# Deep Space Craft

An Overview of Interplanetary Flight

 Springer

Published in association with  
**Praxis Publishing**  
Chichester, UK

 PRAXIS

# Table of Contents

<b>Introduction</b> .....	XV
<b>Author's Preface</b> .....	XVII
<b>Acknowledgements</b> .....	XIX
<b>Foreword</b> .....	XXI
<b>1 Telepresence</b> .....	1
1.1 On Location .....	1
1.1.1 A Busy Realtime Night .....	4
1.1.2 Realtime as Middle Ground .....	5
1.1.3 Wake-up Calls .....	6
1.1.4 Resolution .....	9
1.2 The Link With Earth .....	10
1.2.1 Spacecraft and the Deep Space Network .....	10
1.2.2 Microwaves .....	11
1.2.3 Antenna Gain .....	13
1.2.4 Power in the Link .....	15
1.2.5 All Things Considered .....	15
1.2.6 Signal-to-Noise Ratio: SNR .....	19
1.2.7 Amplification .....	21
1.2.8 The HEMT Low-Noise Amplifier .....	24
1.2.9 The Maser Low-Noise Amplifier .....	24
1.2.10 LNA Bandwidth .....	26
1.2.11 Microwave Signals To Go .....	26
1.2.12 The Closed-Loop Receiver .....	26
1.2.13 The Open-Loop Receiver .....	28
1.2.14 Transporting Information .....	28
1.2.15 Modulation Schemes .....	29
1.2.16 Power in the Data .....	30
1.2.17 Error Detection and Correction .....	31
1.2.18 Telemetry in Lock .....	34
1.2.19 Data Compression .....	35
1.2.20 Pushing the Shannon Limit .....	36
1.2.21 Data Structure .....	37

1.2.22	Channelized Engineering data and Science data . . . . .	38
1.2.23	CCSDS . . . . .	40
1.2.24	Remote Control . . . . .	41
1.2.25	Beacons in Space . . . . .	43
1.3	More than Telepresence . . . . .	45
	Notes . . . . .	45
	References . . . . .	47
<b>2</b>	<b>Navigating the Depths . . . . .</b>	<b>49</b>
2.1	Martian Miscalculation . . . . .	49
2.2	Choice of Flight Path . . . . .	51
2.3	Orbit Determination and Guidance . . . . .	53
2.3.1	Kepler; Newton and his <i>Principia</i> . . . . .	53
2.3.2	Models and Observables . . . . .	55
2.3.3	Optical Navigation . . . . .	56
2.3.4	Autonomous Navigation . . . . .	57
2.4	Making Measurements . . . . .	58
2.4.1	Coordinate Systems . . . . .	59
2.4.2	Measuring the Doppler Shift . . . . .	62
2.4.3	One, Two, Three Way . . . . .	64
2.4.4	Measuring Range . . . . .	66
2.4.5	VLBI — Very Long Baseline Interferometry . . . . .	67
2.4.6	Putting it all together . . . . .	70
2.5	Correction and Trim Maneuvers . . . . .	71
2.5.1	The Target Plane . . . . .	72
2.5.2	Maneuver Execution . . . . .	75
2.6	Gravity Assist . . . . .	78
2.6.1	A Grand Tour . . . . .	79
2.6.2	How it works . . . . .	80
2.7	A Familiar Connection Severed . . . . .	81
	Notes . . . . .	82
	References . . . . .	84
<b>3</b>	<b>Spacecraft Attitude Control . . . . .</b>	<b>87</b>
3.1	A Distant Rocking . . . . .	87
3.2	The Attitude Control System . . . . .	89
3.3	Intersecting Disciplines . . . . .	93
3.4	Stability . . . . .	96
3.4.1	Going for a Spin . . . . .	96
3.4.2	Three-axis control . . . . .	99
3.4.3	Hybrids . . . . .	100
3.5	Attitude Control Peripherals . . . . .	101
3.5.1	AACS Input Devices . . . . .	101
3.5.2	AACS Output Devices . . . . .	106
3.6	Scientific Experiments with AACS . . . . .	114
3.7	AACS Faults and Protection . . . . .	116

