# Contents

<b>1</b>	<b>Introduction</b>	<b>1</b>
1.1	‘Pollution Science’ – Applied or Basic Ecology?	1
1.2	Pollution, Polluters, and Pollutants	3
1.3	Extent and Severity of Impacts	4
1.3.1	Local Scale	4
1.3.2	Regional Scale	5
1.3.3	Global Scale	6
1.4	The State of Pollution-Oriented Studies and the Need for Generalization	6
1.5	Impact Zones of Point Polluters as Models for Ecological and Environmental Research	11
1.6	Summary	13
<b>2</b>	<b>Methodology of the Research and Description of Polluters</b>	<b>15</b>
2.1	Selection of Polluters	15
2.2	History of the Selected Polluters and Their Environmental Impacts	17
2.2.1	Introduction	17
2.2.2	Descriptions of the Polluters	20
2.3	Study Sites and General Sampling Design	89
2.4	Environmental Contamination at Study Sites	102
2.4.1	Sampling and Preservation	102
2.4.2	Analyses	102
2.5	Statistical Approaches	103
2.5.1	Traditional Analyses	103
2.5.2	Meta-analyses	104
2.5.3	Significance of Effects	106
2.6	Summary	106

<b>3</b>	<b>Soil Quality .....</b>	<b>107</b>
3.1	Introduction .....	107
3.2	Materials and Methods .....	108
3.2.1	Topsoil Depth and Soil Stoniness.....	108
3.2.2	Soil pH and Electrical Conductivity .....	109
3.2.3	Soil Respiration .....	110
3.3	Results .....	110
3.3.1	Interdependence of Soil Quality Indices .....	110
3.3.2	Topsoil Depth and Soil Stoniness.....	110
3.3.3	Soil pH and Electrical Conductivity .....	117
3.3.4	Soil Respiration .....	126
3.4	Discussion .....	127
3.4.1	Soil Erosion .....	127
3.4.2	Changes in Soil pH.....	128
3.4.3	Soil Electrical Conductivity.....	129
3.4.4	Changes in Soil Respiration .....	130
3.4.5	Sources of Variation .....	131
3.5	Summary .....	131
<b>4</b>	<b>Plant Growth and Vitality .....</b>	<b>133</b>
4.1	Introduction .....	133
4.1.1	The Vitality of Plants.....	133
4.1.2	Indices of Plant Vitality Used in Our Study .....	134
4.1.3	Carbon Allocation and Allometric Relationships.....	136
4.2	Materials and Methods .....	136
4.2.1	Selection of Study Objects and Plant Individuals .....	136
4.2.2	Chlorophyll Fluorescence.....	137
4.2.3	Leaf/Needle Size and Shoot Length .....	138
4.2.4	Radial Increment .....	139
4.2.5	Needle Longevity in Conifers.....	139
4.2.6	Identification of Traits Associated with Sensitivity.....	140
4.3	Results .....	140
4.3.1	Chlorophyll Fluorescence.....	140
4.3.2	Leaf/Needle Size .....	153
4.3.3	Shoot Growth.....	166
4.3.4	Radial Growth.....	182
4.3.5	Needle Longevity in Conifers.....	182
4.4	Discussion .....	188
4.4.1	Overall Effects of Pollution on Vitality Indices .....	188
4.4.2	Sources of Variation in Pollution Impacts on Vitality Indices .....	191
4.4.3	Carbon Allocation and Allometric Relationships.....	194
4.5	Summary .....	194

