

John Cowell

Essential VB.NET *fast*

Springer

Contents

1. WHY USE VISUAL BASIC .NET?.....	1
Introduction.....	2
What do I need?.....	3
Why upgrade?.....	3
Is this book for you?.....	4
How to use this book.....	5
Don't type!.....	6
2. THE VISUAL BASIC .NET IDE.....	9
Introduction.....	10
Running Visual Basic.....	10
Project types.....	11
The Visual Basic .NET IDE.....	12
The Solution Explorer.....	14
The Help system.....	16
The Windows Form Designer.....	17
The Toolbox.....	18
Adding custom controls.....	19
The Properties window.....	21
3. WINDOWS CONTROLS.....	23
Introduction.....	24
Adding controls to a window.....	24
Selecting controls.....	25
Moving and resizing controls.....	26
Changing properties.....	26
Common properties.....	28
The Label control.....	30
Properties of the Label control.....	30
The TextBox control.....	31
The PictureBox control.....	33
The CheckBox, RadioButton and GroupBox controls.....	34
The Button control.....	36
Creating a good user interface.....	37
Positioning and grouping.....	38

Consistency.....	38
Colours and font size.....	39
Images.....	40
Making choices.....	40
4. WINDOWS APPLICATIONS.....	41
Introduction.....	42
Showing holiday pictures.....	42
Creating a new project.....	43
Adding the controls.....	44
Completing the user-interface.....	45
Handling events.....	46
The Form Load event handler.....	47
The Button event handlers.....	50
A quick way of making event procedures.....	52
The IntelliSense facility.....	52
5. VARIABLES AND OPERATORS.....	55
Introduction.....	56
Naming rules.....	56
Naming controls.....	57
Adding comments.....	57
Variable types.....	58
Naming conventions for variables.....	59
Naming conventions.....	59
Choosing meaningful names.....	60
Choosing consistent names.....	60
Declaring variables.....	61
Option Explicit statement.....	63
Option Strict statement.....	64
Declaring constants.....	65
The Boolean data type.....	65
Data types representing integers.....	66
Data types representing floating point numbers.....	66
The Date data type.....	67
The Object data type.....	67
The String data type.....	68
The Char data type.....	68
The range of data types.....	69
Converting between data types.....	69
Arithmetic operators.....	71
Assignment operators.....	71

Arrays.....	72
Declaring arrays.....	72
Changing array dimensions.....	73
Structures.....	74
6. CONTROLLING PROGRAM FLOW.....	77
Introduction.....	78
The If..Then statement.....	78
The If..Then..Else statement.....	80
Using the Select Case statement.....	81
The comparison operators.....	83
Looping.....	83
The For..Next statement.....	84
Handling errors.....	86
The On Error Statement.....	86
The For Each..Next statement.....	88
The While statement.....	88
The Do..Loop statement.....	90
7. FUNCTIONS AND PROCEDURES.....	93
Introduction.....	94
The Sub statement.....	94
The attributeList options.....	95
The argumentList options.....	96
The Password application.....	97
Creating a procedure.....	101
Passing parameters.....	103
Creating functions.....	107
Call by reference and call by value.....	108
Using a start-up procedure.....	110
8. CLASSES AND OBJECTS.....	113
Introduction.....	114
What is object orientation?.....	114
What are classes and objects?.....	117
Creating and using classes and objects.....	118
The dsBook class.....	119
The attributes.....	119
Referencing the attributes.....	120
ReadOnly and WriteOnly properties.....	121
The shtLoanType attribute.....	122
The onLoan method.....	123

The borrow method.....	123
The displayDetails method.....	124
Creating objects.....	125
Constructors.....	127
Method overloading.....	128
Inheritance.....	129
9. FURTHER WINDOWS CONTROLS.....	131
Introduction.....	132
The Timer control.....	132
The ListBox control.....	133
The ComboBox control.....	136
The ComboBox application.....	136
Handling events.....	138
The MonthCalendar control.....	139
The DateTimePicker control.....	140
TheTrackBar.....	141
The RichTextBox control.....	144
10. WEB APPLICATIONS.....	147
Introduction.....	148
WhatisASP.NET?.....	148
Windows and Web applications.....	149
What do I need to develop Web applications?.....	150
Creating a Web application.....	150
Creating the application.....	152
The supporting code.....	155
11. WEB SERVER CONTROLS.....	159
Introduction.....	160
Web controls.....	160
The Button Web controls.....	160
The Calendar control.....	161
The CheckBox and CheckBoxList controls.....	162
The DropDownList control.....	164
The HyperLink control.....	165
The Image control.....	165
The Label control.....	165
The ListBox control.....	165
The Panel control.....	167
The RadioButton and RadioButtonList controls.....	167

12. WORKING WITH FORMS.....	169
Introduction.....	170
Adding new forms.....	170
The startup form.....	170
Creating forms.....	171
Hiding and showing forms.....	172
Controlling form properties.....	175
Control the Window position.....	177
MDI forms.....	178
Creating an MDI application.....	178
Creating the menu system.....	179
Menu event procedures.....	180
13. WORKING WITH DIALOGS.....	183
Introduction.....	184
The MessageBox class.....	184
Which button was pressed?.....	186
The InputBox function.....	186
Missing optional parameters.....	187
Standard Dialogs.....	188
The ColorDialog control.....	188
The FontDialog Control.....	189
The OpenFileDialog control.....	190
The SaveFileDialog Control.....	194
14. MOUSE AND KEYBOARD EVENTS.....	195
Introduction.....	196
Keyboard events.....	196
Monitoring keyboard events.....	197
The modifier keys.....	198
Mouse events.....	200
MouseDown, MouseUp and MouseMove.....	200
The MouseEventArgs Class.....	201
MouseEnter and MouseLeave.....	204
Dragging and dropping.....	204
Starting to drag.....	205
Dropping.....	206
15. DATABASES AND SQL.....	209
Introduction.....	210
The Book database.....	210

What is SQL?.....	211
Reading records.....	211
The ORDER BY clause.....	212
The WHERE clause.....	213
Modifying records.....	213
Deleting records.....	214
Adding records.....	214
One to many.....	214
16. THE DATA FORM WIZARD.....	217
Introduction.....	218
What does the Wizard do?.....	218
The Data Form Wizard.....	218
17. DATAREADER AND DATASET.....	227
Introduction.....	228
Reading the Book database.....	228
Connecting to the database.....	229
SQL statements.....	230
Error checking.....	232
The DataSet class.....	234
An application using DataSet class.....	234
Connecting to the database.....	235
Reading from the database.....	236
Using the DataSet class.....	236
The completed application.....	238
18. INDEX.....	241
