<b>Preface</b> . . . . .	ix
<b>Acknowledgments</b> . . . . .	xi
<b>List of figures</b> . . . . .	xiii
<b>List of tables</b> . . . . .	xix
<b>List of abbreviations and acronyms</b> . . . . .	xxv
<b>List of contributors</b> . . . . .	xxix
<b>List of authors</b> . . . . .	xxxii
<b>Introduction</b> . . . . .	xxxiii
<b>1 Sources of anthropogenic pollution in the Nordic Seas and Arctic</b> . . . . .	1
1.1 Radioactive contamination: classification and description of sources . . . . .	1
1.1.1 Classification of sources . . . . .	1
1.1.2 Nuclear power plants (NPPs) . . . . .	4
1.1.3 Nuclear industry enterprises . . . . .	6
1.1.4 Scientific and research reactors and laboratories . . . . .	14
1.1.5 Special combines . . . . .	15
1.1.6 Nuclear weapons tests and “peaceful” nuclear explosions . . . . .	16
1.1.7 Military bases, nuclear icebreakers, and submarines . . . . .	22
1.1.8 Miscellaneous accidents . . . . .	24
1.2 Radioactive pollution: major Russian nuclear industries . . . . .	25
1.2.1 The Mayak Production Association, Chelyabinsk . . . . .	25
1.2.2 The Siberian Chemical Combine, Tomsk-7 . . . . .	40
1.2.3 The Mining Chemical Combine, Krasnoyarsk-26 . . . . .	47

1.3	Non-radioactive pollution . . . . .	51
1.3.1	Main sources of marine pollution in the Russian Arctic . . . . .	51
1.3.2	Distribution of pollution in the Russian Arctic Seas and coastal areas . . . . .	56
<b>2</b>	<b>Study region and environmental datasets . . . . .</b>	<b>87</b>
2.1	Geographical description of the study region . . . . .	87
2.1.1	The Ob' and Yenisei River systems . . . . .	88
2.1.2	Kara Sea region . . . . .	106
2.1.3	The Nordic Seas and adjacent seas . . . . .	125
2.2	Description of environmental and pollution data . . . . .	133
2.2.1	Databases and information system . . . . .	133
2.2.2	Environmental data . . . . .	138
2.2.3	Radioactive and non-radioactive pollution data . . . . .	144
<b>3</b>	<b>Generic model system (GMS) for simulation of radioactive spread in the aquatic environment . . . . .</b>	<b>147</b>
3.1	Rationale, concept, and structure of the GMS . . . . .	147
3.1.1	GMS structure and data streams . . . . .	148
3.1.2	Modeling management . . . . .	150
3.2	Atlantic and Arctic Ocean model . . . . .	150
3.2.1	General model description . . . . .	150
3.2.2	Radionuclide tracer module . . . . .	154
3.2.3	Model validation results . . . . .	155
3.2.4	Extension and validation of the Arctic/North Atlantic model . . . . .	155
3.3	Kara Sea shelf sea model . . . . .	160
3.3.1	General model description . . . . .	160
3.3.2	Model validation results . . . . .	164
3.4	The Ob' and Yenisei River and estuary models . . . . .	171
3.4.1	One-dimensional model to simulate the transport of radionuclides in a river system—RIVTOX . . . . .	172
3.4.2	Numerical model for three-dimensional dispersion simulation of radionuclides in stratified water bodies—THREETOX . . . . .	184
3.4.3	River model validation results . . . . .	198
<b>4</b>	<b>Studies of potential radioactive spread in the Nordic Seas and Arctic using the generic model system (GMS). . . . .</b>	<b>213</b>
4.1	Simulation of past contamination of the Nordic Seas and Arctic from anthropogenic releases . . . . .	214
4.1.1	River and estuary transport and dilution of radioactive pollutants from rivers to the Kara Sea . . . . .	214
4.1.2	Transport and dilution of radioactive waste and dissolved pollutants in the Kara Sea . . . . .	241

4.1.3	Transport and dilution of radioactive waste and dissolved pollutants from all sources . . . . .	248
4.2	Scenarios for potential future releases of radioactivity . . . . .	258
4.2.1	“The Mayak PA” scenario . . . . .	258
4.2.2	“Krasnoyarsk” scenario . . . . .	258
4.2.3	“Tomsk” scenario . . . . .	261
4.2.4	“CO <sub>2</sub> -doubling” scenario . . . . .	262
4.2.5	“Submarine” scenarios . . . . .	262
4.3	Assessments of potential accidental releases for the 21st century . . . . .	263
4.3.1	Potential radioactive contamination from rivers to the Kara Sea . . . . .	264
4.3.2	Potential radioactive contamination in the Kara Sea . . . . .	269
4.4	Transport of radioactivity in the Arctic and possible impact of climate change . . . . .	276
4.4.1	Accident scenario of <sup>90</sup> Sr from the Ob' and Yenisei Rivers . . . . .	276
4.4.2	Spread of accidentally released <sup>90</sup> Sr under present and 2 * CO <sub>2</sub> warming scenarios . . . . .	277
4.5	Potential transport of radioactivity from submarine accidents . . . . .	278
4.5.1	Local model simulations . . . . .	279
4.5.2	Large-scale model simulations . . . . .	280
<b>5</b>	<b>Studies of the spread of non-radioactive pollutants in the Arctic using the generic model system (GMS) . . . . .</b>	<b>283</b>
5.1	Approach to simulation of pollutants in the aquatic environment . . . . .	283
5.1.1	Persistent organic pollutants . . . . .	283
5.1.2	Basic processes and equations for modeling . . . . .	284
5.1.3	Modeling POP transport in the environment . . . . .	288
5.2	Modeling PCB spread in Arctic rivers and coastal waters using the GMS . . . . .	295
5.2.1	Modification of the models for simulation of PCBs . . . . .	295
5.2.2	GMS application to simulate the transport and fate of PCBs released in the Yenisei River and estuary . . . . .	298
5.3	Modeling petroleum hydrocarbon spread using the GMS . . . . .	299
5.3.1	Processes of oil spread in the marine environment . . . . .	299
5.3.2	Modeling oil spread in the marine environment . . . . .	303
<b>6</b>	<b>Assessment and input to risk management . . . . .</b>	<b>309</b>
6.1	Introduction . . . . .	309
6.1.1	Purpose, endpoints, and philosophy . . . . .	309
6.1.2	Source term characteristics . . . . .	310
6.1.3	Environmental characteristics . . . . .	310
6.1.4	Time frames and societal assumptions . . . . .	310
6.2	Scenarios . . . . .	311
6.2.1	Source term scenarios . . . . .	311
6.2.2	Climate scenarios . . . . .	311

viii Contents

6.3	Formulation and implementation of dose models . . . . .	312
6.4	Results . . . . .	313
6.5	Conclusions . . . . .	321

**APPENDICES**

<b>A</b>	<b>Time series of annual average concentrations of radionuclides in water and sediments by accident scenario and location used for dose calculations . .</b>	<b>325</b>
<b>B</b>	<b>Doses to individuals in critical groups from all accident scenarios given by radionuclide and exposure pathway . . . . .</b>	<b>335</b>
	<b>Afterword . . . . .</b>	<b>373</b>
	<b>References . . . . .</b>	<b>375</b>
	<b>Index . . . . .</b>	<b>403</b>
