1 Regional Externalities: an Introduction.....	1
<i>Wim Heijman</i>	
Literature.....	7

Parti Transport

2 Modelling Transport in an Interregional General Equilibrium Model with Externalities.....	11
<i>Morten Marott Larsen, Bjarne Madsen and Chris Jensen-Butler</i>	
2.1 Introduction.....	12
2.2 Positive Externalities.....	13
2.2.1 Pecuniary and Technological Externalities.....	14
2.3 Proximity, Income and Externalities in Denmark.....	17
2.3.1 Estimating Urban and Pecuniary Externality Effects: the Two Approaches.....	17
2.3.2 Factors Creating Differences in Wage Levels, Not Involving Externality Effects.....	18
2.3.3 The Data.....	18
2.3.4 The Effects of Urban Externalities.....	20
2.3.5 Pecuniary Externalities: Wage Differentials and Commuting Distance.....	22
2.4 The LINE-Model - Modelling Externalities and Transport..	23
2.4.1 LINE - an Interregional General Equilibrium Model for Modelling Redistribution of Productivity Changes.....	24
2.4.2 Direct Wage and Price Effects in LINE.....	26
2.4.3 LINE and SAM-K: Configuration.....	29

2.5 Modelling the Redistribution of the Relative Productivity Decline Associated with Road Pricing - the Case of Denmark.....	30
2.5.1 Road Pricing and Changes in Transport Costs.....	31
2.5.2 Effects of Transport Costs on Prices and Costs, With and Without Externalities.....	33
2.5.3 Effects on Real Economic Activity from Changes in Cost and Prices, With and Without Externalities.....	35
2.6 Conclusions.....	37
References.....	44
External Effects in Road Traffic: the Pigou-Knight Model and its Extension to Situations With Endogenous Speed Choice and Heterogeneous Traffic.....	
47	
<i>Jan Rouwendal</i>	
3.1 Introduction.....	48
3.2 The Pigou-Knight Model of Traffic Congestion.....	48
3.3 Speed Choice and the Determination of the Travel Cost Function.....	51
3.3.1 Introduction.....	51
3.3.2 Speed Choice.....	52
3.3.3 The Steady State.....	53
3.3.4 A Specific Case.....	56
3.4 The Pigou-Knight Model with Heterogeneous Drivers.....	57
3.4.1 Introduction.....	57
3.4.2 Optimal Congestion Tolling.....	61
3.4.3 Discussion.....	63
3.5 A Numerical Example.....	64
3.6 Conclusion.....	68
References.....	68
On Traffic Congestion Models <i>a la</i> Mohring and Harwitz.....	
71	
<i>Pierre v. Mouche, Willem Pijnappel and Jan Rouwendal</i>	
4.1 Introduction.....	71
4.2 Setting.....	72
4.3 Real World Interpretation.....	75
4.4 Existence Results.....	77
4.5 The Self Financing Result of Mohring and Harwitz.....	81
4.6 Suggestions for Further Research.....	85
4.7 Conclusions.....	86

Appendix: a Closer Look at the Setting.....	87
References.....	89
Local Collectors Versus Major Infrastructural Works.....	91
<i>Catharinus F. Jaarsma and Wim Heijman</i>	
5.1 Introduction.....	92
5.2 The Importance of Local Connections.....	93
5.3 Current Policy Around Local Connections.....	96
5.4 Some Practical Experiences: the Disappearance of Local Connections.....	99
5.5 Conclusions, Recommendations and Discussion.....	103
References.....	104

Part II Clusters and Product Chains

6 Regional Differentiation and Location of Industrial Capacity in the Slovak Republic.....	109
<i>Jana Gaspariková, Edita Nemcová and Michal Páleník</i>	
6.1 Introduction.....	109
6.2 Industrial Development in the Slovak Republic with Special Impact on Technology Intensity.....	111
6.3 Regional Differentiation in Employment.....	114
6.4 Survey Study.....	117
6.4.1 Explanation of Variables.....	118
6.4.2 Regional Differentiation.....	119
6.4.3 Results.....	121
6.4.4 Consequences Resulting from the Survey.....	125
6.5 Conclusion.....	127
6.6 Methodological Notes.....	128
References.....	129
7 Automobile Sector in the Slovak Republic: Current Situation and Future Prospects.....	131
<i>Danes Brzica</i>	
7.1 Introduction.....	131
7.2 Development of Automobile Production Capacities.....	133
7.3 Preconditions for Cluster Emergence.....	135
7.4 Automobile/Automobile Parts and Components Sector and Emergence of Automobile Clusters.....	137
7.5 Model Describing Relation Between Automobile and Parts/Components Production.....	143

