Springer

Contents

Improving Traffic Flows at No Cost
Robert A. Abrams, Jane N. Hagstrom **1**

Relaxed Toll Sets for Congestion Pricing Problems
Lihui Bai, Donald W. Hearn, Siriphong Lawphongpanich 23

Dynamic Pricing: A Learning Approach
Dimitris Bertsimas, Georgia Perakis **45**

Congestion Pricing of Road Networks with Users Having Different Time Values
Leonid Engelson, Per Olov Lindberg 81

Network Equilibrium Models for Analyzing Toll Highways
Michael Florian 105

On the Applicability of Sensitivity Analysis Formulas for Traffic Equilibrium Models
Magnus Josefsson, Michael Patriksson **117**

Park and Ride for the Day Period and Morning-Evening Commute
Andre de Palma, Yurii Nesterov 143

Bilevel Optimisation of Prices and Signals in Transportation Models
Michael J Smith 159

Minimal Revenue Network Tolling: System Optimisation under Stochastic Assignment.
Kathryn Stewart, Mike Maher 201

An Optimal Toll Design Problem with Improved Behavioural Equilibrium Model: The Case of the Probit Model
Agachai Sumalee, Richard Connors, David Watling 219