<b>5</b>	<b>Fluctuating Asymmetry of Woody Plants.....</b>	<b>197</b>
5.1	Introduction .....	197
5.1.1	Definitions and Theoretical Background.....	197
5.1.2	Use of Fluctuating Asymmetry in Pollution Research.....	197
5.1.3	Misuse and Abuse.....	201
5.2	Materials and Methods .....	201
5.2.1	Sampling and Preservation .....	201
5.2.2	Measurements.....	203
5.2.3	Analysis and Interpretation.....	206
5.3	Results .....	211
5.3.1	Data Validation .....	211
5.3.2	Variation between Plant Individuals and between Study Sites.....	211
5.3.3	Overall Effect of Pollution and Sources of Variation .....	212
5.4	Discussion .....	212
5.4.1	Plants as Study Objects .....	212
5.4.2	Data Quality.....	221
5.4.3	Pollution Effects on Plant Fluctuating Asymmetry.....	222
5.5	Summary .....	224
<b>6</b>	<b>Structure of Plant Communities.....</b>	<b>225</b>
6.1	Introduction .....	225
6.2	Materials and Methods .....	227
6.2.1	Study Areas and Sampling Design .....	227
6.2.2	Vegetation Cover .....	274
6.2.3	Stand Characteristics .....	274
6.2.4	Regeneration of Dominant Woody Plants .....	275
6.2.5	Diversity of Vascular Plants .....	275
6.2.6	Species Composition of Vascular Plants .....	276
6.3	Results .....	277
6.3.1	Vegetation Cover .....	277
6.3.2	Stand Characteristics .....	281
6.3.3	Regeneration of Dominant Woody Plants .....	282
6.3.4	Diversity of Vascular Plants .....	284
6.3.5	Species Composition of Vascular Plants .....	287
6.4	Discussion .....	287
6.4.1	Vegetation Structure and Productivity.....	287
6.4.2	Stand Regeneration.....	290
6.4.3	Diversity of Vascular Plants .....	290
6.4.4	Temporal Changes in Plant Community Structure .....	293
6.5	Summary .....	295

<b>7</b>	<b>Insect Herbivory</b>	297
7.1	Introduction	297
7.2	Materials and Methods	298
7.2.1	Density of Birch-Feeding Herbivores	298
7.2.2	Foliar Damage to Woody Plants	300
7.3	Results	307
7.3.1	Density of Birch-Feeding Herbivores	307
7.3.2	Foliar Damage to Woody Plants	318
7.4	Discussion	320
7.4.1	Herbivory in Polluted Areas	320
7.4.2	Pollution Effects on Insect–Plant Relationships	321
7.4.3	Dome-Shaped Responses	321
7.4.4	Insect Feeding Guilds	322
7.5	Summary	322
<b>8</b>	<b>Methodology of Pollution Ecology: Problems and Perspectives</b>	323
8.1	Importance of Observational Studies	323
8.2	Interpretation of Experimental Results	324
8.3	The Amount of Reliable Information	325
8.4	Quality of Information	326
8.4.1	Design of Impact Studies	326
8.4.2	Signal to Noise Ratio	329
8.4.3	Power of Correlation Analyses	330
8.4.4	Correlation with Pollution or Correlation with Distance?	331
8.4.5	Gradient Approach or the Planned Contrast?	332
8.4.6	Importance of Supplementary Information	333
8.5	Research and Publication Biases	334
8.6	Summary	337
<b>9</b>	<b>Effects of Industrial Polluters: General Patterns and Sources of Variation</b>	339
9.1	The State of Knowledge	339
9.1.1	Landscape-Level Effects	339
9.1.2	Ecosystem-Level Effects	341
9.1.3	Community-Level Effects	341
9.1.4	Population-Level Effects	343
9.1.5	Organism-Level Effects	345
9.2	Myths of Pollution Ecology	346
9.2.1	Generality of Responses	346
9.2.2	Uniformity of Responses	348
9.2.3	Causality of Responses	349
9.2.4	Linearity of Responses	351
9.2.5	Gradualness of Responses	353

9.3	Changes of Ecosystem Components Along Pollution Gradients: Structure of Phenomenological Model.....	354
9.4	Sources of Variation in Biotic Responses to Pollution.....	359
9.4.1	Variation Related to Emission Sources.....	359
9.4.2	Variation Related to Impacted Ecosystems .....	363
9.4.3	Variation Related to Climate .....	365
9.5	Exploring Effects of Industrial Pollution: Prospects and Limitations.....	366
9.6	Summary .....	368
<b>Appendix I .....</b>		<b>369</b>
<b>Appendix II.....</b>		<b>371</b>
