Oliver Deke

Environmental Policy Instruments for Conserving Global Biodiversity

Springer

Contents

1 Aim and Scope of the Study 1

2 The Issues 8

2.1 Stylized Facts on Biodiversity 8

2.1.1 Definitions, Indicators, and Life Support Functions 8

2.1.2 Biodiversity Loss and Its Causes 13

2.2 International Policies for the Protection and Conservation of Global Biodiversity 23

2.3 The Economics of Biodiversity 29

2.3.1 Biodiversity and Ecosystem Services from an Economic Perspective 29

2.3.2 Valuation of Ecosystem Services 34

2.3.3 Ecosystem Services and Resource Management 40

2.3.4 Temporal and Spatial Aspects of Resource Management 48

3 Market-Based Incentives to Preserve Biodiversity: Commercial Use of, and Trade in, Genetic Resources 57

3.1 Genetic Resources as Economic Goods 57

3.1.1 Economic Properties and Commercial Use 57

3.1.2 Property Right Regimes 64

3.2 Commercial Uses of Genetic Resources and Biodiversity Conservation: Theory and Practical Problems 98

3.2.1 Joint Supply of Private and Public Ecosystem Services: The Theoretical Concept 99

3.2.2 Practical Problems of Bioprospecting 108

3.3 Trade in Genetic Resources: Empirical Evidence 115

3.3.1 Industrial Use of Genetic Resources: A Description by Sectors 117

3.3.2 Transactions with Genetic Resources: Empirical Evidence on Market Values and Quantities 124

3.4 Trade in Genetic Resources from a Theoretical Perspective 144
3.4.1 The Private Value of Genetic Resources in Pharmaceutical R&D: The Concept of Redundancy 145
3.4.2 Alternative R&D Settings and Their Impact upon Private Resource Value 155
3.4.3 Alternative Ecological Environments and Their Impact upon the Private Resource Value 165
3.4.4 The Private Value of Genetic Resources in Agriculture 174
3.5 Summary of Results 176

4 Preserving Biodiversity as a Global Public Good: Protected Areas and International Transfers 185
4.1 The Economics of Protected Area Policies 185
4.1.1 Positive Externalities and Biodiversity as a Global Public Good 185
4.1.2 International Protected Area Policy: Empirical Evidence 204
4.2 Transfers by the Global Environment Facility (GEF) 220
4.2.1 The GEF as a Multilateral Financing Institution 221
4.2.2 The GEF Policy on Biodiversity 224
4.2.3 Transfers for Protected Area Projects: An Empirical Analysis 232
4.2.4 Sustainable Finance of Protected Areas in GEF Projects 244
4.3 GEF Transfers and the Incremental Cost Principle: Cost-Effectiveness and Incentive Compatibility 252
4.3.1 GEF Biodiversity Policy and the Incremental Cost Principle 253
4.3.2 The Incremental Cost of Biodiversity Conservation from a Theoretical Perspective 259
4.3.3 Applying the Incremental Cost Principle: Incremental Cost Analyses 272
4.4 The Finance of the Global Environment Facility (GEF): Free Riding and Equitable Burden Sharing 285
4.4.1 Generating Funds: An Empirical Description of the GEF Replenishment Process 287
4.4.2 Interactions of Donor Countries from a Theoretical Perspective 291

4.4.3 Burden Sharing in the Finance of the GEF: An Empirical Analysis 313

4.5 Summary of Results 332

5 Conclusion **343**

References **356**