Notes	117
References	118
<b>4 Propulsion</b>	119
4.1 Liftoff	119
4.2 Newton's Third Law	121
4.2.1 Water as Reaction Mass	121
4.2.2 Rocket Science	122
4.2.3 A Solid Rocket Example	123
4.2.4 Making Comparisons	124
4.3 Interplanetary Travel Becomes Possible	125
4.3.1 Nozzles	126
4.4 Propulsion System Designs	127
4.4.1 Solid Rocket Motors	127
4.4.2 Liquid Monopropellant Systems	129
4.4.3 Liquid Bipropellant Systems	132
4.4.4 Tanks in Free-fall	135
4.4.5 Dual Modes and Hybrids	136
4.4.6 Electrical Propulsion	136
4.5 Basic Systems	139
Notes	139
References	141
<b>5 More Subsystems Onboard</b>	143
5.0.1 Hierarchy	143
5.0.2 Spacecraft Bus	143
5.1 Electrical Power Subsystem	144
5.1.1 Voltage and Current	144
5.1.2 Solar Panels	145
5.1.3 Batteries	148
5.1.4 RTGs	150
5.1.5 Power Conditioning and Distribution	153
5.1.6 Power Margin	155
5.2 Structure Subsystem	155
5.2.1 Functions	155
5.2.2 Materials	156
5.2.3 Components	156
5.2.4 Examples	157
5.2.5 Pre-Launch Structural Testing	158
5.3 Command and Telemetry Subsystem	159
5.3.1 CTS Roles	159
5.3.2 Data Storage	159
5.3.3 Data Bus	160
5.3.4 Heater Control	160
5.3.5 Heartbeat	161
5.4 Fault Protection	161

5.4.1	Safing .....	162
5.4.2	Fault-Tolerant Architecture .....	162
5.4.3	Fault-Protection Monitors .....	163
5.4.4	Fault-Protection Responses .....	164
5.4.5	Critical Commands .....	164
5.4.6	Recovery from Safing .....	165
5.5	Thermal Control Subsystem .....	165
5.5.1	Radiative Heat Transfer .....	166
5.5.2	Heat Generation .....	168
5.5.3	Conductive Heat Transfer .....	168
5.5.4	Components .....	168
5.5.5	Atmospheric Entry .....	172
5.5.6	Thermal-Vacuum Testing .....	173
5.6	Mechanical Devices Subsystem .....	174
5.6.1	Release Devices .....	174
5.6.2	Extensible Booms .....	176
5.7	Science Instruments .....	177
	Notes .....	177
	References .....	178
<b>6</b>	<b>Science Instruments and Experiments .....</b>	<b>181</b>
6.1	Questions .....	182
6.2	Payload .....	183
6.3	Scientific Instruments .....	183
6.3.1	The Four Categories .....	183
6.3.2	The Questions and the Instruments .....	184
6.3.3	Imaging Science Instruments .....	186
6.3.4	Altimeters .....	200
6.3.5	Microwave Radiometers and Scatterometers .....	201
6.3.6	Optical Spectroscopic Instruments .....	202
6.3.7	Mass Spectrometers .....	212
6.3.8	Atmospheric Analysis Instruments .....	214
6.3.9	Active Spectrometers .....	215
6.3.10	Magnetometers .....	216
6.3.11	Radio and Plasma Wave Detectors .....	217
6.3.12	Impact and Dust Detectors .....	217
6.3.13	Charged Particle Detectors .....	218
6.3.14	Summary .....	219
6.4	In-Flight Science Experiments .....	219
6.4.1	Solar and Stellar Occultations .....	219
6.4.2	Radio Science Occultations .....	220
6.4.3	Radio Science Celestial Mechanics Experiments .....	222
6.4.4	Superior Conjunction Experiments .....	223
6.4.5	Radio Science Gravitational Radiation Searches .....	224
6.4.6	Bistatic Radio Science Observations .....	225
6.4.7	Gravity Field Surveys .....	225

