation 27
1.4. Some remarks on consistent multi-stage aggregation 35
1.5. Some further results on consistent aggregation 40
1.6. Consequences for empirical work 48
Appendix A: Differences between some aggregates 50
Appendix B: Proof of some lemmas 56

2. Aggregation of production functions under optimum conditions 63
2.1. Introduction 63
2.2. The production frontier and some properties of production functions 65
2.3. Aggregation on the frontier 76
2.4. Some consequences of the foregoing results 83

3. Aggregation and individual preferences 88
3.1. Introduction 88
3.2. Aggregation of utility (functions) 89

3.3. Collective preference schemes based on individual schemes; Arrow's conditions 94
3.4. Some examples of aggregation of individual preferences; contingencies of the occurrence of inconsistencies 98
3.5. Proof of Arrow's "Possibility Theorem" 105
3.6. Aggregation of individual demand functions; the representative consumer 113
Appendix: Proof of some theorems 134

4. Aggregation and the distribution of individual characteristics 152
4.1. Introduction 152
4.2. Consistent aggregation in continuous analysis 155
4.3. Inconsistent aggregation: the analogy procedure 162
4.4. The distribution approach to the problem of deriving an industry's short-run production function 168
4.5. The distribution approach to the problem of aggregation over markets 175

5. Linear aggregation and estimation 184
5.1. Introduction 184
5.2. Aggregation bias 185
5.3. Aggregation gain 197
Appendix: Proof of two lemmas 208

6. Aggregation over arguments of a function 211
6.1. Introduction 211
6.2. Aggregation over commodities 211
6.3. An example 218

III. SOME APPLICATIONS 223

7. Aggregation and consumer behaviour 225
7.1. Introduction 225
7.2. Money illusion and aggregation bias 226
7.3. A quadratic Engel curve demand for per capita data 232
7.4. An alternative aggregate demand system 244
7.5. Demand for leisure: a simulation example 262
Appendix: the correlation-coefficient matrices used in 7.5 268

8. Collective choice and macro-economic policy 271
8.1. Introduction 271
8.2. Objective functions 272
8.3. The valuation of a compromise 274
8.4. Aggregation of results of actual interviewing (Canada) 285
8.5. Some Dutch evidence 289

IV. EPILOGUE: Optimal aggregation 301
