

Holger Herbst

Business Rule-Oriented Conceptual Modeling

With 108 Figures

Physica-Verlag

A Springer-Verlag Company

TABLE OF CONTENTS

TABLE OF FIGURES	XIII
1 INTRODUCTION	1
2 RULES IN ORGANIZATIONS AND INFORMATION SYSTEMS	8
2.1 Rules in Organizational Theory	8
2.1.1 Introduction	8
2.1.2 Selected Organizational Approaches.....	10
2.1.2.1 Bureaucracy Model of Max Weber	11
2.1.2.2 Approach of Management Theory and Organizational Theories of Business Administration	13
2.1.2.2.1 'Scientific' Management	13
2.1.2.2.2 Business Process Reengineering	14
2.1.2.3 Human Relations Approach and Theory of Motivation	20
2.1.2.4 Approaches of the Behavioral Scientific Decision Theory	20
2.1.2.5 Comparison of the Selected Organizational Approaches	21
2.1.3 Formalization of Organizational Facts	22
2.2 Implementation of Rules in Information Systems	26
2.2.1 Rules in Program Code	27
2.2.1.1 Third Generation Languages	27
2.2.1.2 Fourth Generation Languages	31
2.2.1.3 Fifth Generation Languages	32
2.2.2 Rules in Database Management Systems	35
2.2.2.1 Overview on Current Research	35
2.2.2.2 Deductive Database Management Systems	37
2.2.2.3 Active Database Management Systems	38
2.2.2.3.1 Introduction	38
2.2.2.3.2 Rule Syntax	41
2.2.2.3.3 Open Research Questions in Active DBMS	46
2.2.2.4 Practical Relevance of Deductive and Active Database Management Systems	47
2.2.3 Comparison of the Implementation Alternatives	48
2.3 Summary	49

3 BUSINESS RULES	51
3.1 Case Studies	52
3.1.1 Overview.....	52
3.1.2 Case Study 'DOM-2'	53
3.1.3 Examples of Business Rules	54
3.2 Classification of Integrity Constraints and Business Rules.....	56
3.2.1 Types of Integrity Constraints.....	57
3.2.1.1 Number of Database States Involved	57
3.2.1.2 Number of Referred Database Constructs	58
3.2.1.3 Time Point of Evaluation	60
3.2.1.4 Relation to the Data Model	60
3.2.1.5 Type of (Re)Action	61
3.2.1.6 Database Schema	61
3.2.1.7 Interdependencies between the Classification Criteria	62
3.2.2 Types of Business Rules	62
3.2.2.1 Event Types	62
3.2.2.2 Condition Types	68
3.2.2.3 Action Types	71
3.3 Business Rules in their Organizational Environment	74
3.3.1 Origins of Business Rules	74
3.3.1.1 External Origins	75
3.3.1.2 Internal Origins	76
3.3.1.3 Conflict Situations	76
3.3.1.4 Origin Owner	78
3.3.2 Processors of Business Rules.....	79
3.3.2.1 Processor Types	79
3.3.2.2 View on Single Business Rules	80
3.3.2.3 Assignment of Business Rules to Specific Processors	84
3.3.2.4 View on Processes Specified Using Business Rules	85
3.3.3 Assignment of Business Rules to Organizational Units	86
3.4 Summary.....	88
4 BROCOM: A BUSINESS RULE-ORIENTED CONCEPTUAL MODELING APPROACH	89
4.1 The Meta Model of the BROCOM Approach	89
4.1.1 Introduction	89
4.1.2 The Core of the Meta Model.....	92
4.1.2.1 Submodel 'Business Rule'	92
4.1.2.2 Submodel 'Process'	93
4.1.2.3 Submodel 'Data Model Components'	96
4.1.3 The Environment of Business Rules	96
4.1.3.1 Submodel 'Processor'	97
4.1.3.2 Submodel 'Origin'	98
4.1.3.3 Submodel 'Organizational Unit'	99

4.1.4 Selected Meta Models	101
4.1.4.1 Description of the Selected Meta Models	102
4.1.4.1.1 IFIP WG 8.1	102
4.1.4.1.2 ESPRIT: CIM Open Systems Architecture	105
4.1.4.1.3 ARIS	109
4.1.4.1.4 RIM	112
4.1.4.2 Comparison of the Selected Meta Models	115
4.2 Steps of the BROCOM Approach	116
4.2.1 Step 1: Process Structure	119
4.2.1.1 Deliverables	119
4.2.1.2 Procedure	119
4.2.1.3 Application to DOM-2	120
4.2.2 Step 2: Process Specification	120
4.2.2.1 Deliverables	120
4.2.2.2 Procedure	121
4.2.2.3 Application to DOM-2	125
4.2.3 Step 3: Data Model	127
4.2.3.1 Deliverables	127
4.2.3.2 Procedure	127
4.2.3.3 Application to DOM-2	128
4.2.4 Step 4: Integrity Constraints	130
4.2.4.1 Deliverables	130
4.2.4.2 Procedure	130
4.2.4.3 Application to DOM-2	131
4.2.5 Step 5: Validation	134
4.3 Summary	135
5 VIEWS ON THE META MODEL	136
5.1 Introduction	136
5.2 Process View	137
5.2.1 Petri Net	137
5.2.1.1 Introduction	137
5.2.1.2 Application	140
5.2.1.2.1 ECA2 Net	140
5.2.1.2.2 Simplified ECA2 Net	144
5.2.2 Conceptual Processing Model	145
5.2.2.1 Introduction	145
5.2.2.2 Application	146
5.3 View on the Data Model	148
5.3.1 Entity-Relationship Model	148
5.3.1.1 Introduction	148
5.3.1.2 Application	149
5.3.2 NIAM	153
5.3.2.1 Introduction	153
5.3.2.2 Application	156