6.4.8	Calibrations and Ground Truth . . . . .	226
6.5	Science Data Pipeline . . . . .	227
6.5.1	Television, Radio, and Newspapers . . . . .	228
6.5.2	WWW Media . . . . .	228
6.5.3	Peer-Reviewed Journals . . . . .	229
6.5.4	Meetings of Scientific Institutions . . . . .	230
6.5.5	Hands on the Data . . . . .	231
6.5.6	An Expanding Presence . . . . .	232
	Notes . . . . .	232
	References . . . . .	234
<b>7</b>	<b>Mission Formulation and Implementation . . . . .</b>	<b>241</b>
7.1	Announcement of Opportunity . . . . .	241
7.1.1	Financial Perspective . . . . .	242
7.1.2	About Scout . . . . .	242
7.1.3	AO Responses . . . . .	242
7.2	Spacecraft Classifications . . . . .	243
7.2.1	Engineering Demonstration Spacecraft . . . . .	243
7.2.2	Observatory Spacecraft . . . . .	244
7.2.3	Flyby Spacecraft . . . . .	244
7.2.4	Orbiter Spacecraft . . . . .	245
7.2.5	Atmospheric Spacecraft . . . . .	245
7.2.6	Lander and Penetrator Spacecraft . . . . .	245
7.2.7	Rover Spacecraft . . . . .	245
7.2.8	Communications and Navigation Spacecraft . . . . .	246
7.2.9	Size and Complexity . . . . .	246
7.3	Making a Mission . . . . .	246
7.3.1	Decadal Surveys . . . . .	247
7.3.2	Competed Missions . . . . .	247
7.3.3	Assigned Missions . . . . .	248
7.3.4	Administration . . . . .	248
7.3.5	Mission Phases . . . . .	251
7.3.6	Reviews . . . . .	252
7.3.7	Pre-phase A: Concept studies . . . . .	253
7.3.8	Phase A: Concept and Technology Development . . . . .	259
7.3.9	Phase B: Preliminary Design and Technology Completion . . . . .	259
7.3.10	Phase C: Final Design and Fabrication . . . . .	262
7.3.11	Phase D: Assembly, Integration and Test, Launch . . . . .	262
7.4	Flying a Mission . . . . .	266
7.4.1	Phase E: Flight Operations and Data Analysis . . . . .	266
7.4.2	Phase F: Closeout . . . . .	276
	Notes . . . . .	278
	References . . . . .	278

<b>8</b>	<b>Onward</b> .....	281
8.1	Spacecraft Bus Technologies .....	281
8.2	Science .....	285
8.2.1	Gravitational Wave Astronomy .....	285
8.2.2	Earth-mass Exoplanet Discoveries .....	285
8.2.3	SETI .....	286
8.2.4	Habitat Identification .....	286
8.2.5	Improving Sensor Capability .....	286
8.3	Print and Electronic Media .....	287
8.4	Human Journeys .....	288
8.5	Earth-Protective Measures .....	288
8.6	Earthbound Dividends .....	289
	Notes .....	290
	References .....	291
	<b>Appendix A: Typical Spacecraft</b> .....	293
	<b>Appendix B: Typical Instruments</b> .....	319
	<b>Appendix C: Space</b> .....	333
	References .....	334
	<b>Appendix D: The Electromagnetic Spectrum</b> .....	341
	Notes .....	341
	<b>Appendix E: Chronology</b> .....	347
	Notes .....	368
	<b>Appendix F: Units of Measure, Abbreviations, Greek Alphabet</b> ...	369
	<b>Glossary</b> .....	379
	<b>Index</b> .....	425