X Contents

7.6	Conclusions.....	146
	References.....	146
8	IT Market and E-Commerce in Transition Economy: Network Externalities.....	149
	<i>Vytautas Snieska, Regina Virvilaite, Vaida Kvainauskaite, Bronius Neverauskas, Rimantas Gatautis, Aiste Dovaliene</i>	
8.1	Introduction.....	149
8.2	The Structure of Network Externalities.....	150
8.3	Network Externalities and Transaction Cost Minimization.....	152
8.3.1	Transaction Costs in the Market Without Intermediaries.....	153
8.3.2	Transaction Costs in the Market with Intermediaries.....	153
8.3.3	Transaction Costs and E-Commerce.....	154
8.3.4	E-Commerce and Intermediation Services.....	155
8.3.5	The Impact of E-Commerce on the Co-Ordination Costs.....	158
8.4	IT Market and E-commerce Growth Effects: Lithuanian Case.....	161
8.5	Research Methodology.....	164
8.6	Results.....	167
8.7	Conclusions.....	169
	References.....	170
9	International Outsourcing in the Netherlands.....	173
	<i>Kees Burger and Rein Haagsma</i>	
9.1	Introduction.....	174
9.2	Vertical Specialization and Outsourcing in the Dutch Economy.....	175
9.3	Outsourcing, Productivity, and Employment.....	182
9.4	Regional Aspects of Outsourcing.....	187
9.5	Summary and Discussion.....	194
	References.....	196
10	Regional Externalities and Clusters: a Dutch Network Case-Study.....	197
	<i>Roel Rutten and Frans Boekema</i>	
10.1	Introduction.....	198
10.2	The "KIC-Project": a DUTCH Regional Case-Study.....	201
10.3	Creation of (Inter-Firm) Knowledge.....	202

10.4	A Variety of Disciplines.....	204
10.5	Tacit and Codified Knowledge.....	205
10.6	Some Preliminary Results.....	206
10.7	Interfirm Relations.....	207
10.8	The Regional Impact.....	209
10.9	The Spatial Relevance of Knowledge Transfer:	
	Proximity and Distance.....	210
10.10	Theoretical Implications.....	212
10.11	Competitiveness and Knowledge.....	213
10.12	Knowledge Exchange and Trust.....	213
10.13	Regional Partners and Knowledge Exchange.....	214
10.14	Knowledge Creation in Networks Explained.....	215
10.15	Space Matters (More than Ever?).....	217
10.16	Conclusion.....	218
	References.....	219
11	Spatial Dimension of Externalities and the Coase Theorem: Implications for Co-existence of Transgenic Crops.....	223
	<i>Volker Beckmann and Justus Wesseler</i>	
11.1	Introduction.....	224
11.2	Assessing the Problem of Co-existence.....	225
	11.2.1 A Simple Model.....	227
	11.2.2 Co-Existence, Economic Damage and Technical Measures.....	229
	11.2.3 Liability Rights and Distribution of Costs and Benefits.....	231
11.3	Co-Existence: A Coasian View.....	234
	11.3.1 Efficient Allocation.....	235
	11.3.2 Spatial Implications.....	236
	11.3.3 Distributional Implications.....	239
11.4	Conclusions.....	239
	Acknowledgements.....	240

	<i>Steinar Johansen</i>	
14.1	Introduction.....	288
14.2	Relevant Policy Sectors.....	289
14.2.1	Macroeconomic Policies.....	290
14.2.2	19 Sector Policies.....	291
14.2.3	Government Policies in Seven Selected Regions... ..	292
14.3	Methods for Calculating, Comparing and Ranging Impacts.....	292
14.3.1	Methods for Calculating Impacts.....	293
14.3.2	Methods for Comparing Impacts.....	296
14.3.3	Methods for Ranging Impacts.....	298
14.4	Impacts of Policies: Most Important Sectors.....	300
14.4.1	The Government Re-Distributes Resources Regionally.....	300
14.4.2	Macroeconomic Strategies Influence Regional Development.....	300
14.4.3	Important Other Sector Policies.....	301
14.5	Concluding Remarks.....	304
	Literature and References.....	305

15	The Economics of Tree-planting for Carbon Mitigation: A Global Assessment.....	307
	<i>Pablo C. Benitez, Ian McCallum, Michael Obersteiner and Yoshiki Yamagata</i>	
15.1	Introduction.....	307
15.2	Carbon Sequestration Costs.....	309
15.3	Data.....	311
15.3.1	Land Available for AR-Projects.....	311
15.3.2	Carbon Uptake.....	312
15.3.3	Risk-Adjusted Discount Rates.....	313
15.3.4	Prices.....	315
15.4	Results.....	315
15.4.1	Geographic Distribution of Carbon Sequestration Costs.....	315
15.4.2	Global Carbon Supply.....	316
15.4.3	Long-term Carbon Supply and Policy Implications.....	317
15.5	Conclusions.....	318
	References.....	319
